

KEYNOTES ANNOUNCED!

Tuesday Opening Keynote

Succeeding In Difficult Environments

Cassi Chandler, Motivational Leadership Expert, FBI's First African American

Female Special Agent Assistant Director

With decades of experience navigating teams to success in challenging environments as a director leading critical intelligence assignments at Bank of America and the FBI, motivational leadership and diversity expert Cassi Chandler provides sought-after insights for succeeding in difficult environments. Sharing real-life examples from her own experiences, she challenges leaders and employees to recognize how people see, hear, and react differently to stimuli in the work environment based on the ways we each encode things due to our personal perspectives.

Wednesday Morning Keynote

Trends & Forecasts for the Global Economy in the Adhesive and Sealant Industry

Chris Kuehl, Managing Director, Armada Corporate Intelligence

Patterns have started to alter pretty dramatically as regards the economy. What can we expect now? Interest rates are lower, has that affected growth or employment? What sectors of the economy are responding and how? The supply chain was the crisis last year - what about now? Did the election year alter economic policy? Dr. Chris Kuehl of Armada CI will assess where the economy is today and where it might be headed. He serves as the economic analyst for a variety of manufacturing and construction organizations.

Tuesday Afternoon Keynote & Awards Lunch

State of the Association Address & Innovation Awards Luncheon

Bill Allmond, President, Adhesive and Sealant Council

Tom Stewart, Business Director, Durable Goods, North America Building Components, Bostik

Join President Bill Allmond as he presents an update on the North America adhesive and sealant industry and recent ASC highlights and achievements. Then, ASC Chair Tom Stewart presents the recipients of the 2025 ASC Innovation Award. ASC's prestigious Innovation Award recognizes outstanding companies that differentiate and make significant impacts in the marketplace through innovation.

Wednesday Afternoon Keynote

Emerging Challenges for Adhesion and Interfaces: Nurturing a Molecules to

Manufacturing Approach to Innovation

Timothy Long, Professor, Arizona State University

This lecture will impose a lens of sustainability on the discovery of novel polymeric products and processes where adhesion and interfacial interactions define final product performance. Additive manufacturing (commonly called 3D printing) represents a rapidly emerging landscape for innovation, and adhesion and interfacial phenomena play a critical role in the ultimate performance of printed 3-dimensional objects. Photopolymerization processes now allow for the printing of high-performance adhesives including polyurethanes with programmable end-of-life (EOL), high temperature polyimide structural adhesives for transportation and aerospace technologies, and diene-based elastomers for complex form factors as sealants and gaskets.

Don't Miss the LARGEST Official Gathering of the Industry in 2025!

Annual Convention,
 EXPO and Two Technical
 Short Courses

APRIL 14-16, 2025 | JACKSONVILLE, FLORIDA

Wednesday Closing Keynote To Be Announced

The closing keynote presentation will be announced soon. If you are interested or know someone that would be a great closing keynote, please contact Malinda Armstrong, CMP at malinda.armstrong@ascouncil.org.
