

AMERICAN ACADEMY OF
IMPLANT DENTISTRY FOUNDATION

Annual Report 2023-2024

A photograph of a middle-aged man with short, light-colored hair, smiling warmly. He is wearing a dark blue button-down shirt over a light-colored collared shirt. The background is a dental office, with a counter, a sink, and various dental tools visible. The entire image is covered with a semi-transparent blue filter. On the right side, there is a vertical column of decorative dots in various shades of blue, teal, and grey. Large, stylized blue quotation marks are positioned around the text.

I used to be nervous to go to the dentist, now I'm looking forward to my first cleaning appointment in May since I've had implants placed. My new teeth feel great and I am able to eat whatever I like. I've had lots of compliments on my new smile. Thank you to all of the Foundation donors who made this happen!

ABOUT THE AMERICAN ACADEMY OF IMPLANT DENTISTRY FOUNDATION

Founded in 1982, the **American Academy of Implant Dentistry Foundation** is a distinguished 501(c)(3) public charity dedicated to advancing the field of oral implantology. With a long-standing commitment to fostering excellence in dental care, the Foundation focuses on three primary pillars: research, education, and charitable initiatives.

Mission

The Foundation's mission is to champion the advancement of the science and practice of oral implantology. Through innovative research, educational opportunities, and strategic collaborations, we work to elevate the standards of dental implant care globally. The Foundation strives to ensure that dental professionals have access to cutting-edge implant dentistry knowledge. This access empowers AAIDF members and volunteers to deliver the highest quality care to patients in need.

Core Values

Innovation in Research – We are committed to supporting pioneering research that explores new frontiers in oral implantology, driving progress in patient outcomes, treatment methodologies, and dental technologies.

Education and Professional Development – Providing educational programs and financial resources that empower the next generation of dental professionals is a cornerstone of the Foundation's mission. We offer scholarships and grants to dental students, post-graduate scholars, and residents, enabling them to pursue advanced education in the field of oral implantology.

Charitable Outreach and Support – The Foundation believes in giving back to the community through charitable grants and programs. Through the Foundation's research grants, the *Smile, Veteran!*™ program, The Buhite Scholarship, and other philanthropic efforts, we help to ensure that those in underserved areas have access to dental implant care, thus improving lives through enhanced oral health.

By remaining true to these guiding principles, the Foundation continues to lead the way in making a lasting impact on the future of implant dentistry, fostering a legacy of compassion, excellence, and innovation.

LETTER FROM THE CHAIR

On behalf of the American Academy of Implant Dentistry Foundation (AAIDF), I extend our heartfelt gratitude for your unwavering support and generosity. Your contributions have been instrumental in advancing our mission and making a significant impact in the field of implant dentistry.

We are thrilled to share some of the remarkable achievements made possible by your donations.

The *Smile, Veteran!*™ program furthered our mission of dental care by giving back directly to our communities. The *Smile, Veteran!*™ program treatment providers donate dental care to a local Veteran in need of dental implants. This year the program doubled the number of patients served and awarded almost \$5,000 for dental lab services.

In 2023, the Foundation, with the support of the Buhite-DiMino Foundation and our generous members, founded the Robert J. Buhite Scholarship Endowment. This new initiative expands the impact of the Foundation. In addition to our commitment to advancing implant dentistry through research grants, we are now nurturing the next generation of clinicians through this educational scholarship.

Our flagship programs, the Large Research Grants and Steflik Student Research Grants, awarded over \$105,000 to researchers at seven institutions in our mission to actively advance the field of implant dentistry. Since our founding, we have collectively awarded more than \$1.3 million in grant funding to support research projects at 63 institutions across eight countries.

None of these initiatives would be possible without the generosity and support of AAID members and the dental community at large. Our annual Silent Auction continues to be a major success, raising around \$80,000 in 2024; these donations are reinvested each year into our charitable programs. I thank the AAID and the Foundation leaders who actively champion the Foundation through the Annual Board Challenge fundraiser.

In 2024, the friendly competition between the Boards raised its highest amount since its inception, with nearly \$33,000 in donations. At approximately \$6.7 million in assets, the Foundation is well-positioned to sustain its mission “to further the science of oral implantology through research and education, and to support the delivery of implant care through charitable efforts.” As we celebrate these milestones, we also look to the future with optimism and purpose. Your generosity has already made a tremendous impact. We kindly ask you to consider making an additional donation to help us further our mission and continue making a difference in the lives of many.

Thank you once again for your generosity and commitment to the Foundation’s mission. Together, we are shaping the future of implant dentistry and improving countless lives.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Daniel Domingue'.

\$285,000 in Grants = 22 Research Projects

The American Academy of Implant Dentistry Foundation stewards donations through grant funding for research projects in implant dentistry.

I've gotten so many compliments on my "pretty smile" since having my implant procedure provided by the *Smile, Veteran!*[™] Program. It has been a 40-year journey to a smile I can be proud of since my first braces and surgery by the Air Force in 1984. In addition to the aesthetics that have helped me to be more confident when interacting with others, I'm thrilled that I don't have any of the pain I had previously struggled with having natural teeth.

— Ms. R'Nita Rabelais,
Smile, Veteran![™] Patient

The *Smile, Veteran!*TM Program experienced remarkable growth in 2024. Since December 13, 2023, we have been overwhelmed with more than 180 inquiries from Veterans eager to benefit from our services. Out of these, five Veterans successfully submitted their applications, complete with all required eligibility documentation.

Thanks to the generosity of five dedicated AAID members, these Veterans received *pro bono* dental treatments, transforming their smiles and lives. Additionally, our program budget expanded to \$25,000, enabling us to better support laboratory services alongside treatment.

Your support can help us continue to transform the lives of Veterans through the *Smile, Veteran!*TM Program. Join us in making a difference today!

SMILES TRANSFORMED IN 2024

The following lives were transformed as a part of the *Smile, Veteran!*™ program in 2024.

Ms. R'Nita Rabelais was treated by Edward Kusek, DDS, FAAID, DABOI/ID.

Ms. Rabelais served 20 years as a member of the U.S. Airforce. She underwent surgery on her maxillary during her service with several fillings and ill-fitting veneers, meant to be a temporary solution for cavities and missing teeth. Dr. Edward Kusek placed ten implants with maxillary and mandibular hybrid dentures after extractions. Since her treatment, Ms. Rabelais has since enjoyed a more restored smile and renewed social confidence.

Dr. Kusek

Mr. Daniel Greco was treated by Stephen Kondorossy, DMD, AFAAID.

Mr. Greco served in the U.S. Army for thirty years. He received a root canal during his service in Germany to fix cracked teeth from fillings provided by the Army. Mr. Greco had several teeth extracted and bridges put in over the years that contributed to tinnitus and further tooth decay. He suffered from a lack of ability to eat comfortably and reduced social interactions as a result of his dental problems. Dr. Kondorossy placed 15 implants, fixed partial dentures, and an upper implant bridge to restore Mr. Greco's smile.

Dr. Kondorossy

Mr. John Meschi was treated by Donald Provenzale, DDS, FAAID, DABOI/ID.

Mr. Meschi was a private in the U.S. Marine Corps. For more than 10 years, he suffered from lack of stability of maxillary dentures and edentulism. Dr. Provenzale provided an implant-supported bridge as a part of Mr. Meschi's treatment. The dental implants and related components for this case were supplied gratis by a representative of Neodent USA.

Mr. Meschi's quality of life has improved immensely since treatment – he has a renewed ability to eat and chew various foods and enhanced social interactions. The Foundation extends its gratitude to Neodent USA for their support of this case.

Dr. Provenzale

Sgt. Antonio Chatman was treated by Robert Pauley, DMD, AFAAID.

Sgt. Chatman was a staff sergeant for the U.S. Airforce. He had cavities filled during his service in the military; when these fillings fell out, it resulted in tooth loss and periodontal disease. He also had chipped teeth and infection as a result of a housefire he narrowly escaped after his return home from service. Dr. Pauley performed extractions and bone grafting, followed by restorations of individual sites with single tooth implants and crown placements. Sgt. Chatman's confidence increased significantly after treatment, and he no longer feels the need to cover his mouth with his hand when talking with others. Tatum Surgical donated all implants and parts for

Sgt. Chatman's treatment. The Foundation conveys its deepest gratitude for Tatum Surgical's support of this case.

Dr. Pauley

Mr. Jeffrey Flathau was treated by Bill Anderson, DDS, FAAID, DABOI/ID.

Mr. Flathau was in the U.S. Army and the Michigan National Guard. He had terminal dentition with gross decay, abscesses, and chronic infection. Dr. Anderson provided full-mouth All-on-X dental implants to support maxillary and mandibular full arch hybrid dentures. After enduring years of oral health challenges due to injuries sustained during service, Mr. Flathau now speaks

and smiles with confidence and dignity. He has a new outlook on life and work, with renewed ability to eat healthier foods and a newly fostered self-assurance when dealing with clients at his job.

Dr. Anderson

TRANSFORMING LIVES TOGETHER: A TRIBUTE TO OUR SPONSORS

We are deeply grateful to our corporate sponsors for their unwavering support. Since 2018, ZimVie Dental, a founding sponsor, has been instrumental in transforming the lives of our Veterans by generously donating implants and other implant-related materials, ensuring these vital treatments are provided at no cost to the Veteran patients. In 2024, Implants, Ltd. joined our mission by donating bone graft and related materials to the *Smile, Veteran!*™ program, and has committed to offering these materials for each case as needed, also at no cost to the Veteran patients. The Foundation extends its heartfelt thanks to ZimVie Dental and Implants, Ltd. for their invaluable contributions.

We are also thrilled to announce a new partnership with Glidewell Laboratories beginning in 2025. Glidewell Laboratories joined forces with the Foundation to offer laboratory services to our treatment providers. This collaboration will further enhance the quality of care the *Smile, Veteran!*™ program offers to our Veterans.

Become a Treatment Provider

Since the founding of the *Smile, Veteran!*™ Program in 2018, the Foundation has improved the lives of **13 veterans** by giving them brand new smiles. The Foundation is always seeking AAID-credentialed providers for our *Smile, Veteran!*™ program.

Interested in giving back as a treatment provider for Veterans? Send an email to foundation@aaid.com.

FOUNDATION RESEARCH GRANTS

From its inception, the Foundation proudly offered grants for research in the field of oral implantology. Collectively, the Foundation has invested \$1.3 million into the future of dental implant research and helped shaped the next generation of innovation in implant dentistry. To date, the Foundation has supported a total of 96 projects from 64 schools in 8 countries.

2024 Steflik Grants

The David R. Steflik Grants are a beacon of opportunity for dental students in post-graduate and residency programs, supporting their deserving research projects. Each grant, valued at \$2,000, empowers these future leaders to pursue innovative and impactful oral implantology research studies.

In 2024, the Foundation awarded Steflik grants to three exceptional projects, each selected for their potential to make significant contributions to dental implant research:

Dr. Tarik Patel, University of Toronto, and Dr. Gerald Niznick, College of Dentistry, Canada

Evaluating the efficiency of the different resilient overdenture attachments in implant-assisted cast partial dentures

Dr. Pearl Silveira, Government Dental College, Thiruvanthapuram, India

Evaluation of the antibacterial activity of silver nanoparticles green synthesized using Mooring oleifera leaf extract on peri-implant disease pathogens Porphyromonas gingivitis and Fusobacterium nucleate - an in vitro study.

Dr. Louis Asimakopoulos, Indiana University School of Dentistry, United States

Evaluation of implant stability and accuracy of static computer-assisted implant surgery (sCAIS) in different bone densities between two different implant designs.

2024 Large Grants

The Foundation Large Research Grants provide support for meritorious dental implant research projects. These grants help researchers develop and test new techniques and procedures, conduct small clinical or animal research projects, analyze grant data, and explore the feasibility of larger-scale projects.

In 2024, the Foundation proudly awarded a total of \$105,800 in Large Research Grants, with each grant amounting up to \$25,000. Here are the remarkable projects that received support:

Dr. Junying Li, Regents of the University of Michigan, United States

Optimize scanbody design for artificial intelligence-based full-arch implant scan.

Dr. Michael Salin, Trustees of Dartmouth College, United States

Bioimadance-based bone quality assessment for predicting dental implant osseointegration outcomes.

Ashley Peete, University of Mississippi Medical Center, United States

Magnesium-doped hydroxyapatite anodization coatings on Ti-6AL-4V surfaces to improve osseointegration.

Dr. Alexander Magallanes, Alexander Magallanes, DDS, Private Practice, United States

PRF and bovine bone graft in the alveolar bone preservation.

The Foundation has awarded \$1.3 million dollars over the years, in support of research in implantology.

To learn more about the projects funded by the Foundation and read findings reports, visit aaid.com/aaidf-grants.

THE ISIAH LEW MEMORIAL RESEARCH AWARD: CELEBRATING A FOUNDER

Each year, the Foundation bestows the Isiah Lew Memorial Research Award to celebrate an individual who has made extraordinary contributions to the advancement of research in implant dentistry. Established to honor the legacy of Dr. Isiah Lew, a true pioneer whose passion, dedication, and enthusiasm for implant dentistry were unmatched, this award stands as a testament to his lasting impact on the field. Dr. Lew's visionary work continues to inspire and shape the future of oral implantology research.

Dr. Frank LaMar, Sr. was presented with the Isiah Lew Award at the 2024 AAID Annual Conference in Atlanta, Georgia. Pictured here are Dr. Frank LaMar and his two sons. From left: Dr. James LaMar (son); Dr. Frank LaMar, Sr.; Dr. Frank R. LaMar (son)

This year, the Foundation chose to honor Dr. Frank LaMar, Sr., recognizing not only his exceptional research achievements but also his unwavering commitment to the Foundation's core values. His pioneering research has had a profound impact on both the scientific understanding and clinical application of dental implants. In addition to his research work, Dr. LaMar has been an integral figure in the development and growth of the Foundation since its inception, playing a key role in shaping its direction and ensuring its success. His tireless efforts and unwavering dedication to the Foundation's mission tripled the impact of the grants program and expanded research in the field of implant dentistry.

AAID FOUNDATION PROGRAMS: NEW PROGRAMS, NEW GROWTH

The Buhite Scholarship

The Buhite Scholarship was established on November 2, 2023, with a founding gift from the Buhite-DiMino Foundation. This initial gift for The Buhite Scholarship endowment fund was made in honor of Dr. Robert J. Buhite, Sr.

The Foundation is honored to continue Dr. Buhite's legacy by offering The Buhite Scholarship to doctorate and post-doctorate students pursuing continued education in implant dentistry/implantology programs. Dr. Robert J. Buhite, Sr. was an ABOI Diplomate and an AAID Honored Fellow. His true passions were caring for his patients and teaching his students at the University at Buffalo.

The Foundation has successfully raised a total of \$126,484 for The Buhite Scholarship Fund. This remarkable achievement reflects the overwhelming support and generosity of AAID members who recognize the value of investing in the future of implant dentistry education. The Foundation is committed to continuing its efforts to grow the fund, with a stated goal of raising an additional \$100,000 in the coming year. These funds will enable The Buhite Scholarship to make a lasting impact on dental students and professionals for years to come.

The Buhite Scholarship Committee has worked diligently to establish comprehensive criteria that ensure the scholarship is awarded to individuals who embody the highest standards of academic achievement, research potential, and dedication to the field of implant dentistry. The application opened in November 2024, and the first scholarship will be awarded in 2025.

Looking Ahead

The Foundation looks forward to continuing its efforts in growing The Buhite Scholarship Fund and expanding its impact on the implant dentistry community. The Committee set a goal of raising \$100,000 towards The Buhite Scholarship endowment fund by Spring 2026. As we move forward, we are excited about the positive influence the scholarship will have on aspiring implantologists and the broader field of dental implant care.

Donating to The Buhite Scholarship ensures that future generations of students have access to educational opportunities in the field, advancing innovation and clinical excellence. By investing in this Scholarship, we not only support aspiring professionals but also honor and perpetuate a legacy of commitment to transformative dental care.

You can make a donation to The Buhite Scholarship endowment by scanning the QR code below.

THANK YOU 2024 CHAMPION DONORS

We would like to express our sincere gratitude to the following partners whose generous contributions have enabled the AAID Foundation to make significant strides in advancing the Endowment Fund and launch a new scholarship program over the past year. Your unwavering support is integral to the success of the Foundation's charitable initiatives and continues to drive meaningful impact in the field of implant dentistry.

Over \$32,000 Raised

2024 Annual Board Challenge Fundraiser

This year's Challenge reached new heights, with the Foundation Board of Directors raising an impressive \$19,000 and emerging victorious over the AAID Board of Trustees. The combined total raised by both Boards during this year's Challenge amounted to \$32,450—more than double the amount raised in 2023! The generous contributions from both Boards will go a long way in supporting the Foundation's ongoing initiatives to advanced research, education, and charitable efforts in the field of implant dentistry.

2024 SILENT AUCTION DONORS

The AAID Foundation Annual Silent Auction is a key fundraising event supporting the Foundation's ongoing charitable programs. Held annually at the AAID Annual Conference since 1995, the Silent Auction invites AAID members to bid on products and services generously donated by individuals, corporate sponsors, and implant dentistry educators. This collaborative effort helps drive innovation in oral implantology research.

The Foundation deeply appreciates the continued support from donors and bidders who make this tradition a success year after year.
