NEW

Enroll in ITEEA's NEW Self-Paced Course to Get Trained in Onshape at Your Convenience!
Onshape Certification byDesign Asynchronous

ITEEA's STEM Center for Teaching and Learning is proud to announce a brand-new Onshape Certification byDesign Asynchronous Course. This course helps educators teach the Onshape curriculum and integrate it into their classrooms through hands-on experience. Participants complete the course as students, preparing for the Onshape Certified Associate Exam.

The self-paced course includes three units with five learning cycles and two challenges. Educators use Onshape and ITEEA's Buzz learning management system to complete activities and submit a portfolio for review to receive a certificate of completion. This course is ideal for educators wanting to use Onshape in their classrooms, teach it to students, learn about the Certified Associates Exam, or become Associate Certified. It can be started anytime and completed in about 40 hours at your convenience.

Register now to be better prepared to teach Onshape to your students, develop new professional skills of your own, obtain your Onshape Associate certification, earn professional learning hours, and/or qualify to claim graduate credits. Specific benefits of this course include:
- Enhance your skills to teach and use Onshape in the classroom.
- A Certificate of Completion with 40 professional learning hours.
- Earn three (3) graduate credits through St. Cloud State University.*
- Receive a free voucher for the Onshape Certified Associate Exam ($50 value).

Register any time! You will be enrolled in the course within 2 business days of receipt of payment.

$499 for ITEEA Members | $649 for Non-members

"As an educator of Design and Manufacturing curriculum areas, computer-aided design (CAD) is a huge component of my teaching. Our online teaching year drove me to change our platform to Onshape. After seeing the joys of collaboration through building 3D models, I knew Onshape was going to become my forever platform for CAD. The Onshape Certification byDesign Online Course has provided me with the tools to take my basic self-taught knowledge of the program and become a more proficient educator. The training team heightened the experience with their wisdom and provided support that helped me realize that receiving the certification was not out of reach. The flow of the class builds nicely, as it increases complexity using real-life design models. Today, I am a National Teacher Effectiveness Coach, who begins her day by using Onshape to drive all my students into these authentic CAD-enriched experiences and for many with a future in CAD-based Careers."
