

STEM GAME DAY

Presented by ACEC Tennessee

An exciting half-day of discovery where students will explore the diverse world of engineering through the lens of a professional sports stadium

ACEC Arizona STEM Game Day 2026

Help Build the Future Workforce

Across the country, the engineering industry is facing workforce challenges as demand for professionals continues to rise. By engaging students during their formative years, Game Day hopes to strengthen the future talent pipeline by sparking interest in engineering careers.

Early exposure to engineering careers can help students:

- Understand the critical role engineers play in designing, building, and maintaining the places and systems we use every day
- Connect what they've learned in the classroom to real-world applications
- Explore rewarding career opportunities
- See themselves as future innovators and leaders

What is Game Day?

Using Erlanger Park as a living classroom, groups of students will rotate through four interactive learning stations led by local engineering professionals to see how these concepts come to life, gaining insight about the skills needed to pursue a career in engineering.

Sample Schedule

Welcome Assembly
Station Rotations
Closing Assembly
+ Lunch
