

2026 Candidate Survey

Candidate Name: Cameron Reny

Office Running For: State Senate

District: 13

Campaign Website: www.teamreny.com

Please describe your personal and professional experience with nonprofit organizations

I've served two terms in the Maine State Legislature and, during that time, worked closely with several nonprofit organizations for subject matter expertise. In the last legislative session, I received perfect mission-alignment scorecards for my voting record from Maine Conservation Voters, Maine AFL-CIO, Maine Women's Lobby, Planned Parenthood Maine Action Fund PAC, Maine Recovery Advocacy Project, and EqualityMaine. In 2026, I have already received endorsements from many tax-exempt organizations, including Maine AFL-CIO, Sierra Club, Maine Service Employees Association SEIU Local 1989, Planned Parenthood Maine Action Fund PAC, Maine Conservation Voters Action Fund, Committee to Protect Health Care, EqualityMaine PAC, and The Wabanaki Alliance.

I've been personally and, as a public school counselor, professionally impacted by so many nonprofits supporting local communities and families with much-needed resources. I've seen first-hand how these organizations provide critical services and supports across the state of Maine—especially filling the emergent gaps created by changing federal resources and policies. I'm committed to finding solutions to address these stressors at the state level, but nonprofits act nimbly to provide emergency resources that can literally be the difference between an empty dinner table and a full one.

MANP does not endorse candidates or promote or endorse any political party. MANP's goal is to educate nonprofits and legal and effective advocacy and election season activity, to educate candidates about the impact and potential of the nonprofit sector, and to educate voters by soliciting information directly from candidates on how they would strengthen and partner with the sector if elected.

Please describe your top three policy goals.

All people should have access to the healthcare they need and Mainers should never have to choose between life-saving care and paying the bills. Climate change is a quality of life and economic issue, so we must act on climate science to protect our heritage industries and the future of our communities. The economy improves when regular people have buying power, so we need solutions that help everyone access better jobs that pay living wages and affordable housing, childcare, and utilities.

Please provide specific ways in which, if elected, you would partner with the nonprofit sector to achieve the goals of your campaign.

Like in my first two terms, I will continue to work closely with nonprofit organizations for subject matter expertise, especially when considering policies that will impact stakeholders of their organizations. I prioritize issues that are important to my district based on things I hear directly from constituents and pay close attention to the ways that decisions will impact my district. Nonprofit organizations are excellent sources for this feedback on current needs and potential solutions, since they can provide a unified voice for the people most impacted by their respective missions.
