- LICENSED CUSTOMS BROKERS
- CERTIFIED PUBLIC ACCOUNTANTS
- TAX ATTORNEYS

WHAT MOST FIRMS DON'T DO ✕

Remedy Phase Representation

Frost Law AZ doesn't just file and wait. Our attorneys represent clients in the remanded court proceedings, advocating for streamlined refund processes, nationwide injunctions, and stipulated judgments that accelerate recovery.

A RISK MOST IMPORTERS DON'T KNOW ABOUT ✕

Defense Against Refund Offsets

The government may attempt to reduce or eliminate IEEPA refunds by "offsetting" them against new tariff liabilities under Section 122 or Section 301. Frost Law AZ actively defends clients against these offset attempts to protect the full refund amount.

WHY COMPLIANCE REVIEW MATTERS

CBP will scrutinize every refund submission. Before Frost Law AZ files any claim, our team conducts a compliance review to make sure the claim is filed correctly and nothing in the underlying data raises serious issues. This step protects the client's recovery and ensures the firm stands behind every claim it submits.

- **Entry Data Red Flags**
  Reviewing the underlying entry data for issues that could trigger a CBP audit or jeopardize the claim.
- **Classification and Valuation Consistency**
  Checking for inconsistencies in HTS codes, declared values, or country of origin reporting across entries.
- **Documentation Gaps**
  Confirming the client's records are sufficient to support the filing and won't stall or derail the process.
- **Filing Confidence**
  The firm does not submit claims it hasn't reviewed. If something raises a serious concern, it's addressed before anything goes to CBP.
