Regulation Is a Verb

Cary Coglianese | University of Pennsylvania

Better Regulation: why and how

EU policies and laws adopted today will affect both citizens and businesses for generations to come. The Better Regulation agenda ensures evidence-based and transparent EU law-making based on the views of those that may be affected.

3.2. Better tools for better policies

Impact assessments, evaluations, supporting instruments (including the better regulation guidelines and toolbox) and the independent quality control provided by the Regulatory Scrutiny Board are key tools used to translate evidence and stakeholder input into objective analysis supporting political decision-making.

The public consultation and the feedback from the Commission's own staff overwhelmingly supported such evidence-based policymaking and provided generally positive views on the progress the Commission has made to improve its tools. The Regulatory Scrutiny Board's annual reports document such progress. The co-legislators, the European Court of Auditors and other EU institutions, as well as the OECD, also hold broadly positive views, as do many independent studies ²². Most of these opinions, however, also flag shortcomings and areas for improvements.
