

## Coding Kindness: Regulatory Approaches to Technology and Compassion

Integrating technologies into regulatory processes can increase efficiency and reduce errors among myriad other benefits, but the potential risks must also be considered and addressed. As the latest technological innovation to impact regulation, Artificial Intelligence promises even greater advances to increase access and streamline workflows. It also raises additional questions about how technology impacts regulators' ability to maintain a human-centered approach in their work. Though the overall impact of AI on regulation and the professions we regulate are still up for debate – this symposium will provide space for attendees to discuss their concerns and hopes for AI and provide a launching pad for ongoing discussions across CLEAR platforms.

9:00 – 9:15 am	<b>Welcome &amp; Introductions</b>
9:15 – 10:15 am	<b>The Practitioner's Perspective – Utilizing technology to extend care through human empathy</b>
10:15 – 10:45 am	Networking Break
10:45 am – Noon	<b>Understanding Ethics, Bias, and Compassion in AI</b>
Noon – 1:00 pm	<b>Lunch (provided) and Networking</b>
1:00 – 2:00 pm	<b>Regulatory Approaches to Technology</b>
2:00 – 2:15 pm	Break
2:15 – 3:00 pm	<b>Practical Examples and Applications: A Fireside Chat with ChatGPT</b>
3:00 – 3:45 pm	<b>Roundtable Discussions – Strategies to balance technology and humanity</b>
3:45 – 4:15 pm	<b>Q&amp;A and Concluding Remarks</b>
5:00 – 6:00 pm	<b>Symposium Attendee &amp; Committee Member Reception</b>
