

# DIECUTTING & DIEMAKING 101 WORKSHOP

Explore the career possibilities in the diecutting and diemaking industry. Ideal for students with a mechanical background.

## What to Expect:

### Hands-On Application

Rubber a die, put rule in a dieboard and more!

### In-Plant Experience

Visit a shop and see the equipment and set-up.

### Real Life Solutions

Watch a live demo of a job being run on press.

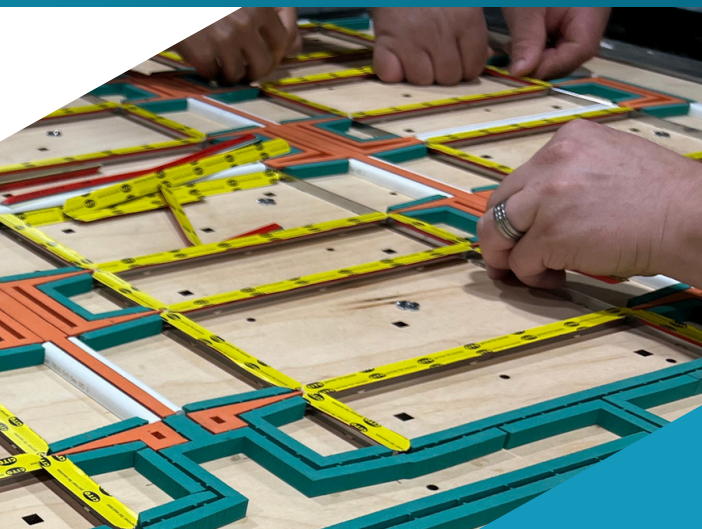

### Expert Insights

Learn from industry experts and meet others in the workforce.

## Workshop Outline:

Our workshop is ideal for entry level positions in diecutting and diemaking and students with a mechanical background. Below is an outline of what topics are covered:

- The Cutting Die
- The Makeready Process
- Creasing Matrix, Phenolic Counters & Steel Counters
- Diecutter Demonstration
- Troubleshooting / Do's and Don'ts / Q&A

## Who we are:

International Association of Diecutting and Diemaking (IADD) is a not-for-profit trade association. Our association serves diecutters, diemakers and industry suppliers. Some of the products produced by our members are:

- ✓ Corrugated boxes
- ✓ Gaskets for engines
- ✓ Food packaging
- ✓ Toys, games, puzzles
