

AUTODESK FUSION FUNDAMENTALS FOR EDUCATORS

Bring professional CAD into your classroom with confidence. This hands-on workshop is engineered specifically for educators to build a working foundation in Autodesk Fusion while mastering the pedagogy needed to teach it effectively.

Virtual Workshop

Live Online Dates/Times: Tuesday, September 15; 6–8pm EDT
Thursday, September 17; 6–8pm EDT
Tuesday, September 21; 6–8pm EDT

Presented by: CADclass in partnership with ITEEA

Format: 12 Total Hours (6 Live Online + 6 On-Demand)

Credential: Official Autodesk Certificate of Completion

Prerequisites: No prior Fusion or CAD experience required

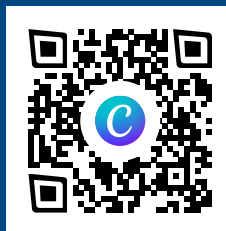

What to Bring: A laptop, an external mouse (highly recommended, and your curiosity)

What We Will Cover:

- **Core CAD Foundations:** Master sketching, geometric constraints, and parametric part modeling.
- **Assemblies:** Learn how to design, constrain, and manage multi-component assemblies.
- **The Educator's Playbook:** Get proven curriculum sequencing strategies, learn how to bypass common student sticking points, and master quick troubleshooting hacks.

Exclusive Bonus Included:

Registration includes free, lifetime access to the [CADclass](#) comprehensive companion course, [Autodesk Fusion Fundamentals for Educators](#) (a \$149 value), giving you an asynchronous curriculum tool to support you this year and beyond.

Register before the September 17 deadline by scanning the QR code or visiting:
