

Title: To Go Where No Shuttles Have Gone Before

Synopsis: Shuttles are popular with riders, but face constraints of funding, availability, geography, equity, and accessibility. In this webinar, several shuttle program managers describe how they used **technology** to break through these constraints and bring the benefits of shuttles to a wider rider base.

Presenters:

- Leslie Stone, WeDriveU - North Eastern University safe ride service, balancing safety and efficiency.
- Nick Pilipowskyj - Perone Robotics - Detroit City AV project, connecting the inner city with AV
- Michele Brooks, TransAction Associates, M3TMA. Sharing commute-shuttle services between four partners, with management of the capacity used by each partner, and fare collection from riders as specified by each partner.
- Chantai Pendergast, RATP-DEV, Arlington Trolley. Shuttle services that serve major sporting and music events, with fare collection and capacity management.
