

Axine Water Technologies

www.axinewater.com

On-site industrial contaminant treatment solutions

Change Chemistry Forum,
14 November 2023

Louis LeBrun, VP of Sales,
llebrun@axinewater.com

Axine has extensive experience in **advancing our technology and commercially treating wastewater**

Leader in Electrochemical Oxidation

>10 years research & development. Headquartered in Vancouver, British Columbia with employees in the United States.

Extensive IP Portfolio

57 issued patents covering all aspects of electrochemical wastewater treatment, all exclusively owned by Axine.

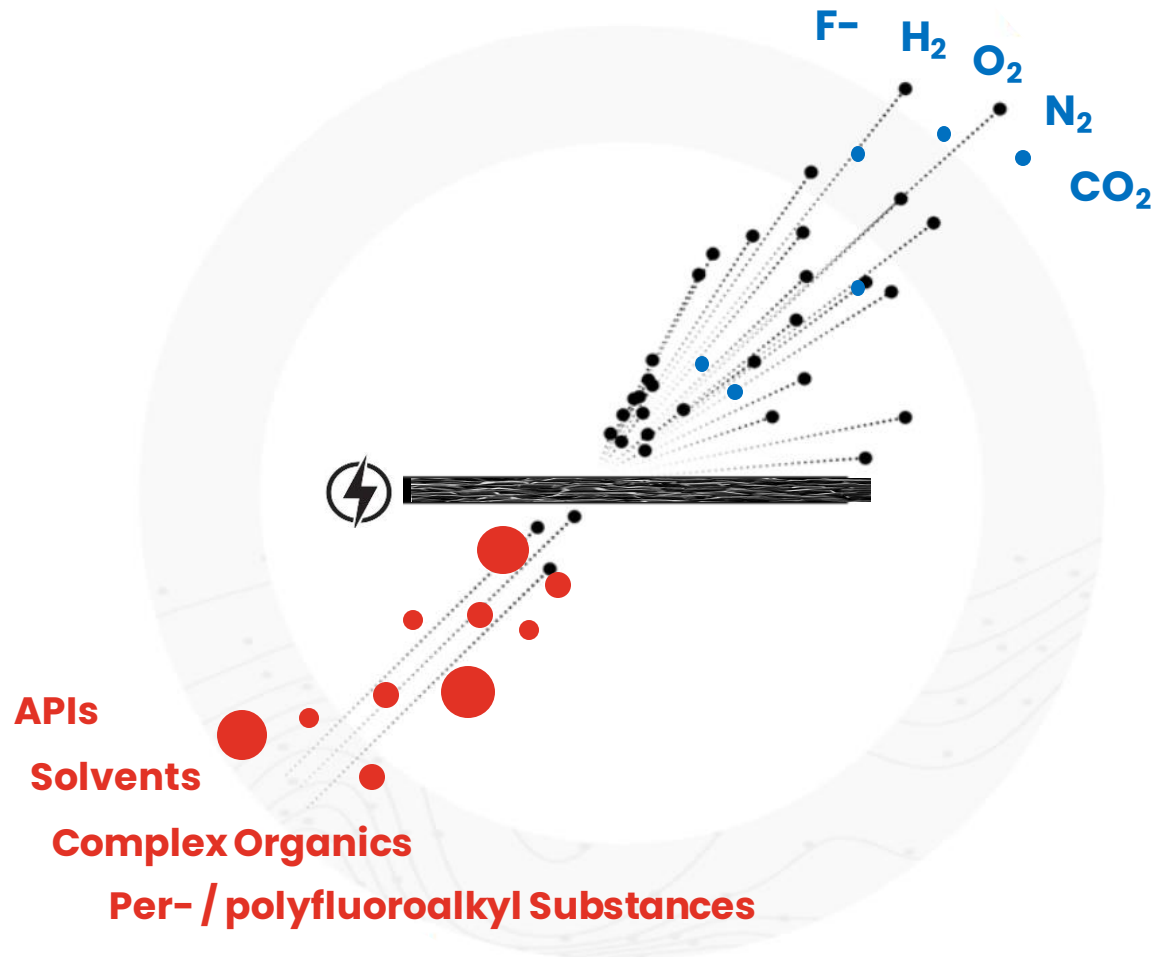

Guaranteed Treatment-as-a-Service

Complete turn-key systems delivered via our Treatment-as-a-Service model guarantees our customers will meet their discharge objectives.

130,000+ hrs. Commercial Run-time

Five commercial installations at Fortune 100 client sites throughout the North America

Axine's proprietary **electrochemical oxidation** technology completely **mineralizes** toxic contaminants

Electricity is applied to advanced catalysts to trigger **direct and indirect oxidation**.

Enables non-selective oxidation of the most **difficult-to-treat contaminants**.

No solid or liquid waste end-products.

Operates at ambient conditions making it **simple and safe to design, install, and operate**

Thank You!
