

## ACCT CONSENSUS BODY

*The ACCT Consensus Body (The Consensus Group) is responsible for the approval of consensus standards for the challenge course, zip line, and aerial adventure industry. The standards address issues of the design and the inspection of structures, the performance characteristics of equipment, structures and systems, the responsibilities of owners and staff in the operation of a structure and the documentation and delivery of training to staff working on challenge structures.*

*The Consensus Group meets monthly to discuss the administration of its process, to consider comments about the existing standards (ANSI/ACCT 03-2019), to consider new content or respond to comments about proposed content. Meetings are open to the public. Announcements of meetings and information on joining meetings can be found on the ACCT Website  
(Revised September 29, 2022)*
