COMPETITIONS HALTED

Kelly Gleason, Editor

Welcome to the spring issue of *Michigan Water Works News*! It's beginning to warm up and we can emerge from cold winter hibernations.

It has been a low-key couple of months for me. The Joint Expo & Operators Day was held virtually, as most trainings have been and will be for the time being. There is a recap on page 21. Without an in-person event, the competitions have been halted and the last competitions were held at Joint Expo & Operators Day 2020. As you all know by now, Pipe Tapping is my favorite

event and my team is chompin' at the bit to get back at it... Okay, we just really miss the camaraderie, not the practice. Rumor has it the plan is to be back at competitions in 2022 – fingers crossed!

All the competition participants put in a lot of time and energy in hopes of dominating their sport. It takes a lot of dedication to master these domains. In hopes of honoring the hard work they do to represent the Michigan Section, I put together a little something to feature our participants. Check out page 16 for a trip down memory lane.

As always, I would love to hear about what you have been up to in the water world. You can send pictures, stories, and updates to kelly.gleason@lbwl.com with the subject line *Water Works News* or through the MI-AWWA website at www.mi-water.org/page/www.

ELEVATING THE ISSUE OF WATER AFFORDABILITY

Jaime Fleming, Chair

Water Affordability. What do you think of when you hear that phrase?

If I ask a number of different people that question, I am likely to get as many different answers. To some, it is about how we pay for treatment and distribution of water. Some will say it is about assistance programs for people experiencing economic stress or income inadequacy. And others center the conversation around human rights.

None of these answers is wrong, but none of them are singularly right, either. In order to build equitable and sustainable solutions and policies for water affordability, we must engage a diversity of voices and viewpoints.

There are a number of groups addressing water affordability on different fronts – legislation, academic research, human services, asset management, environmental justice, payment assistance, rate setting, funding programs – but often these groups are working in parallel to one another. Sometimes, it can even feel like they are working in opposition.

Ideally, these would be efforts made in partnership with one another. Through our strategic discussions, the Section's board agreed MI-AWWA has an important role in facilitating the broad conversation about water affordability. Over the coming months, we will be elevating water affordability as a priority issue.

The hope is to identify strategic partners to convene for a facilitated discussion with the goals of creating a shared understanding of the definition of water affordability, key areas of focus, and measurements of success. We will also be reaching out to our Section members for your input.

I encourage you to think about two questions:

- *What does water affordability mean to you?*
- *What elements are most important in building an affordability strategy?*

If you would like to share your thoughts with me, I would be happy to hear them. You can reach out to me through chair@mi-water.org. 💧

“IN ORDER TO BUILD EQUITABLE AND SUSTAINABLE SOLUTIONS AND POLICIES FOR WATER AFFORDABILITY, WE MUST ENGAGE A DIVERSITY OF VOICES AND VIEWPOINTS.”

DIXON ENGINEERING, INC.
Engineering and Inspection Services for the Coating Industry

The Midwest's Tank Inspection Leader

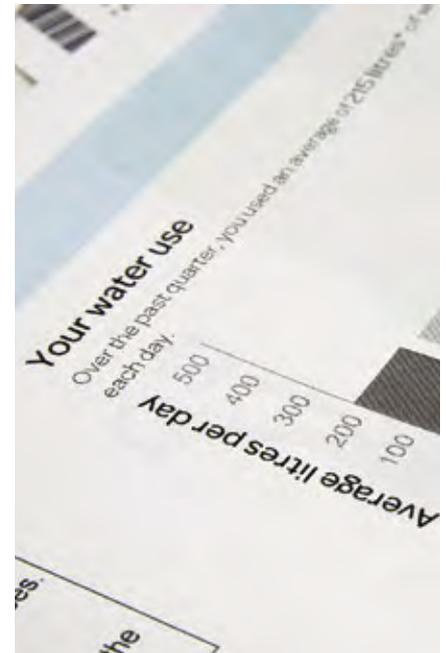

Since 1981, Dixon Engineering has been recognized as a leader in the storage tank and coating inspection industry. Our clientele consists of industrial, municipal, state, and federal clients; Dixon has experience with virtually any type of potable water storage tank and coating systems. For cost effective solutions to your storage and coating maintenance needs - specify Dixon Engineering. Let our expertise help you preserve the value of your facilities.

MICHIGAN ON THE NATIONAL AWWA STAGE

Pat Staskiewicz, Director

The AWWA Board of Directors held the winter board meeting on Tuesday, January 26, and I have included some highlights from the meeting below.

The Board held elections to select six new officers. Dr. Joseph G. Jacangelo, Vice President, from Stantec's Washington, DC, office will serve as the Association's next President-Elect. Joe has been an active AWWA member for 37 years, having served on numerous committees and most recently as Chair of the International Council from 2017-2021, which coincided with his term on the AWWA Board of Directors and the Executive Committee. He has over 30 years of experience in the field of environmental health engineering and has specialized in the areas of water quality and treatment, water and wastewater disinfection, membrane technology, water reuse, and public health. Joe will begin his term as President Elect at AWWA's ACE21 All Virtual gavel passing on June 17, as will the other new officers.

Four Vice Presidents were elected to the board.

Angela Ballard-Landers is the Director from the Chesapeake Section and is the STEAM Coordinator for the Washington Suburban Sanitary Commission.

Randy Black is the Director from the Pacific Northwest Section and is the General Manager of the Lakewood Water District.

Heather Collins is the Director for the California-Nevada Section and is the Water Treatment Section Manager for the Metropolitan Water District of Southern California.

The final Vice President is our very own Cheryl Porter! Cheryl is serving as the Director-at-Large and is the Chief

"CHERYL HAS BEEN VERY ACTIVE WITH THE ASSOCIATION, SERVING ON THE FINANCE COMMITTEE AND HELPING WITH THE RECENTLY ADOPTED STRATEGIC PLAN."

Operating Officer for the Great Lakes Water Authority. Cheryl has been very active with the Association, serving on the Finance Committee and helping with the recently adopted strategic plan. Cheryl will be a great addition to the Executive Committee. Congratulations Cheryl!!!

The new Director-at-Large is Ari Copeland, who works as an Operations Specialist for Black & Veatch. Ari was active in the Florida Section, but has been a member of several Sections.

I am pleased to announce one of our Michigan Section members was honored by the Board with an award. Brian Steglitz, PE, F. ASCE, Water Treatment Manager, City of Ann Arbor, was presented with the Honorary Member Award. This award is presented to individuals whose knowledge and accomplishments in the field of water supply entitle him to special recognition. An Honorary Member shall have all

the rights and privileges of an Active Member and shall be exempt from paying dues. Please join me in extending congratulations to Brian!

AWWA remains financially healthy and we hope to be back above 50,000 members in 2021. We will have a strong focus this year on increasing the public's trust in their tap water. The new Lead Copper Rule, PFAS, and cybersecurity will be among the areas of concentration in water policy in 2021.

We are hopeful that ACE22 in San Antonio, TX, will provide an opportunity for us to safely gather in person again. Until then, AWWA continues to offer great opportunities for 'virtually' everything from virtual summits, webinars, DC Fly-In, ACE 21 All Virtual, and more. If you have any questions on how to tap into these resources, please give me a call. 💧

YOUR PROFESSIONAL DEVELOPMENT MEANS SAFE WATER

Bonnifer Ballard, Executive director

Look at all we have experienced over the last year. We continue to live through a global pandemic. We have seen indictments because of the Flint water crisis. We have all had to learn how to work remotely or use new technology to parent as well as do our jobs. All the while, clean, safe water continued to flow.

This is possible because of dedicated individuals like you. And although sometimes we seek professional development because we have to in order to maintain a professional license, that professional development directly translates to an increased likelihood you will have the skills and judgment to keep clean, safe water flowing.

When you go to a cross connections class or listen to a webinar on pH testing or take a refresher on advanced water treatment calculations, yes, you typically earn continuing education credit. But you also

are ensuring that you have the knowledge and skills needed to treat and deliver water to your communities. Think about your professional development for the year, or even for the next couple years. Maybe you're thinking about sitting for a higher-level exam. What classes will you need to take to prepare? No matter what classes you take,

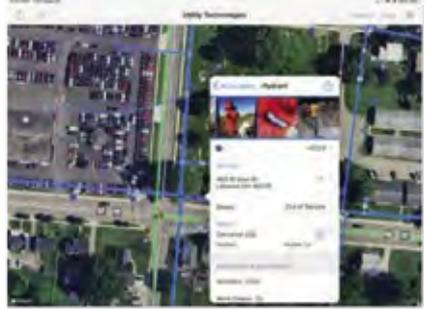

they will be an important investment in your future but also an investment in the safety of your community's water.

So, thank you for your dedication throughout the pandemic and beyond. You are the unsung heroes of your communities, doing an often-thankless job. You are water champions. 💧

PIECES FROM THE PAST

A CITY WATER SUPPLY IN 1896

The following article is an editorial taken from the St. Joseph Herald in 1896, recounting the history of the St. Joseph, MI, water supply from the manual collection of river water to a town pump and finally a Lake Michigan intake in 1892. It should be pointed out the town pump, in addition to being very shallow, was located close to the St. Joseph River with no treatment of any kind. The photograph was taken of the 1892 steam powered pumping station, which was replaced by a full treatment plant in 1931. The 1931 plant was decommissioned in 2020 with the SCIP (Strategic Capital Improvement Plan) Phase 1 improvements.

There was a time when the residents of St. Joseph drank nothing but water, but that was several years before the silver question became an issue and is but a dim recollection in the minds of even the clearest headed members of our present populace.

There was a time when the residents of St. Joseph took turns carrying the gourd to the river and bringing it back full of sparkling water to quench their thirst and to use in the cooking of slap jacks or the brewing of family medicines. But that was a long time before Mayor Starr became a popocrat or before the town learned to know what a genuine comfort a mayor was. It was in the days that the hardy swain yanked the milk from the festive goat and the housewife cooked the same into delicious corn bread.

Well, the town grew, and a generation or two after, the carrying of the gourd to the river ceased to be an anticipated pleasure and it was decided by common consent of all the people to have a town pump. The well was

dug and the town took a holiday and put in the pump. The pump was made after a special order, complied, signed, sealed, and delivered by a committee of 10 trusted citizens.

The pump was a mammoth affair and began coming from the factory two months before the last piece arrived. It had laid corded up in back of the town hall until all of its numerous parts arrived,

then the various parts were put together and as we have mentioned, the town took a day off and put in the pump. There were speeches by some of the leading lights of the town and singing of patriotic songs by the entire assemblage.

Then there was a scramble to get the first glass of water. A deacon of the Methodist church, the only man in town who could swear under his breath, and

an able body of assistants reverently grasped the handle of the pump – and pumped. The man who by dint of muscle got the cup for the first drink, gulped down a pint of fluid which was a delightful mixture of oil, sand, grease, and earth gas, went home and was sick seven months with a delirium fever.

But after judicious legislation and the death of a few brave souls, confidence was restored and the policy of town pumpism grew steadily in public favor. A few public spirited citizens and leaders of fashion took to drinking pump water and the infant enterprise did business 24 hours a day and a side door business every Sunday.

The pump was located right at the present corner of State and Ship streets and was the cause of constant anxiety to the town authorities. It was constantly getting out of repair and there were only two men in town who could fix it. They were Joe Hagar and Joe Hone.

The old pump with its 40 feet of pipe used to be hauled out onto dry land about three times a week on the average and it came about that in later years the first item in the annual appropriation bill

“THE MOST NAUSEATING LIQUID EVER CAME OUT OF THE GROUND WAS BROUGHT TO LIGHT BY THAT PUMP ... ONE MAN TRIED IT FOR CONSUMPTION. IT FIXED THE CONSUMPTION ALL RIGHT, FOR THE MAN DIED. THEN THE PUMP EXPERTS TOOK UP THE MACHINE AND FOUND THAT A RAT HAD CRAWLED INTO THE PIPE AND DIED.”

of the town board would be, ‘Repairs on the town pump. \$1,797.46.’ But one day something happened that changed all this, and those readers who remember the occurrence will vouch for our veracity. The pump one morning began giving mineral water.

The most nauseating liquid ever came out of the ground was brought to light by that pump. But some men about town who had tasted mineral water said that this was thus and so it went out that we had an overflowing well of fine mineral water. Its healing propensities were great. One man tried it for consumption. It fixed the consumption

all right, for the man died. Then the pump experts took up the machine and found that a rat had crawled into the pipe and died.

There was only one thing to do then and that was to have a water works. It was put to a vote and an overwhelming majority said that it should be built. I.W. Newcomer did a good job building the waterworks and today it stands as one of the most complete systems in Michigan. The water has been carefully tested and it would be difficult to get a purer liquid. It is taken a sufficient distance out in the lake to keep it pure and fresh. 💧

The best system ever just got better.

Now with pressure and temperature reporting!

Badger Meter has done it again. No other system gives you more tools and information to help you run your water distribution system than Beacon AMA. Field proven, highly advanced, yet simple to use. The LTE-M cellular endpoints connect to most meters with encoder registers. The data goes through cell towers and into the secured cloud-based Software. Every feature and option is at your fingertips including 15 minute read intervals, high usage, no usage, meter removed alert, freeze warning and even remote flow control. Overlapping graphs display temperature and line pressure. The EyeOnWater App is free to your residents and allows them to monitor their usage anytime, or set up alerts from a smart phone or PC.

To see why Beacon is the best system ever visit www.slcmeter.com or contact us for a free demonstration.

Focus Areas and Strategic Goals

Professional Development

MI-AWWA will offer state-of-the-art and highly relevant learning experiences.

- Fully develop and launch the Michigan Water Academy®
- Acquire a learning management technology that supports member professional development
- Incorporate diversity training into our learning experiences

Public Trust

MI-AWWA will be a respected source of information about water in Michigan.

- Promote the value of water
- Provide tools for members to promote the value of water
- Educate water customers about the water sector

Advocacy

MI-AWWA will advocate for state and local policies that allow water supplies to effectively manage water.

- Continue to build MI-AWWA's recognition among state legislators as

a resource on water policy and water-related information

- Become a resource for local governments on water policy and water-related information
- Plan and conduct a Members' Advocacy Day annually

Innovation

MI-AWWA will create a culture of innovation within Michigan's water sector.

- Develop and host a forum for sharing innovative ideas among members
- Highlight innovation in member events and communication
- Create incentives to advance innovation in the Michigan water sector

Workforce

MI-AWWA will promote the water profession.

- Develop and provide tools to help members attract new and diverse employees
- Develop partnerships that can help to advance the water sector as a career path

Funding

MI-AWWA will promote solutions for adequately funding water supplies.

- Advocate practices utility members can implement to be financially sustainable while being affordable to customers
- Promote customer affordability solutions
- Advocate for infrastructure funding

Operations

MI-AWWA will maintain a high level of customer service to its members.

- Maintain and grow membership over all membership categories
- Effectively manage resources to encourage growth of the Section's activities
- Pursue new methods of hosting events to protect attendee health

Virtual Operators Day Recap

Operators Day went virtual this year. Nearly 600 water and wastewater professionals dialed in over the two days in February to hear an update on MISS DIG, be reminded about safety protocols, and see how one scientist is tracking COVID-19 and other viruses through sewer systems and what the implications are for the water cycle. Did you miss the live sessions? Both days of presentations were recorded and are now available ON DEMAND. Link to register at www.mi-wea.org/operators_day.

Despite not being able to gather for the traditional Joint Expo Mixer, a few dozen people gathered virtually after Tuesday's sessions for a virtual scavenger hunt. Although it was BYOB, there were still door prizes and lots of fun and laughs.

We all look forward to returning to the Lansing Center for Joint Expo & Operators Day in February 2022. Save the date: Tuesday, February 8, and Wednesday, February 9, 2022!

Thank you to the sponsors of virtual Operators Day! We are grateful for your continued support through these difficult times. 💧

Best Tasting Water in Michigan 2021:

A Return to Normalcy... Sort Of

By Aaron Davenport

Allow me to get started by plagiarizing from my summer issue article from 2020: First and foremost, I hope this finds you, your family, friends, and coworkers healthy and safe. You see, it was about 10 months ago that I sat at my kitchen table, like I am now, writing an article explaining how we were not going to be business as usual for the Taste-Off in 2020. See, at that point the state was under shelter in place orders and spring regionals had been transitioned to virtual. Everyone I talked to thought that by fall we would be past this pesky pandemic and we would be going forward with a delayed competition schedule. I never would have guessed that nearly a year later we would be only marginally surer of our outlook. But vaccines are out – scarce, but out – and it feels like we are getting closer to normalcy, whatever that is, every day.

Now, I tend to wax poetic about these things, but the Taste-Off really is kind of an important symbol for normal life, like going to a restaurant or a ball game. You see, every spring we sit shoulder to shoulder drinking water and comparing notes on whose chlorine residual is a bit high (who has a hint of sulfur) and whose water you wish you could copy. No masks, no fear. It is camaraderie, competition, friendly rivalries, and a shot at a shining moment that says: if only briefly, that all the work is worth it – you are the best.

That brings us to the present. I am excited to announce, and look forward to administering, the 2021 Best Tasting Water in Michigan Taste-Off. The current plan is to hold the Regional competition at the Fall Regional Meetings. The State competition will be held at the 2022 Joint Expo. We are marginally confident these events will be able to proceed in person. So, make sure you dust off your mason jar, clean the plant tap, and start refining your secret recipe in preparation for 2021 Fall Regional Meetings. We will get back to our normal schedule in 2022 with the Regional Competition at the Spring Meetings and the State Competition at MI-ACE.

One nice thing to come from this is that our current champion, the City of Lowell, has had an unusually long tenure as State Champ. At MI-ACE, way back in September 2019, Lowell survived two rounds of sudden-death style taste off after a three-way tie during the first round. It was the closest competition anyone could remember and the first time that two rounds of 'playoffs' were needed to determine the champ.

While we are thinking fondly about our current champ, let us not forget to remember proudly all of our past winners. They, like you, have done their communities proud and made the world a safer, healthier, and more delicious place. Cheers! 💧

“Make sure you dust off your mason jar, clean the plant tap, and start refining your secret recipe in preparation for 2021 Fall Regional Meetings.”

WHAT EVERY OPERATOR MUST KNOW

COMPREHENDING WATER CONTAMINANTS

By Sanjeev Mungarwadi

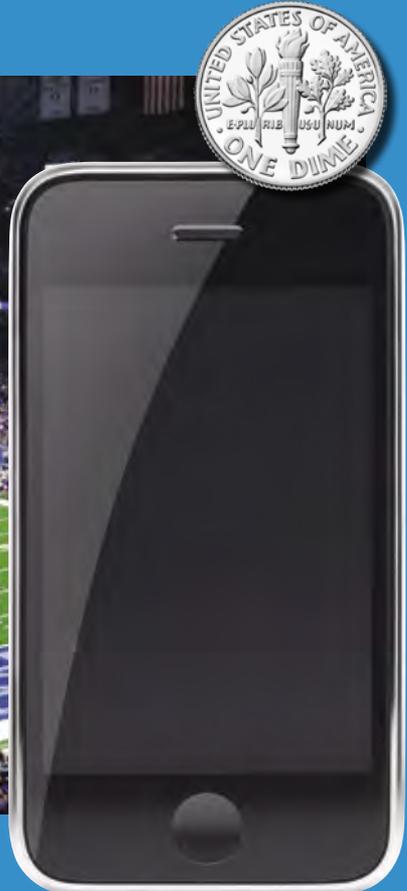

When most of us hear or read news about water, contaminants such as lead and PFAS are listed in varying units that are not easily understood. Lead is measured in ppb (parts per billion), while PFAS compounds are measured in ppt (parts per trillion), and chlorine residuals are measured in mg/L (milligrams per Liter) or ppm (parts per million). On top of it, metric units are difficult for many of us to comprehend.

At 4 degrees centigrade (39.2 F), one liter of water weighs one kilogram, which is the same as 1,000 grams or 1,000,000 milligrams. So, 1 mg/L and 1 ppm are one and the same.

We can visualize or comprehend ppm in the following ways.

- Volumetrically, Delta Township water tank holds ½ million gallons and 1 gallon of water in that tank equates to 2 parts per million (ppm). The MSU water tank holds 2 million gallons and 1 gallon of water in that tank equates to 0.5 ppm. However, these tanks being up in the air, look much smaller from ground level and are hard to discern.
- Area-wise, an iPhone 12 in a football field (300' x 160') is the same as 2.35 ppm, or one-quarter dollar coin in a football field is the same as 0.1 ppm.
- Linearly, 1 inch in 16 miles or 1 second in 11.5 days is the same as 1 ppm.

“
When most of us hear or read news about water, contaminants such as lead and PFAS are listed in varying units that are not easily understood.”

Some contaminant levels (eg. lead) are very small, we report them as parts per billion (ppb), which is 1,000 times smaller than ppm and equal to 1 microgram per liter.

Some contaminant levels (eg. lead) are very small. In order to read them as whole numbers, we report them as parts per billion (ppb), which is 1,000 times smaller than ppm and equal to 1 microgram per liter.

- Size of 1 dime coin in a football field (300'x160') is the same as 56 ppb.
- 1 inch in 15,782 miles in the same as 1 ppb (eg. Los Angeles to New York is 2,800 miles)
- 1 second in nearly 32 years is the same as 1 ppb.

Contaminants levels (eg. PFAS compounds) that are 1,000 times smaller than ppb or 1,000,000 times smaller than ppm, are read as parts per trillion (ppt). We can visualize them as follows:

- 1 dime coin in 56 football fields is the same as 1 ppt.
- 1 second in 31,709 years is 1 ppt (Pyramids in Giza were built 4,500 years ago and don't start counting seconds!).

Above the Bridge

Meet the UP EGLE Team

MARQUETTE – A little more than 390 miles from Lansing, located in the snowy terrain of Marquette, the Upper Peninsula EGLE District Office makes a home.

Marquette is home to two offices of EGLE, the department that oversees the Community Water Supplies where Tom Flaminio is district supervisor, and the engineering unit, where Mike Bolf is engineering unit supervisor.

The Marquette District Office of EGLE Drinking Water and Environmental Health oversees 106 Community Water Supplies (CWS) in the UP that use groundwater for their source. According to Flaminio, a CWS is a supply that provides year-round service to 25 or more people or 15 or more living units.

"We administer the Environmental Protection Agency Program that sets minimum standards for safe drinking water as well as Michigan's *Safe Drinking Water Act*," he said. "There are 13 CWSs in the UP which use surface water and these are regulated by the EGLE Drinking Water Engineering Unit in Lansing."

One of the main activities in the Marquette District is completing a sanitary survey every three years for each water system. A sanitary survey evaluates the water systems capabilities to supply safe drinking water, and they complete about 36 each year, he said.

"Every three years, we survey the water system, tanks, and wells, check water well chemistry," he said. "During the survey we assess the condition of the storage tanks, wells, and pumps to ensure they meet regulatory requirements. We also review operation and maintenance of the water system, reporting requirements, and management and financial aspects."

The department also completes routine site visits every six months for systems that treat their water, and every year for systems that do not treat water. During the visits, EGLE representatives meet with the water operators to discuss their operations and upcoming requirements or potential issues however, routine visits have been suspended during the COVID pandemic.

The department is also charged with reviewing and issuing construction permits for water systems for such projects as water main installation, new wells and tanks, and new chemical feeds. The laboratory results are reviewed of well and distribution samples to ensure compliance with regulatory limits. EGLE also reviews monthly operating reports – summarizing daily water use and chemical application – from the water systems.

"We also respond to water customer concerns and attend public meeting to address drinking water matters," Flaminio said.

Meet the Marquette District Staff

Tom Flaminio, District Supervisor

906-236-9746 flaminio1@michigan.gov

District Supervisor, four-plus years with EGLE. Prior to EGLE, he worked in engineering consulting and now oversees the Marquette District.

District Engineers

There are three district engineers. The District Engineers are responsible for regulatory oversight of Community Water Systems, conducting sanitary surveys and routine visits and reviewing construction permits.

Amy Douville, District Engineer

906-236-4277 douvillea1@michigan.gov

Eastern Upper Peninsula (District 82). Amy has been with EGLE for four years. Before EGLE she worked in engineering consulting and for the Minnesota Pollution Control Agency in the wastewater program.

Mike Westra, District Engineer

906-869-8823 westram@michigan.gov

Western Upper Peninsula (District 81). Mike has been with EGLE three years. Before EGLE, he also worked in engineering consulting.

Natalie Kentner, District Engineer

Natalie is the District Environmental Health Engineer and started work March 22. She will work with UP County Health Departments on Non-Community Water Supply programs (schools, resorts, state parks, etc.) and also some of the smaller community water systems such as mobile home parks and apartment complexes. She was previously employed by the Luce-Alger-Mackinac-Schoolcraft Health Department.

Lori Schultz, Environmental Quality Analyst

906-869-6624 schultzl4@michigan.gov
Lori has worked three years with EGLE. She compiles the laboratory data and monthly operating reports and prepares the annual monitoring schedules. Lori contacts water supplies when they are missing reporting forms or didn't collect samples according to their schedules.

Rob Wolf, Environmental Quality Analyst

906-250-1287 wolfer@michigan.gov
Rob has been with EGLE for more than 25 years. He provides oversight to local health departments in the UP for non-community water well construction, septage haulers, and biosolids land application.

Chelsea Wallner, Marquette District Secretary

906-228-2908 wallnerc1@michigan.gov
Chelsea has been with EGLE two years. She also coordinates *Freedom of Information Act* Requests.

Wolf supervises the engineering department and oversees a staff of 10. After the water issue in Flint occurred, EGLE reorganized and changed the way lead and copper is handled, he said.

"Around that same time, we created this engineering unit," Wolf said. "Surface systems are overseen by engineering specialists. We have three of those specialists and then there are junior engineers."

Larger surface unit plants are covered by Wolf's unit. He works indirectly with water municipalities, performing sanitary surveys required by EPA, also permitting, for new facilities and existing facilities and plants.

Within the last two years, all Lead and Copper program requirements have shifted to the Lead Copper Unit in Lansing. Their contacts are Brandon Onan (Supervisor) at onanb@michigan.gov and Jeni Bolt (Environmental Quality Specialist) at boltj@michigan.gov. The bacteriological sampling program is also run from Lansing, where the UP contact is John Karnes at karnesj@michigan.gov. 💧

IN MEMORIAM

Rupert McGinn Jr.

McGinn was a member of AWWA for 41 years. He retired from the City of Grand Rapids after over 30 years, lastly as the Director of Water Systems. Even into retirement, he would stop by the water department to chat and catch up on what they were doing. He also would pass along his copies of the *AWWA Journal* for the department's library so others could read them. He was very dedicated to the business of safe drinking water and remained so into retirement, engaged with the city service provision and his neighborhood association. He is survived by four children, 10 grandchildren, and 10 (soon to be 11) great grandchildren.

"EVEN INTO RETIREMENT, HE WOULD STOP BY THE WATER DEPARTMENT TO CHAT AND CATCH UP ON WHAT THEY WERE DOING."

ADVERTORIAL

Peerless-Midwest, Inc. Returns to Local Ownership

Peerless-Midwest, Inc., a water supply contracting company with

offices throughout the Midwest, will be employee-owned as of April 1, 2021. The company was sold to SUEZ in 2016 and is now being purchased back with an Employee Stock Ownership Plan (ESOP) – returning it to local ownership and control.

"SUEZ has elected to move in a different strategic direction and that presented the opportunity for the buy-back," noted Jim Williams, Board Chairman for the

company. "Utilizing the ESOP approach, every person in the company is a stockholder with an ownership stake. We have a talented and highly motivated group and look forward to continuing our 48-year tradition of service to the water supply industry."

Mike Williams will serve as Chief Executive Officer (CEO) and Cathy Lance will be the Chief Operating Officer (COO) when the transaction closes on March 31, 2021. All existing employees will be retained, and the company is planning for additional personnel and facilities to accommodate growth.

To learn more, visit www.peerlessmidwest.com.

"Utilizing the ESOP approach, every person in the company is a stockholder with an ownership stake. We have a talented and highly motivated group and look forward to continuing our 48-year tradition of service to the water supply industry."

MICHIGAN SECTION AWARDS

Visit
[www.mi-water.org/
 page/awardscurrent](http://www.mi-water.org/page/awardscurrent)
 for more info!

Nominations
 Due June 1

Every day, including during the current pandemic, professionals across the State show up and dedicate their time, energy, and expertise to producing and providing safe drinking water – often without seeking or expecting recognition for what they do. As members of the drinking water community, we know that fulfilling our mission requires smart, dedicated, creative people in all sorts of roles.

We also know we are surrounded by people and organizations going above and beyond for their customers, stakeholders, peers, and the public. Each year, the Michigan Section of AWWA celebrates and recognizes these accomplishments. The Section is seeking nominations for the following awards.

Take a moment to consider those you have interacted with that exemplify the best characteristics of professionalism in drinking water. Then, take another moment to visit the Michigan Section website to fill out the brief online nomination form to submit a person or an organization for an award. If you nominated someone or an organization in the past but they did not win, please submit it again for our consideration. Nominations are typically considered for two years, including self-nominations.

MI-AWWA Professional Excellence Awards

With the addition of the Excellence in Water award, the Section looks to honor individuals, organizations, companies, project teams, or any other individual or group who made an exceptional contribution to the water industry. This award recognizes noteworthy efforts in protecting public health, promoting safe drinking water, innovative or creative ideas, outstanding leadership characteristics, promoting a diverse workforce, or operating seamlessly for their customers.

Up to four awards (two individuals and two groups/organizations) will be given each year. There are no criteria for years of service.

Young Professional of the Year Award

The Michigan Section of AWWA Young Professional of the Year Award recognizes the contributions of young members, whose service and achievements are exceptional for their years of experience. The award is given annually to one member of the organization that has demonstrated an active commitment to the organization and the profession as a whole.

Raymond J. Faust Award

The award recognizes one or more individuals for outstanding personal service in the water supply field. The award commemorates Raymond J. Faust for his contributions to safe public health engineering practices, his advancement of sound water supplies, and his dedication to building and promoting the waterworks industry of high esteem.

Chuck Van Der Kolk Volunteer of the Year Award

The award would recognize an individual for the volunteer contributions to the Section through one or more of the following: interaction with a variety of groups (staff, councils, etc.), providing long term exceptional service to the Section, performed a single action that has a large impact on the Section, or advanced the Section's mission through talent and service.

Michigan Water Industry Hall of Fame

Established in 2013 by the Michigan Section of AWWA, the purpose of the Michigan Water Industry Hall of Fame is to perpetuate the memory of those drinking water heroes who have made the most significant contributions to the field of public water supply in the state of Michigan.

Richard Husby Public Awareness Award

This award recognizes a Michigan water utility, organization, and/or individual for significant accomplishments in promoting awareness and understanding of the water supply issues among the general public, through the development and implementation of public education activities.

Research and Technical Practices Award

The Purpose of the Research and Technical Practices Award is to:

- 1. Acknowledge outstanding research and technical practices.
- 2. Share research and technical practice findings among utilities.
- 3. Encourage new research.

AWWA LEVEL AWARDS

Operator Meritorious Service Award

The Operator Meritorious Service Award recognizes individuals for special performance in one or more of the following areas:

- 1. Continuous compliance with public health standards in finished water.
- 2. Consistent and outstanding contribution to plant maintenance, thereby prolonging the useful life of equipment.
- 3. The development of new and/or modified equipment or significant process modifications to provide for a more efficient or effective treatment.
- 4. Special efforts in the training of treatment plant operators.
- 5. Special acts, not directly related to water treatment, but which demonstrate dedication to the public beyond the normal operating responsibilities.
- 6. Consistent and outstanding contribution to operation and/or maintenance of distribution lines, pump stations, and reservoirs.

George Warren Fuller Award

The George Warren Fuller Awards are presented annually by the American Water Works Association to the Sections' respective selected members for their distinguished service to the water supply

field in commemoration of the sound engineering skill, the brilliant diplomatic talent, and the constructive leadership that characterized the life of George Warren Fuller.

Exemplary Source Water Protection Award

The AWWA Exemplary Source Water Protection Program Award recognizes a public water system that has developed and implemented model source water protection programs. The drinking water supply sources must be associated with a water system or authority that is regulated by a federal/state/province/tribe government agency. The award applies to systems using surface water and/or groundwater as their source.

Wendell R. LaDue Safety Award

The award, established in honor of Wendell R. LaDue, is presented to recognize distinguished water utility safety programs.

For more information on any of these awards, visit the MI-AWWA website at www.mi-water.org/page/awardscurrent. The deadline for nomination submissions is June 1. 💧

GOVERNOR'S NEW \$500 MILLION CLEAN WATER PROPOSAL

As part of our ongoing legislative work in Lansing the Michigan Section of the American Water Works Association and Midwest Strategy Group have been working to secure funding for Governor Whitmer's new \$500 million clean water proposal.

As background, the MI Clean Water Plan was rolled out in late-2020 and is now an area that may be included in the upcoming FY21-22 legislative budget process. This funding is intended to be spread over the next several years and calls for creating a pool of funding from which local governments or utilities could apply for grants or loans to improve their water treatment systems.

These funds would draw on a variety of sources, including some existing unspent state dollars, federal funds, and unused portions of existing state-issued bonds. The plan does not require any tax increases. Some of these dollars will need legislative approval to be moved into new appropriations areas.

The plan would spend \$207.1 million on drinking water improvements, including replacing lead service lines in disadvantaged communities, removing PFAS chemicals, and treating water to meet state and federal standards for lead and copper.

An additional \$293 million for wastewater protection would fund grants for projects intended to prevent sewer overflows and discharges of raw sewage from surface or ground water, make use of green infrastructure, and eliminating failing septic systems.

There has been bipartisan interest in this new plan as comprehensive funding for improving drinking water and wastewater systems has been a need for years, particularly with new lead and copper service line requirements.

The team at Midwest Strategy Group will be working towards securing this new funding as we move through 2021. If there are additional questions or concerns regarding the proposal, please do not hesitate to contact us at 517-853-0537, compagnoni@midweststrategy.com or hodgkins@midweststrategy.com. 

“THERE HAS BEEN BIPARTISAN INTEREST IN THIS NEW PLAN AS COMPREHENSIVE FUNDING FOR IMPROVING DRINKING WATER AND WASTEWATER SYSTEMS HAS BEEN A NEED FOR YEARS.”

CONFERENCE AND RECOGNITION COUNCIL

By Adam DeYoung, PE, Chair

Recognizing Achievements and Ranks

The MI-AWWA Conference and Recognition Council has been working to continually improve how as a Section we gather (virtually and physically) and recognize the achievements within our ranks. This year includes a few objectives, such as how to help the Section's amazing team of staff navigate hybrid virtual and physical events or build a virtual offering to lower barriers of training and networking for communities and individuals who

aren't given the budget to attend physically. Another focus of the Council is to integrate the new strategic plan into the work done by the Section. This specifically is important around awards. The Professional Excellence Award is poised to be awarded to a community or individual that is emulating out core principles to CARE for every person, SHARE knowledge and expertise, and PROTECT public health and safety.

EDUCATION AND TRAINING COUNCIL

Updated Training Program is in the Works

The Council is in the process of completing the report on the training needs research done this winter and will have its report submitted to the Board of Trustees, along with a complete updated training program for the Board's review and consideration. Once the Board has approved the plan, the Council will share it with the membership.

The Council continues to review class curriculum as well as beta test classes within the new online learning management system. More volunteers are needed. If you would like to be a class reviewer or beta tester, please reach out to staff at info@mi-water.org.

For committees that work on seminar development, make sure to connect with your Council liaison so that we can support your efforts where needed.

GOVERNMENT AFFAIRS COUNCIL

By Andrew Reynolds, Chair

The Government Affairs Council and our lobbyist Midwest Strategy Group were monitoring a flurry of legislative activity at the end of the legislative session for the year, including the passage of two bills of note for our members:

SB 241: This bill prohibits water shutoffs due to non-payment and mandates that water services be restored to residences where shutoffs have occurred, in most circumstances, through March 31, 2021. This bill was sponsored by Senator Stephanie Chang, D-Detroit. The Governor signed the bill into law on December 22.

SB 1258: Among other things this legislation would allow is workers in essential industries like water and wastewater to remain on the job if exposed to COVID if they don't have symptoms. The Governor signed the bill into law on December 29.

We are also talking with EGLE staff and monitoring the release of any guidance on the impact of the new federal Lead and Copper Rule. All we can say at this time is that the Michigan LCR is still in full effect and we do not expect anything in the federal rule (however it ultimately shakes out) to reduce the obligations you have under the current state rule.

Our annual Fly-In event will not be held in-person this year, but we will still be holding virtual meetings with Michigan's congressional representatives on April 19-20. This will present an opportunity to get more members involved in the event, and our goal is to get MI-AWWA members from each legislative district to participate this year, speaking to their own representatives about water issues. If you are interested in participating, please contact me (areynolds@hollandbpw.com) or Section staff to learn more. 💧

COMMUNICATIONS COUNCIL

The MI-AWWA Communications Council is planning to conduct its second virtual Media Training for the members in May. Our first workshop was held in December 2020 and based on the positive feedback we received from the participants, we decided to continue this valuable training resource for the Section.

Just like the previous one, the May workshop will have four 90-minute sessions, with a Q&A portion at the end of each training. The topics for the upcoming sessions are:

- 1) Emerging Contaminants Messaging.
- 2) Communicating with Team Members During the New Normal.
- 3) Cellphone Camera Tips for Quick Social Media Videos.
- 4) Value of Infrastructure/Asset Management.

We are currently in the process of identifying the speakers for the sessions. If you have any comments/feedback about the workshop or would like to suggest any topics or are interested in presenting at one of our sessions, please feel free to reach out at aftab.borka@glwater.org or lashone.bedford@glwater.org.

AWWA MEMBERSHIP SUMMIT 2021

The AWWA Membership Summit was held virtually this year, which allowed several Michigan Section Membership Council members and Michigan Section Board members and staff to attend, along with over 100 other Membership Council and Committee attendees from all over the US and Canada. While it was not quite the same as attending in person, we did not have the weather-related travel delays often experienced in January.

We learned about how AWWA has been doing over the past year. Some take-aways are:

AWWA did have a net loss in membership, but not as much as it might have been due to the pandemic.

This past year ended with a total of around 49,500 members, a loss of about 2,700.

AWWA is working on some potential changes to Utility memberships that will make them simpler and more attractive to utilities. The goal for this year's membership count will be at least 50,000 members by the end of 2021.

We also heard many examples of what other Sections are doing to engage new members and Young Professionals. While some Sections had to cancel annual conferences due to the pandemic, many were able to hold virtual conferences, trainings, and networking events.

In addition to hearing presentations throughout the Summit, we got to participate in a virtual game designed by AWWA staff that mimicked the board game 'Life.' This game followed the life of AWWA members. It was entertaining and educational. Our own Carrie Ricker Cox was one of the winners!

The Michigan Section was one of nine sections that achieved the membership challenge goal for 2020. We retained 62% of first year individual members. Congratulations to all who assisted in this effort!

Happy Retirement

ON THE MOVE

DENNIS BENOIT has retired after a 44-year career and several projects at various water treatment facilities throughout Michigan and the Midwest.

Bredel

Hose Pumps

Maximum performance with
minimum maintenance. Reduced
operating costs with no downtime.

Suitable across many
applications.

WATER

WASTEWATER

Simplicity in installation, operation and maintenance were key considerations when designing the Qdos range of pumps.

- Cut cost through higher accuracy metering
- Simple drop-in installation eliminates ancillary equipment
- Reduced maintenance with single, no-tools, component replacement
- Flow rates from 0.1 to 2,000 ml/min (0.001 to 32 USGPH) at up to 7bar (100psi)

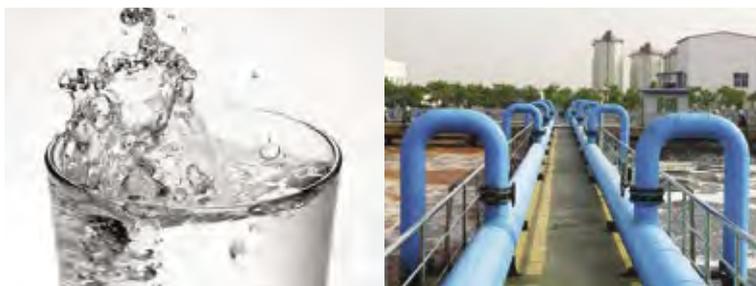

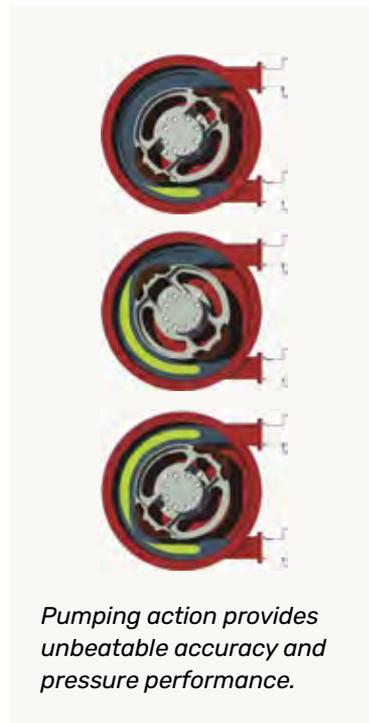

Bredel

Hose Pumps

High maintenance diaphragm, rotary lobe, or progressive cavity pumps can't match the rugged, reliable 24/7 dependability.

- No ancillary equipment, check valves or sealing water flush systems
- Pumps abrasive slurries, corrosive acids, large solids and gaseous liquids with ease
- Ideal for high viscosity or shear sensitive product
- Run-dry indefinitely without damage
- Minimal maintenance – just change the hose
- Suction lift capability up to 9.5 metres and self-priming
- $\pm 1\%$ metering accuracy

Qdos ensures a supply of safe drinking water.

Precision chemical dosing saves time and money at wastewater plants.

WHY IS LABORATORY CERTIFICATION IMPORTANT?

There are many labs to choose from for sample analysis. One of the decisions a water supply must make when having drinking water samples analyzed is, which lab should I use?

There are typically three main reasons why a customer selects a lab: quality, price and turnaround time. All three of these are important factors and the order of their importance may vary depending on your needs at the time. However, if you are having your samples analyzed in order to meet regulatory requirements under the *Safe Drinking Water Act (SDWA)*, you must use a lab certified by the Michigan Department of Environment, Great Lakes, and Energy (EGLE).

The main purpose for using a certified lab is that the data generated is of a known and defensible quality. The primary goal of the laboratory certification program is to ensure all labs in the program are generating consistent data. In other words, it should not matter what certified lab you are using, if the lab is following the requirements of the certification program, the data you receive should be very similar – regardless of the certified lab you use.

Accomplishing certification is no small task. All certified labs are audited every three years to ensure the data generated meets the quality control and quality assurance requirements of the program.

In addition, labs must analyze Proficiency Test (PT) samples every year. PT samples are supplied by certified vendors and test the ability of the lab to properly perform an analysis. The lab must also conduct numerous quality control checks during the analysis, write up Standard Operating Procedures (SOP), and document everything they do to the extent they must even be able to trace reagents and standards used in an analysis based on the lot number. These are just some of the requirements certified labs must meet when analyzing sample for regulatory purposes under the SDWA.

You can find a list of certified labs at www.michigan.gov. 

“IF YOU ARE HAVING YOUR SAMPLES ANALYZED IN ORDER TO MEET REGULATORY REQUIREMENTS, YOU MUST USE A LAB CERTIFIED BY THE MICHIGAN DEPARTMENT OF ENVIRONMENT, GREAT LAKES, AND ENERGY.”

MICHIGAN WATER ACADEMY® BUILDING THE WATER WORKFORCE OF THE FUTURE

As most of you know, the Academy® has been in development for a couple of years now. We have one class (Customer Service series) that has been offered several times but until now, that was it.

With the request for proposal that went out late last year, the Section hired a number of independent contractors to help build out the curriculum for the Academy®. Some of the classes will be offered on-demand in our new learning management system (LMS). Others will be offered live by an instructor, and eventually in person.

You may wonder why we have been talking about the Michigan Water Academy® so much. The Academy® is actually designed to not only offer exceptional learning experiences for water professionals – it is also a great way for your community to succession plan.

We've all heard of the silver tsunami. Some of you may already be experiencing this exodus of knowledge from your ranks. As people with 20 or more years in the water sector continue to retire, we need to take bold and creative action to fill the gaps in our workforce. One way is to strengthen those already here who can then step up to leadership positions. Another way is to recruit new people to the water sector. The Academy® is the perfect way to do both.

With its four levels, each community will be able to develop an individualized professional development plan for any of its water professionals, whether new to the industry or about to lead. Each class may earn college credit at Bay College. You may never have thought about getting an Associate degree from Bay since it's located in Escanaba.

But by earning credits through completion of Section trainings and the availability of online classes held by Bay, an associate's degree is now attainable.

We're in the throes of curriculum review and comparing what has been developed with the developing education program. All of this will come together to offer more and better opportunities to attract people to the water sector and help those already here to prepare for leadership position.

A good number of Academy® classes are expected to be available beginning in Fall 2021, with the full complement becoming available in 2022. 💧

“AS PEOPLE WITH 20 OR MORE YEARS IN THE WATER SECTOR CONTINUE TO RETIRE, WE NEED TO TAKE BOLD AND CREATIVE ACTION TO FILL THE GAPS IN OUR WORKFORCE.”

MI-AWWA ONLINE

The Section website has a lot of information on membership. When you select the Membership tab on the site, the drop down gives you a number of options including getting involved in volunteering with the Section, seeing recent awardees or nominating people for upcoming awards, or searching for other members. This part of the website also has a How-To library, where you will find PDF documents that help guide you through some of the web features.

Remember, if you are a member or have gone to a MI-AWWA event, you have a profile on the website. If you need a reminder about your login credentials, just email staff at info@mi-water.org. 💧

UPCOMING TRAINING

As we continue to adjust to our 'new normal,' the Section wanted to make it easy for you to know what your options are. Check out the upcoming trainings using the new icons to help you choose the training event and delivery that work best for you.

OUR VISION

A better Michigan through better water.

OUR MISSION

Improving lives through the effective management of water, Michigan's most vital resource.

The Michigan Section of the American Water Works Association (MI-AWWA) represents more than 1,500 water professionals throughout Michigan. MI-AWWA strives to bring value to its members through high quality programs and services as well as fulfilling volunteer experiences. MI-AWWA is a member-driven organization with programs being developed for and by water professionals, many of whom volunteer their time and expertise. Others exemplify outstanding service to their communities and are recognized through the many awards offered through MI-AWWA. Thank you for your dedication to the water sector!

2021 buyers' guide

WATER WORKS NEWS SPRING 2021

OUR MI-AWWA BUYERS' GUIDE
CONSISTS OF TWO SECTIONS:

1. A categorical listing of products and services, including a list of the companies that provide them.
2. An alphabetical listing of the companies appearing in the first section. This listing includes name, contact info, website, and more.

LISTINGS BY CATEGORY

ACOUSTIC PIPELINE CONDITION ASSESSMENT

M.E. Simpson Co., Inc.

ACTIVATED CARBON

CEI-Carbon Enterprises, Inc.

AMI COMMUNICATIONS

Michigan Water Works News is made possible by the companies below who convey their important messages on our pages. We thank them for their support of the MI-AWWA and its publication and encourage you to contact them when making your purchasing decisions. To make it easier to contact these companies, we have included the page number of their advertisement, their phone number, and, where applicable, their website.
