

Promoting Respect in the Workplace Requires Collaboration and a Plan (and Professionalism is Key...)

Gerald B. Hickson, MD

Joseph C. Ross Chair in Medical Education & Administration

Professor of Pediatrics

Founding Director, Vanderbilt Center for Patient and Professional Advocacy

Beyond the New Normal – Supporting the Work of Regulatory Excellence

Financial Disclosure

- Dr. Gerald Hickson receives royalties from Cognitive Institute (Australia) from a CPPA developed Professionalism Course. Royalties are paid directly to Vanderbilt University which then distributes funds to departments/authors via internal policies.
- He is also member of the Medtronic Speaker's Bureau and a member of the RLDatix Advisory Council.

CLEAR: So, what are you collectively about?

“...Safe and competent doctors...innovation...public safety...”

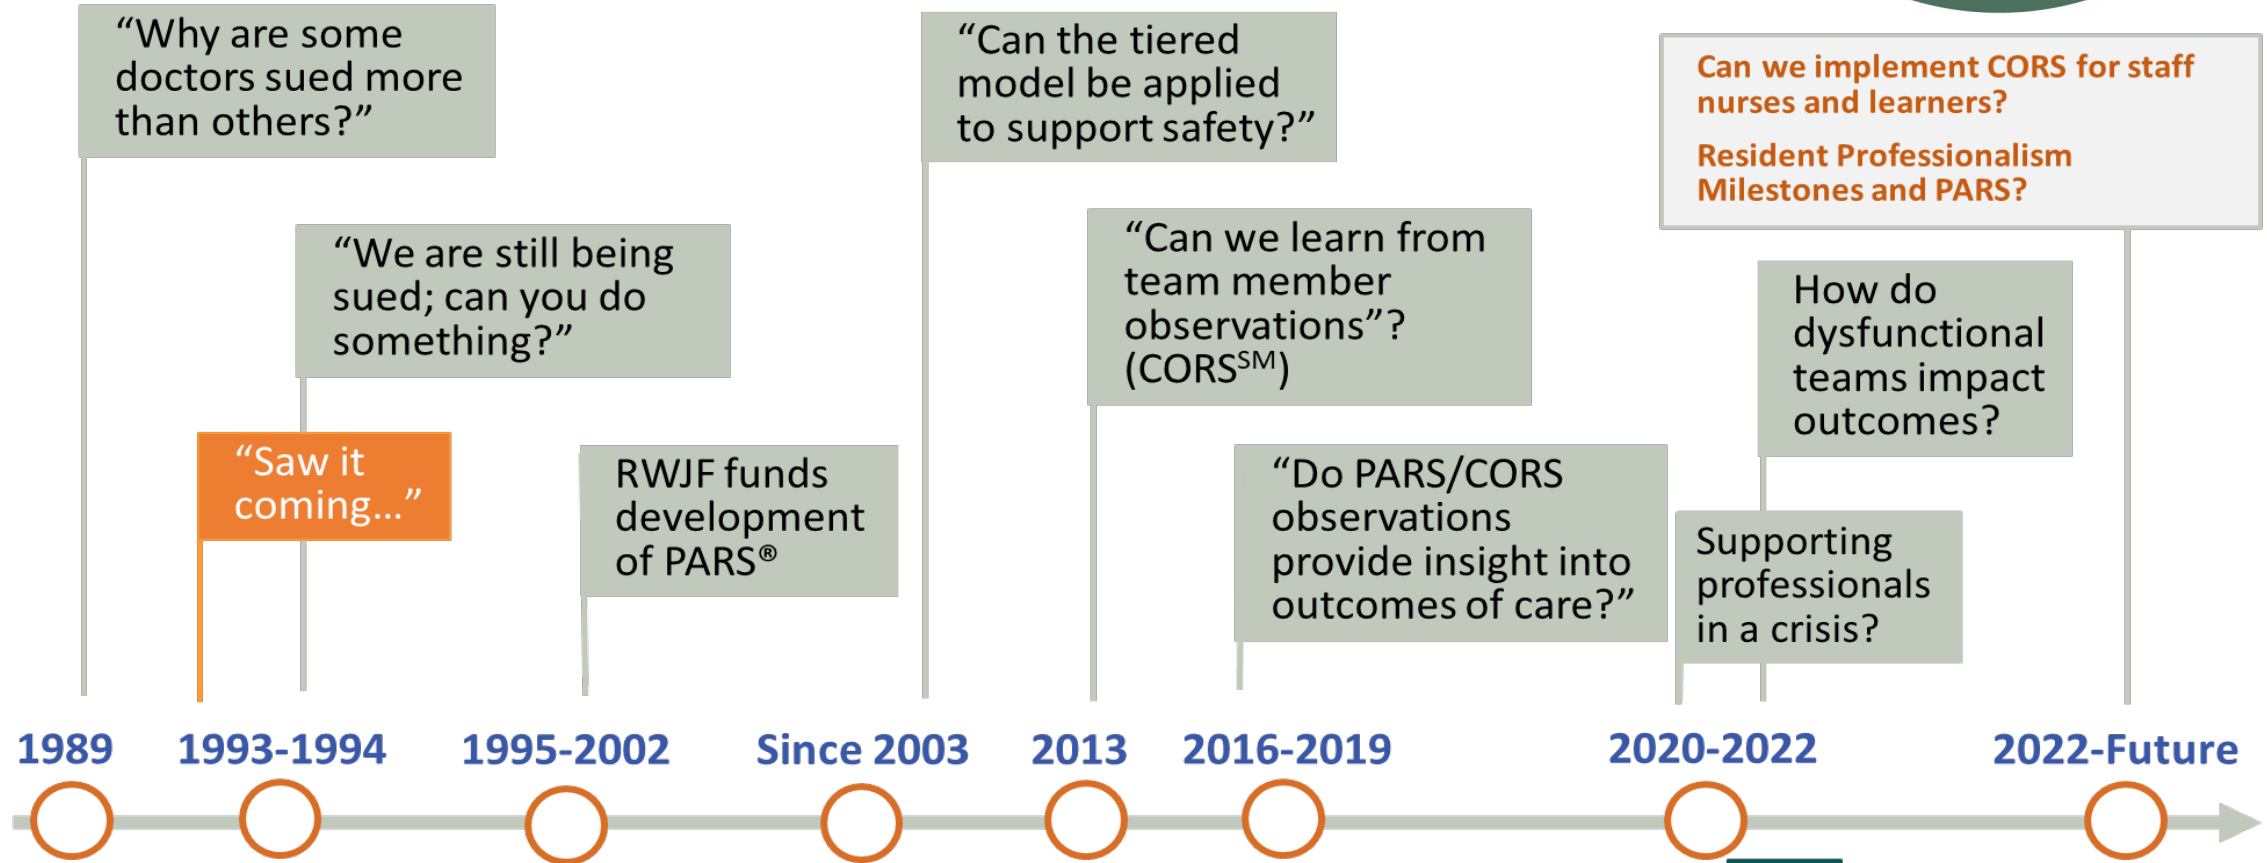

“...Safety, quality...regulatory best practices...”

“...Trust in regulated health practitioners...”

“...integrity, respect and collaboration...”

“...respect, diversity, collaboration and commitment...”

Characteristics of a
professional?

Word Cloud

Three Characteristics Define a Profession: Justice Louis Brandeis

Body of knowledge that is owned by the profession; distinguished from mere skill.

Occupation pursued largely for others; financial return not the accepted measure of success.

Obligation for self-regulation.

Case: Dr. Lilly

- Recognized expert in oncology
- A patient reports:

“I just had one last question about my medication and Dr. Lilly got very angry when I asked her...She said, ‘Look, I’m the doctor here not you’ and left.”

PARS® : Patient Advocacy Reporting System

Patient Complaints

"While asking Dr. Lilly about my diagnosis, she responded that my questions were annoying..."

"When I mentioned I was going to reach out to the patient advocate, Dr. Lilly said, 'No need, I'm the one in charge of your care.'"

"Dr. Lilly was rude. I was 7 minutes late she looked at the clock and said, 'That's 7 minutes I won't have for you.'"

Cumulative Distributions of Physicians by Patient Complaints

Case: Dr. John

- Highly productive orthopedic trauma surgeon
- A colleague reports:

“Dr. John took a personal call during the time-out. Told the team, ‘Let me know when you are ready to proceed, I don’t have time for this’.”

CORSsm: Co-worker Observation Reporting System

Co-worker Concerns

"I offered Dr. John a pair of gloves for the procedure ...responded 'No thanks,' and dropped them in the trash."

"Dr. John asked me if I hated my job because I did it so badly."

"I stated 'we needed to do the timeout before incision.' Dr. John mumbled, 'You're a bossy, cow.'"

Co-Worker
Report Distribution

Physicians who
model disrespect
account for:

50-70% of your organization's
malpractice claims experience and cost

And if you personally need care under these disrespectful physicians:

You are **20-30%**
more likely to have a
***surgical site infection**

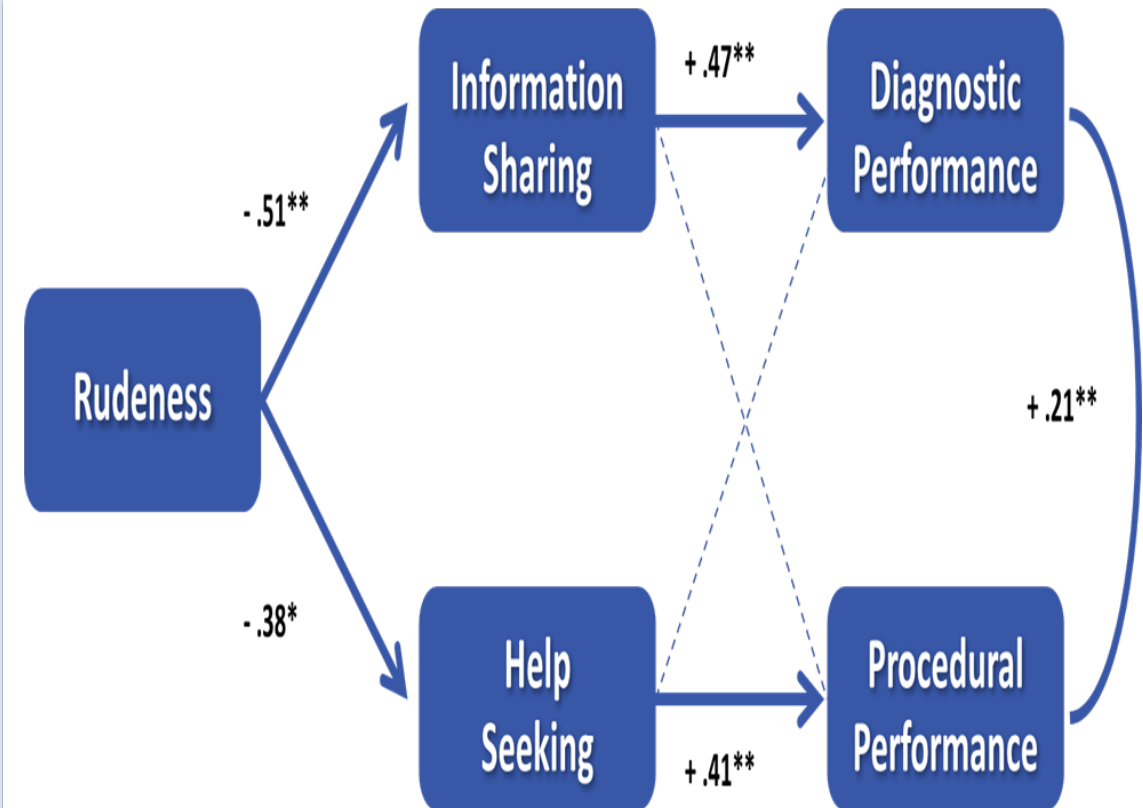

You are **20-40%**
more likely to **develop Sepsis**

You are **24-30%** more likely to
die if you require trauma care

*Includes surgical site infections, wound disruptions, and medical complications (e.g. pneumonia, embolism, stroke, MI, UTI)

The Impact of Rudeness on Individual & Team Performance

To “do something”
requires more than a commitment to
professionalism and personal courage.

It requires a plan (people, process and systems).

At a system level...and maybe beyond

Pursuit of Accountability and Reliability Requires an Infrastructure

PEOPLE

- 🔍 Committed Leadership
- 🔍 Project Champions
- 🔍 Implementation Teams

ORGANIZATION

- 🔍 Clear Goals and Values
- 🔍 Policies and Procedures
- 🔍 Sufficient Resources
- 🔍 Tiered Intervention Models

SYSTEMS

- 🔍 Tools, Data and Metrics

When should
regulators have
access...?

Multiple choice:

- a) Never
- b) Cup of Coffee Level
- c) Appearance of Pattern
- d) Authority based Intervention
- e) I'm looking at the data at the same time....
- f) Another option

Dr. Lilly continues to generate reports...

“Dr. Lilly ended our conversation saying, ‘I’m signing off and turning your care over to Dr. XX’ with no other explanation.”

“Dr. Lilly seemed to forget everything from my last visit.”

“Dr. Lilly was very absent from my appt. I would ask questions and I am not sure she understood.”

Dr. Lilly's PARS Score Over Time

- All Physicians in the PARS National Database
- All Hematology/Oncology in the PARS National Database Threshold
- - - of Assessment and Review*

About Your Risk Score

Risk Score: 78

- Ranked #2 of 1517 Hematology/Oncology
- ◆ 99% of All Physicians have lower Risk Scores

* Moore IN et al. Rethinking peer review. *Vanderbilt Law Review*. 2006 May 1;59:1175-1206.

**Stimson CJ et al. Medical malpractice claims risk in urology. *J Urol*. 2010 May;183(5):1972-1976.

Any other data...?

There are data...accessible, connected, used?

How does individual compare with practice group?

Any themes or patterns we can identify?

What legal or regulatory questions about the individual or case does this raise?

Any need for a system review?

Can Natural Language Processing Help Identify Clinicians at Special Risk? Words Linked to Cognitive Impairment

You just received another report about Dr. John...

A nurse reports: "I was in the OR prepping when all of sudden Dr. John shoved me away from the patient..."

Reports that might need investigation

Culture/Bias

- “Dr. came in and said, ‘If you report me again’...”
- “Did not use my name... but said, ‘that black woman’...”

Aggressive/Violent

- “... grabbed my ID badge...”
- “...Dr. headbutted fellow... ‘That’s a knucklehead move’...”

Boundary Issues

- “What does it for me, in addition to your hair, is that tattoo...”
- “Dr. grabbed the nurse's arm pulled her close...”

Integrity

- “Dr. looked at celebrity’s medical record...”
- “Dr. cosigns 100% of our notes, but rarely assesses...”

Impairment

- “Dr. kept forgetting the patient’s treatment plan...”
- “APN smelled like alcohol...”

2017 - 2022

Identification of Reports Requiring Investigation

"I was in the OR prepping when all of sudden Dr. John shoved me away from the patient..."

Huddle Process

CPPA PARS/CORS Huddle Procedure & Script

For Internal Use Only

Purpose

To facilitate a huddle with VUMC leadership for review of potentially egregious reports (Including behavior mandated to be investigated by law, regulation, or policy), and to coordinate appropriate next steps.

Pre-Huddle:

1. Determines if a huddle should be scheduled
2. Schedules conference call or in person meeting as soon as possible with a minimum of 3 appropriate leaders (CMO, VPMA, Human Resources, GME, Faculty Affairs, Legal Affairs, Risk Management, etc.).
3. Distributes report as a protected document:
 - Transmits un-redacted report and/or pertinent information to huddle participants securely (e.g., using encryption or password).
 - Document cites relevant law - e.g., peer review or quality improvement statute(s) - related to privilege and confidentiality.

Huddle Script:

Huddle facilitator follows the huddle script to ensure fidelity of the huddle process:

1. "Please confirm who is on the call."
2. "Did anyone not receive the report to be discussed?"
3. "The purpose of today's huddle is to assess whether report # _____ appears to warrant further investigation."
4. "Is anyone aware of any action that has already been taken on this report?"
5. "Would each person on the call provide his/her perspective on whether the report might warrant further investigation and, if so, by whom?"
6. Provides information on whether there have been previous reports for the professional involved.
7. Seeks consensus from participants on whether the report may warrant further investigation.
8. "Who else needs to be made aware of the report and/or action that needs to be taken?"
9. "Is there any concern about this clinician's ability to safely practice at this time?"
10. "Is there any concern about the clinician's well-being at this time?"
11. "Is there any concern about the reporter's well-being at this time?"
12. Summarizes the recommended actions of the group and confirms the individuals accountable for any follow up action.

Post-Huddle:

Huddle facilitator

1. Records all huddle actions and accountabilities in '911 huddle log'.
2. Forwards un-redacted report to officials evaluating the report for investigation and redacted report* to department/service line official as determined (Note: Privacy of reporter's name should be protected, except for those who are asked to review the report for further investigation).
3. Follows up with those accountable for further review of the report to document the disposition of the report and inform huddle call members of the status of the investigation.
