

SAFETY ROUNDTABLE

Launching Fall 2026 Register by **October 15** to reserve your spot!

JOIN THE CONVERSATION ON SAFETY

The CSA Safety Roundtable is an opportunity to connect with fellow LBM professionals, share real-world experiences, and learn practical solutions to everyday safety challenges. Together, we'll identify ways to reduce risk, improve procedures and communication, strengthen safety culture, and create safer yards, warehouses, and deliveries across the industry. Bring your questions, ideas, and experiences—because the value of this roundtable comes from the people in the room.

WHAT

Peer-to-peer roundtable comprised of 10-12 professionals from multiple LBM companies; 1 in-person 2-day meeting and 2 virtual sessions per year.

WHO

Built for safety and operations leaders, including Safety Managers, Fleet Supervisors, Owners, Yard & Warehouse Managers, and Leadership Teams.

WHEN

The Safety Roundtable is planned to kick off with a virtual meeting in early November, followed by an in-person gathering in early 2027 as the group grows and collaborates.

COST

The annual fee for the CSA Safety Roundtable is \$850 per company. Additional costs for in-person meetings, including facilities, meals, speakers, and travel, will be shared equally among participating companies. Members are responsible for their own travel expenses, and CSA will work to keep all costs reasonable.

Real Challenges. Practical Solutions. Stronger Safety Culture.

The CSA Safety Roundtable is an interactive discussion designed for safety, yard, warehouse, delivery, and leadership teams in the lumber and building materials industry. Rather than a formal presentation, this roundtable creates an opportunity for members to openly discuss real-world safety challenges, review recent incidents and near misses, and share practical ideas for improving safety in daily operations.

Join the CSA Safety Roundtable!
