The Associated General Contractors of America's Supervisory Training Program (STP) is a construction-specific training curriculum developed, updated and field-tested by and for contractors. Supervisory skill – or the lack of it – directly affects every company's bottom line. You make your money in the field, and STP can help you improve your organization's bottom line.

STP focuses on the knowledge and skills every supervisor must have to be an effective manager of people, time, equipment and materials.

The **Communication session** presents a body of knowledge and skills that today's construction supervisors need in order to be effective communicators on their job site:

- Effective communication
- Learning to listen
- Carrying on conversations
- Persuasion, negotiation, and confrontation
- Communicating with your crew
- Putting it in writing
- Meetings that work
- Electronic communication
- Improving communication

Who should attend? Field superintendents, foremen, assistant project managers, and project managers

About the instructor – Daphene has over 15 years of construction industry experience on commercial and industrial projects. Her roles have included project manager, safety manager, construction services leader and pipefitters help.
