KEYNOTE SPEAKER

Caroline Mays, AICP

Statewide Multimodal Transit Plan (SMTP) - Explore how Texas is planning for the future of mobility with the Statewide Multimodal Transit Plan--a bold vision to build a coordinated transportation system that enhances connectivity, eases congestion, and drives economic growth through 2050. This keynote session will highlight key strategies for improving the movement of people and goods across the state.

SESSION DESCRIPTIONS

- Reimagining HOV Lanes: Driving Efficiency and Sustainability** - Discover how GoCarma is transforming commutes by leveraging HOV Lanes and technology to promote efficiency, sustainability, and smart transportation solutions.
- TDM Through Transit-Oriented Development and Parking Management** - Discover how parking management and Transit-oriented development are creating efficient, accessible, and eco-friendly mobility solutions for North Texas.
- Driving Clean Futures: Leveraging CPRG for Sustainable Mobility** - Join the City of Austin staff and Movability to unveils the transformative power of the Climate Pollution Reduction Grant (CPRG), driving innovative climate solutions, and funding initiatives that pave the way for a sustainable future.
- Full Speed Ahead: The Future of Rail Mobility Panel** - Explore how high-speed rail is transforming transportation, connecting communities, reducing emissions, and leading the charge toward a sustainable mobility future.
- Highways in the Sky: Integrating Air Taxis into Existing Transportation Networks** - From first-mile to last-mile connectivity, discover how aerial mobility can enhance urban transport, reduce congestion, and create new opportunities for smart cities. Discuss regulatory challenges, infrastructure development, and the technology driving this revolution.
- Texas Event-Based TDM** - Explore strategies for managing transportation demand during major events like the Texas State Fair and the World Cup 2026, highlighting innovative approaches to reduce congestion and enhance mobility.
