

ASYNCHRONOUS MICROBADGE COURSES

To support educators in elevating their teaching practice, the International Technology and Engineering Educators Association (ITEEA) offers two dynamic microbadge courses designed specifically for Technology, Engineering, and STEM professionals. These self-paced, 10-hour asynchronous courses provide practical, research-based strategies that educators can immediately apply in their classrooms.

Ready to skill up and stand out? Register now to begin your journey toward becoming a more effective and inclusive Technology, Engineering, and STEM educator. Be sure to use promo code "SkillUp10" at checkout to receive \$10 off each course (expires August 1, 2026). Your path to professional growth has never been more accessible!

Equip educators with the knowledge and strategies needed to create and sustain safe learning environments in technology, engineering, and STEM labs, shops, and makerspaces. This course addresses legal responsibilities, best practices, and the development of a research-based safety plan.

Lab Safety byDesign

STEM Teaching Methods byDesign

Unlock the potential of your STEM classroom with our STEM Teaching Methods byDesign microbadge course! This course is designed to equip educators with innovative strategies and practical tools to enhance STEM education.

This course provides educators with practical strategies for creating inclusive learning environments that value and respect student differences. It supports the growth and enhancement of Technology, Engineering, and STEM classrooms.

Cultural Competency byDesign

This course provides educators with the insights and strategies needed to leverage evaluation as a core pedagogical strategy to enhance student design thinking. It is designed to help Technology, Engineering, and STEM educators transform how students navigate uncertainty and improve their problem-solving outcomes.
