

CARE Quality Monitoring Program "Coaching And Reinforcing Excellence"

Name:

Introduction

The CARE Quality Monitoring Program has been established to support the contact handling and resource management functions of United Way 2-1-1 Missouri / Southwest Illinois. Ensuring the highest quality of every interaction, referral, presentation and unit of data into our systems is key to the sustained success and viability of the 2-1-1 program. In addition, the quality management function is of utmost importance to on-going employee development, coaching and performance.

In the following pages, the CARE program is divided into two sections for quality governance of the major functions of 2-1-1 that we, as employees, must execute on a daily basis – (A) Community Resource Navigators and (B) Community Partnership Coordinators. This program contains the (5) elements: Monitoring, Evaluations, Scoring, Calibration and Coaching Plans. Results of these functions will be used to determine the individual employee's and department's quality score as determined by internal leadership. Most importantly, it will provide a formal and objective method for assessing performance at regularly scheduled intervals and ensure effective coaching for above average performance of all staff members.

Finally, the CARE program sets a foundation for leadership to coach for success and for staff members to impact their performance by actively engaging together to Coach and Reinforce Excellence daily in all activities, while acting as a tool for assessing and communicating quality performance of the group.

Coaching Overview

Effective employee coaching is a two-way street. In order for coaching to be successful, both parties must be actively engaged and committed to an environment that breeds success. Coaching employees removes barriers and boundaries, emphasizing individual and team achievement as a common departmental goal. It is also designed to build personal and team morale while fostering a partnership between leadership and team members where everyone understands how they contribute to the organization. This collaboration is an investment that is of utmost importance to 2-1-1.

The CARE Program will also facilitate effective communication on all levels within the department, while providing a channel for feedback and dialogue. Every team member can learn how he/she can personally make improved efforts to support the organization. Leadership encourages and pledges effective listening, constructive feedback and recognition throughout this program at all times.

Name:

Contact Handling Overview

The Contact Monitoring Scorecard is divided into sections. The sections are designed to assess skill levels in 5 critical areas: Greeting and Building Rapport, Assessment and Clarification, Information and Referral Giving, Closing and Communication Technique. At least two (2) contacts will be reviewed and scored every month. Leadership will meet monthly with navigators to listen to and review scored contacts. Every quarter the scores will be averaged and an individual scorecard will be provided and will include comparisons to the overall team scores. Navigators are expected to achieve an 85% quality rating average each quarter. *Note: this target rating may change at the discretion of leadership in the future and will be determined annually for goal-setting purposes.*

During the review process, each Navigator will be presented with their scorecard and with the opportunity to hear the evaluated contacts. Community Resource Navigators failing to achieve the required quality score may be subject to appropriate performance management activities, including a coaching plan to help achieve the desired quality score.

Discrepancies in scoring must be made in writing (via email) by the employee to the 2-1-1 Director with a request for review. A review of the escalated results will be conducted within 5 business days of the request with a final determination made and communicated back to the employee. Any additional discrepancies will be escalated to the department Senior Vice President for review and FINAL determination (Senior Vice President level escalations must be made within 48 hours of the decision of the Director).

The 2-1-1 Director and Navigation Center Manager will meet monthly to calibrate randomly scored contacts to ensure parity in scoring approach. Only a sample of contacts will be selected and calibrated monthly.

The evaluation form and criteria are included in Appendix A.

All contacts selected on the first round will be used for evaluation. Leadership will use a randomization process to choose contacts. Contacts that are personal in nature, if recorded, will automatically be scored at a zero (0) rating. Contacts that are inappropriately disconnected will also be scored at a zero (0) rating. Contacts that reveal personal use of computer while handling a contact will also receive an auto fail.

Name:

Resource Management Overview

The Resource Review scorecard is divided into sections. The sections are designed to assess accuracy and consistency in the in three (3) key areas: Agency Data Elements; Site Data Elements; and Service Record Accuracy. Six (6) records will be reviewed per quarter. Selection will be made based on agency profiles that have received their annual update within the quarter. Individual records will be scored and a copy of the evaluation form will be provided to the Community Partnership Coordinators (CPC). These individual scores will be entered into a Quarterly QA Scorecard and averaged. Community Partnership Coordinators will receive a copy of their Quarterly QA Scorecard and a joint review of these records will take place between each Community Partnership Coordinators and his/her supervisor. Each CPC is expected to achieve a 95% quality rating each quarter (Note: this target rating may change at the discretion of leadership in the future and will be determined annually for goal-setting purposes.

During the review process, each Community Partnership Coordinator will be presented with their scorecard and with the opportunity to review their records. Community Partnership Coordinators failing to achieve the required quality score may be subject to appropriate performance management activities, including a coaching plan to help achieve the desired quality score.

Discrepancies in scoring must be made in writing (via email) by the employee to the Community Partnerships Director with a request for review. A review of the escalated results will be conducted within 5 business days of the request with a final determination made and communicated back to the employee. Any additional discrepancies will be escalated to the department Senior Vice President for review and FINAL determination (Senior Vice President level escalations must be made within 48 hours of the decision of the Community Partnerships Director).

F - Glossary

Calibration - Matching or reconciliation of a measuring device and approach to scoring amongst scorers to ensure parity and similarities of thoughts / approaches to scoring

Coaching Plan - a document that outlines skill gaps that need to be closed. It is generally an outline for improvement for someone already in a role for a significant period of time, working with them to grow their skills to expand for the future or to target certain areas of performance that require improvement.

SMART Goals – Goals that are written such that they are Specific, Measurable, Attainable, Realistic and Time-based

Quality Monitoring - Supervising activities to ensure employees are on-course and onschedule in meeting the objectives and performance targets.
