

Cybersecurity in the Water Sector Workshop

Agenda

EGL E course#2786, 0.3 DW Managerial CECs approved, WW CECs applied for and pending approval

The water sector has been the subject of increased targeting by cyber threat actors for monetary gain and comprising continuity of operations. This reality requires proactive measures to mitigate vulnerabilities and develop incident response capabilities by all types of water utilities. Cyber threats do not discriminate by utility size or type. This workshop is designed to empower utility owner/operators to understand the threat, assess vulnerabilities, leverage tools to mitigate risks and prepare to respond.

May 15, 2024

8:45 am – 9:00 am	Check In
9:00 am – 11:00 am <i>(includes 15 min break)</i>	Awareness - Why is Cybersecurity Important? Preparing for 2 nd round of AWIA Compliance Threat landscape & targeting of water systems
