Machine Learning/AI

Abrigo Connect

Actionable Banking Intelligence and Analytics

A **banking intelligence solution** that uses advanced data-driven models, including AI and natural language search, to transform data into the insights you need to make **better strategic and operational decisions.**

- ✓ Artificial Intelligence
- ✓ Natural Language Search
- ✓ Analytics & Visualizations

Interactive Session

Think of a current business challenge facing you today

People

- Are you empowered to solve the problem correctly?

Processes

- Are you confident the true systemic or root issue has been identified?

Technology

- Do you have the right systems to monitor the effectiveness of your solution?

Business Intelligence through the Lens of:

- People

- Processes

- Technology

Abrigo Connect – Power to Your People

Curated Liveboards (Intelligence Dashboards) by Role

- Chief Credit Officer
 - Risk Rating migration and trending
 - Book Balance by FICO ranges
- Chief Financial Officer:
 - Profit Margin trending and performance by industry, region, etc.
 - Peer benchmarking against above metrics
- Chief Information Officer:
 - Specific views and liveboards to analyze data accuracy and integrity
- Chief Risk Officer
 - WARR & delinquency trending and performance by industry, region, etc.
 - Peer benchmarking against above metrics

Technology for Actionable Problem Solving

Abrigo Connect to solve the systemic issue rather than the symptom

- **Problem:** We need to address credit quality issues in our loan portfolio
- *Why #1 – Why are delinquencies on the rise over the last 12 months?*
 - Because there is a high percentage of delinquencies in originations that occurred in the last 24 months
- *Why #2 – Why are a high percentage of new originations delinquent?*
 - They are primarily happening in our Energy and Fuels market, which is a growth area.
- *Why #3 – Why are there issues with our Energy and fuels market lending?*
 - There are a number of cash flow exceptions in this market.
- *Why #4 – Why are there an inordinate number of cash flow exceptions in this market segment?*
 - They relate to a new loan officer hired 10 months ago to focus on this segment
- *Why #5 – Why are these officer's loans having such a tough time paying as agreed?*
 - The loan officer is making an error in the spreading process which overestimates excess cash flow
- **Solution:** Retrain the Loan Officer and evaluate better technology for financial spreading

Abrigo Connect Demo

Connecting the Dots:

**Improving the Management Decision-Making
Process**

Harmonizing People, Process, and Technology

Connecting the Dots for Optimal Business Decision-Making

People:

- ✓ Ensuring the right people are in the right seats in your organization
- ✓ Empowering these individuals to take corrective action and pursue continuous improvement

Process:

- ✓ Establish the correct KPIs and KRIs
- ✓ Discover the underlying, rather than the immediate causes issues

Technology:

- ✓ Access to the right information
- ✓ Enriching this information to make it actionable
