

The 2023 REACH Challenge is now open!

Learn more and register today at www.iteea.org/reach

Registration Deadline: Friday, November 17, 2023

Submission Deadline: Friday, December 15, 2023

How Does REACH Challenge Work?

REACH Challenge is an impactful Adaptive and Assistive Technology design thinking project for middle school, high school, and college STEM programs, showcasing ITEEA's mission that "Technology and Engineering Bring STEM to Life!" Teachers are provided a Toolkit of curriculum and resources to lead their students to create a viable adaptive or assistive technological solution to help someone in their community. Projects can then be submitted to ITEEA for an opportunity to earn awards and funding for their STEM program!

What's In the Educators Toolkit?

Registration for REACH Challenge includes instant access to innovative lessons on Adaptive & Assistive Technology, User-Centered Design, Empathy, Safety, Prototyping, Intellectual Property, and more as part of the Educators Toolkit. These downloadable resources include ready-made lesson plans, videos, slide presentations, worksheets, hands-on activities, discussion prompts, and inspiring explorations aligned with STEL and NGSS standards.
