MESSAGE FROM THE CHAIR

JOHN WILLEMEN, CHAIR

During the months of February and March this year, the Michigan Section looked closely at the value of membership as we worked toward member approval of a section assessment. One of our important functions as individual members of AWWA, and as an organization, is to promote the value of water.

A January article in the *Lansing State Journal* looked at water and sewer rates for several communities in the greater Lansing area in response to a group of area water users upset by recent rate increases. Some of the people were frustrated by the fact that even though they

took steps to decrease their water use, their bills still went up. Kudos to the *Journal* for a fair and balanced response that was well researched.

It inspired me to do a comparison of my own utility bills. I consider my water and sewer rates very reasonable. My shock value came from comparing my water/sewer bill to some of my other utilities. The cost to have fresh, safe water delivered to multiple locations in my home any time day or night is less than half of what it costs to "pipe" in the cable/internet/phone service, and less than half of the bill for my family's mobile devices. Even though I've known the numbers for a long time, it was good to consider a comparison to truly appreciate the value of my water service.

Several times in my career I've witnessed the very mention of a water or sewer rate increase result in angry public comments at City Council meetings or a social media maelstrom. I don't know if I've ever heard a complaint about the yearly increase in the cable bill.

Michigan water utilities will formally be looking at the value of water this year as they put together their Asset Management Programs (AMP), due in January 2018. One of the key points of the AMP is to evaluate the funds that will be needed to complete the capital improvements identified in the AMP and the rate structures available to deliver those funds.

Funding gaps will need to be addressed, and rates are likely to go up for many water system customers in the coming years. It is a reality. Part of the reality comes from a shift in focus from expanding water systems to the replacement of aging infrastructure. Those buried pipes have served us well, but they will only last so long

If a design life of 50 to 100 years is assumed, 1% to 2% of a water distribution system will need to be replaced annually on average. For communities that have not been diligent with pipeline replacement, significantly higher percentages may need to be considered for several years.

The cost to replace all that piping is going to sting far more than did the cost to install it originally, when revenue from the new users paid for most of the effort. But replacement will become necessary at some point, and it is in the best interest of the communities and the water system customers they serve that it be done diligently. A Google search on "water main break" yielded 28 million results. One only needs to read a few of those postings to be convinced that the cost to repair the damage from a serious main break far exceeds the cost to replace the pipe before a catastrophic failure occurs.

And when people complain about their water bills, suggest they take a look at what they pay for cable and cell phones. 💧

ASSOCIATION INITIATIVES

MARK COLEMAN, DIRECTOR

The AWWA Winter Board of Directors meeting was held on Saturday, January 14, 2017. Items that you may find of interest are summarized below.

The Association Board of Directors selected David Rager of Cincinnati as the association's next president-elect. An AWWA member for nearly 15 years, Rager is the principal of Rager Management Consulting, LLC. He was CEO for SD1 in Kentucky for four years and for the Greater Cincinnati Water Works for 17 years. For AWWA, he has served as Association treasurer, chair of the Water Utility Council and a member of the International Council. A former chair of the Board of Trustees for the Water Research Foundation, he is a member of the Ohio Section and the Kentucky/Tennessee Section. He will begin his role as president-elect in June at the conclusion of AWWA's Annual Conference and Exposition in Philadelphia. He will serve his one-year presidential term beginning in June 2018.

- The fourth vice president elected was your Michigan Section Director who is delighted to be able to continue the Michigan Section tradition of having its Director become an Association vice president.

Marshall Thompson was voted in as a director-at-large. Thompson is the director of operations at SUEZ Water Idaho in Boise. An AWWA member for 10 years, he serves as chair of the Water Information Technology Committee for the Pacific Northwest Section. He is a veteran of the U.S. Coast Guard Reserve.

Also elected was Randy Moore as a service provider director-at-large. Moore has been an active member of AWWA for 34 years at the Missouri Section and is a regular contributor to *Opflow*, AWWA's magazine for operators. He is vice president of market development at Pure Technologies, Ltd. in Columbia, MD.

The vice presidents and directors will also begin their roles in June at the conclusion of AWWA's Annual Conference and Exposition.

Michigan Section members honored by the Board included Chuck Van Der Kolk, Zeeland Board of Public Works who received the "2017 Volunteer of the Year Award" and Tom Idema who received the "John Lechner Award of Excellence."

The Board approved a new Lead Service Line Management Policy Statement. The policy statement reflects AWWA's support of the National Drinking Water Advisory Council (NDWAC) recommendation to replace lead service lines and may be found on the Association's web site.

The Retiree Member Definition was changed by the Board from "... an individual who is substantially retired from all gainful employment, who is 65 or more years of age, and who has been a member of the Association for at least 15 years" to reflect a minimum age to 55 and membership tenure to 10 years. The change was made to encourage retirees to continue Association involvement by reflecting the fact that AWWA's members are retiring at an increasing pace, many prior to age 65 and short of 15 years of membership.

Thanks for your attention! Give me a shout if you would like additional information or simply want to chat. I am looking forward to an exciting three years as your MI AWWA Director. 💧

GIVE ME A SHOUT IF YOU WOULD LIKE ADDITIONAL INFORMATION OR SIMPLY WANT TO CHAT.

Four vice presidents were elected by the board.

- Raymond Baral Jr. has been an active member of the Connecticut Section for 22 years. He is the assistant manager of water treatment at the Metropolitan District Commission in Hartford, Conn.
- Stephen Blankenship, a member of the New Jersey Section for 16 years, represents the Section at many AWWA workshops, events and conferences. He is the executive director/chief engineer at Hamilton Township MUA in Mays Landing, N.J.
- Alan Forrest has been an active member of the Arizona Section for 22 years, where he currently is the director. He is a senior manager in the water business group at CH2M.

SO MUCH GOING ON ACROSS MI-AWWA

BONNIFER BALLARD, EXECUTIVE DIRECTOR

As of this writing, the winter has been relatively mild for Lower Michigan. The past few months have been spent as you would expect – finalizing the operating budget for 2017, preparing and running Joint Expo & Operators Day with our partner MWEA, and gearing up for spring trainings. It has also meant gearing up with new programs like our Communications Plan and the new Michigan Water Academy, partnering with DEQ on the Water Infrastructure Summit, and engaging elected officials as they consider policy changes to help improve water system management in Michigan.

One of the highlights for me was an interview I was able to participate in for an association magazine published here in Michigan. The article focused on the intersection between leadership and values, a topic dear to me since my Master's degree is in leadership development. The joy came though when we did the photo shoot. Not because I was getting my picture taken, but because I was able to highlight one of our members.

Wayne Jernberg and Chad Reenders from the City of Grand Rapids opened up their low pumping station for the photo shoot and got to be in on the action. I thoroughly enjoyed learning the history of the now rarely used station and got a tour of the water treatment plant, both on the coast of Lake Michigan.

Shortly after this happened was Joint Expo, one of my favorite events

of the year. I truly enjoy interacting with all of the exhibitors and operators. For the last three years, I have had the pleasure of greeting my nephew, Paul Sager. He works for a company that offers water and wastewater services in southeast Michigan. We don't see each other as often as I would like so this was a treat to catch up with him there.

I have also worked closely with the task force that worked on the Section Assessment ballot initiative. Members rallied to the call, voted, and ultimately the initiative passed. Now, it goes to the Association Board for final approval and implementation. More on implementation in a future issue. The Section Board of Trustees will continue to look for ways to strengthen Section finances to continue to offer programs and services to members.

And now we're in the throes of launching our communications plan and the Michigan Water Academy. The communications plan starts with communications training, open to anyone interested and then specialized media training specifically for people selected to act as spokespeople for the Section. The next step will be to begin working with a communications firm to start to build ongoing relationships with media around water.

The Michigan Water Academy is covered later in this issue. This new training initiative will offer more topics in more locations using best practices for adult training. Many members are involved in its creation and

development and I'm very much looking forward to getting member input as classes are introduced.

I continue to be inspired by operators who find creative approaches to their daily challenges and volunteers who give so freely of their time and expertise. I've spent most of my career in nonprofit management precisely because I believe we are called to use our skills to make the world a better place. And I see that happen regularly, in big ways and small ways as I go about the business of the Section. Keep up the great work! 💧

ASSET MANAGEMENT AND INFRASTRUCTURE COMMITTEE UPDATE

America's infrastructure is rapidly reaching its end of life and needs to be managed better to ensure that smart investment is appropriated to the areas with the most need. Asset management is an important tool for managing infrastructure and making data-based decisions. It is a way of decision-making that takes into account long-term goals, strategic plans, and whole life cost of infrastructure assets. As it becomes more and more important for utilities to begin to look at their assets in a holistic way, asset management provides the tools to do just that. Asset management touches diverse areas of an organization which makes the roles and responsibilities of asset management hard to pin down. In this article, the Asset Management Committee examines what roles and responsibilities are needed for asset management and where those responsibilities might reside.

It is important to note that most well run utilities already use many aspects of asset management. It is not the intention of asset management to "reinvent the wheel" but rather to use the wheel more efficiently. Data on assets is already being collected. An asset management plan ensures that the right data is being collected and that it is useable to aid decision-making. Asset management plans are a formal, written plan that reflects what the utility is often already doing. The application of an asset management plan makes communication and data management easier.

Figure 1 shows how the five components of asset management from the MDEQ's guidance (in red) might be applied to an organization. Asset inventory data collection, including condition, is gathered and tracked by operations and maintenance staff. Engineers, managers, and supervisors collaborate with the operation and maintenance staff on which assets are critical to the system. Revenue structure and capital improvement plans are

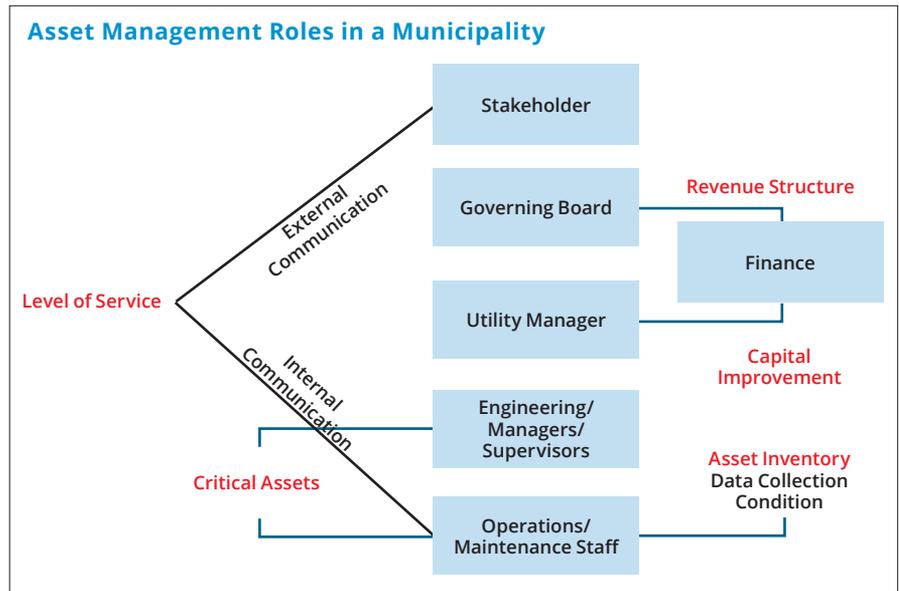

Figure 1

created utility management and finance and approved by the governing board to make sure they are in line with strategic planning. Level of service is something that needs to be communicated at all levels of the organization from the front line workers to the stakeholders. This

ensures that level of service statements reflect goals that are achievable and reflect the needs and wants of customers and regulators.

There are many tasks that relate to asset management. Tracking and analyzing data is the main task. Data

M-Series®

...and everything else for water distribution.

Pipe, Hydrants, Valves, Brass, Repair Clamps, Horns, Curb Boxes

Ph: 800-433-4332 Email: sales@slcmeter.com
Fax: 248-625-8650 www.slcmeter.com

that is tracked and analyzed may include condition ratings, customer usage, criticality, redundancy, and Geographic Information System (GIS) mapping. Asset management includes establishing baselines so that performance can be monitored over multiple years. It also means managing data and making sure that the needed data is provided by the operators and maintenance staff in a consistent way. It may be necessary to

track metadata, or the data describing data management actions, depending on how sophisticated the program is. Reports can be built to communicate cost analysis, staffing, inspection and maintenance activities, expenditures, capital improvements and asset inventory.

Tasks related to training and communications are also critical to asset management. Training can be

group sessions or one on one to make sure that field staff is prepared to use asset management tools to gather and access data. Decisions are only as good as the data that supports them so consistency and reproducibility are important. Having open, two-way communication is also important for asset management to be successful. Information must flow from the top of the organization to the bottom in the form of strategic planning so that everyone knows how their work supports asset management, and also flow from the bottom to the top so that decision-makers are getting the data they need to make informed decisions. Knowledge must flow out of the organization so that customers understand the importance of the utility, and inward so that the utility understands the level of service desired.

These tasks can be assigned to a designated asset management coordinator or spread through the organization, depending on the size and resources of the organization. Communities with large, complex assets will probably need a dedicated person, or in some cases department, to organize and track the data that is needed to manage a large asset registry. Small utilities will be able to assign tasks to the person whose job fits closely to the task. In this case, the manager may also be the champion and the field worker may also produce reports needed for decision-making. It is often important to have an advocate that can support building asset management processes. This is especially true if there needs to be a lot of change to bring asset management to all levels of the organization. Connecting tactical and operational goals with strategic goals can be a difficult task so a champion is needed to see the change through. *This article was prepared in collaboration with the MI-AWWA/MWEA Joint Asset Management and Infrastructure Committee. If you are interested in joining the AIM committee, please contact MWEA or MI-AWWA. If you have any questions regarding this article, please contact AIM committee member Katie Erickson at ericksonk@wyoingmi.gov.*

PIPE REPAIR MADE COST-EFFECTIVE AND EASY, TOO!

That's right! The Quick Cam® Repair Clamp and Quick-Sleeve® Bell-Joint Repair Sleeve will cut installation time and labor costs, as well as reduce your inventory dollars.

Here's Why:

- ✓ Product Advantages Allow Reduction in Inventory
- ✓ Innovative Designs for Ease of Installation
- ✓ Proven, Reliable Performance on All Types of Pipe
- ✓ High Quality Construction for Greater Safety Factor

Contact us for complete information.
Email sales@tps.us or phone 716-372-0160.

GOVERNMENT AFFAIRS COUNCIL UPDATE

The Government Affairs Council has recently made some progress in growing its membership and I'm happy to report that Andrew Reynolds has been named Vice Chair. An active and engaged membership is crucial to advancing our mission and meeting our work plan goals for 2017. The Council still has room for additional members and continues to seek volunteers to assist with legislative advocacy. Thanks to Andrew, the Council now has a directory that cross-lists all MI-AWWA members with their State and federal legislators, so contact with our elected officials is easier than ever.

Additionally, the Council is working on an effort to better track legislation at the state level. Council members will be

assigned to track the status of a bill, from inception all the way to Capitol Hill (does anyone remember Schoolhouse Rock?). The ability to have one point-person for each proposed bill will help to ensure the Council can provide up to date information to our Section members, and more quickly call to action volunteers and members as needed.

One of the Council's largest tasks is to participate in the AWWA Fly-In, held in Washington DC each year. Individual meetings are held with members of Congress to discuss draft legislation and challenges and opportunities facing drinking water systems. This year's event took place in March. Three representatives from Michigan attended.

Stay tuned to *Water Works News* for a summary of our work there! In general, we have found that the direct contact with our legislators and their staff in Washington is a very effective path for AWWA to network and be viewed as a reputable source for technical expertise and guidance as legislation is drafted and considered. The Council's goal continues to be to make these connections with our state and local elected officials. We have had some success on this through the outreach efforts by some of our Council members, and are considering the avenues to take to reach this goal.

Our next meeting will be held in person in May, 2017. If you're interested in attending, please contact Molly Maciejewski! 💧

EDUCATION AND TRAINING COUNCIL UPDATE

Well, fresh off the 2017 MI-AWWA/MWEA Joint Expo at the Lansing Center, a sincere "Thank You" is due to all the attendees and the great volunteers that made it another huge success. Particularly encouraging were all the new faces on the front lines helping to pull this event off. The generosity of our membership continues to be unmatched. If any of you have not yet been to one of these events, it's an absolute must. The networking is incredible. Not just between customer and contractor in the exhibit hall, but between industry professionals at all levels, at all times. While standing in the same spot, I was able to schedule some upcoming VFD replacements, recruit some Bay College grads, chat with former co-workers, and hear a pitch for a talk at the upcoming Fall Regionals. The opportunities to collaborate are endless.

Speaking of Regionals, I hope you all have your registrations in order for the spring meetings. There is some time carved out on each site's agenda for a little lesson on the local utility's history. Be sure to let us know what you think of this. Is history something MI-AWWA members would like to see more of?

Finally, I have to acknowledge the tremendous effort over the last year put forth by our Plankton and Algae task force. This group is in the final stages of assembling what will undoubtedly be a tremendously informative and exciting program. Dates have been set for August 1-3. More details will be passed along as

they emerge, as will registration information as the process is hashed out.

As always, please pass along your thoughts and ideas as they pertain to making our industry personnel more informed, highly trained, and better equipped to serve the public. I can be reached at robert.miller@suez-na.com. 💧

DIXON ENGINEERING, INC.
Engineering and Inspection Services for the Coating Industry

The Midwest's Tank Inspection Leader

Since 1981, Dixon Engineering has been recognized as a leader in the storage tank and coating inspection industry. Our clientele consists of industrial, municipal, state, and federal clients. Dixon has experience with virtually any type of potable water storage tank and coating systems. For cost effective solutions to your storage and coating maintenance needs - specify Dixon Engineering. CONFERENCE AND RECOGNITION COUNCIL UPDATE

Over the past couple years the Council has been busy evaluating the Michigan Section Annual Conference. Each year the council takes the surveys from past conferences and has open discussion on improvements to future conferences. The surveys give valuable input for conference preparation.

Conference evaluation results focused on our target audience, conference locations, abstract content, and award/recognition. The conference cannot be all things to all people, however, there was good news; the surveys showed the Michigan Section was doing a good job in reaching its target audience.

Discussions were immediately held covering changes that are recommended for the 2017 conference year as well as future conferences in the years 2018 and beyond.

To address 2017 our program committee convened for the purpose of developing a good pipeline of new

abstract ideas and potential new speakers. They recognized the need to think more about how to create the content in order to attract our target audiences and provide exceptional presentations. The committee is always welcoming up-to-date topics and abstract submissions for the water industry at any time.

For future conferences, staff focused on gathering RFP's from new potential conference locations. A task force from the Council evaluated the RFP's and chose locations that best served the needs of both attendees and vendors and added value for the investment (of time and money). The goal is to incentivize repeat attendance; engage audiences with a clear value proposition; achieve fun, recognition, networking and momentum while accomplishing business goals. These future locations include Kalamazoo, Port Huron, Grand Rapids, and Traverse City.

Awards and recognition are important to the success of our

Section. A comprehensive list of national and local awards were put together in matrix form. As a council we evaluated each award and its presentation to make sure it fit the recognition it was intended for.

The council also saw the need for recognizing our volunteers. Volunteers are the life blood of our Section. A task force was formed to improve recognition in this area. As part of the improvement, more focus will be placed on public relations opportunity for presenting awards. An example would be presenting the "Best Tasting Water" award at the winning community's public meeting and inviting the press.

We invite participation in any of the following committees: Association Service Nomination Committee, Local Arrangements Committee, Registration Committee, Contest Committee, Joint Expo Committee, Manufacturer's Advisory Committee, and Faust Scholarship Committee. 

MEMBERSHIP COUNCIL UPDATE

A lot happened in the membership council this quarter. First, the membership council reached our 2016 new member retention goal, thanks in large part to the amazing efforts and activities held by our Young Professionals Group. Meeting this goal brings over \$2,400 to the section. On top of this, the board has approved funds for our diversity task force to bring a great speaker to our annual

conference. Look for more from our diversity team in August!

In January, the Association hosted the annual membership summit. This is a great opportunity for members of the membership council to learn about all of the offerings from AWWA, how AWWA can assist the Section and allows us to hear about successful activities performed by other sections. What did we learn this year?

If you have a utility membership you now are able to receive more value for your membership. Your utility may be eligible for standards, additional individual memberships or free webinars. The membership council will be reaching out over the next year to those utilities not taking advantage of the new offerings. Don't want to wait? If you want information sooner, feel free

to contact the membership council or Andy Chase, achase@awwa.org.

Our membership is getting older but the workforce is not. For the first time in 34 years the Baby Boomers are not the largest percentage of the work force. Millennials are the largest generation in the work force and their percentage is growing. AWWA is working to stay loyal to our long term members while reaching out to the next generation. One way we are accomplishing this is the AWWA website is going mobile. Okay...so maybe we are a decade behind but at least we are moving forward. Look for this and other upgrades over the next year.

No water, no beer? Our group toured the Breckinridge Brewery. We saw a complicated water treatment and brewing system that would rival

Carrie Cox receiving Member Retention Award on behalf of Michigan Section

any water plant, it included Endress and Hauser pressure transducers, electrically actuated control valves

and pumps all controlled by a complicated SCADA system. This Brew house prides themselves on matching some of the best breweries around the world. How do they do this when other breweries have failed? They start by filtering the City of Denver water to remove all the minerals. Then they add in minerals found in water of the area where the beer is made. Want a true English porter or stout? You add minerals found in their ground water. You want the best tasting Pilsner? Your water better have the same minerals as that found in the water around the City of Pilsen, Czech Republic. I guess Breckinridge Brewery proved that water really does make the beer.

Andy Chase with Michigan and Florida section representatives.

Finally, I learned that there are so many opportunities out there for our Section to improve its member value and the association is truly here to provide its members the solutions to effectively manage the world's most important resource, water. Look for the Membership Council to take advantage of the Association's work in the coming months. 💧

Get WSU

A Problem Solving Company to Help You With Your Water Treatment Programs.

Mark McKee:

765-719-2956 mmckee@getwsu.com

We design solutions.

Give us your worst hatch problem, and we'll deliver a durable product that meets your needs.

EJ aluminum access hatches are designed to provide easy and secure access to below ground infrastructure, and feature stainless steel hardware.

SAFE HATCH® safety grates cover the opening and provide fall through protection in conformance with OSHA standard 1910.23.

Ductile hatches are available for roadway applications, and open with less than 35 lbs of lifting force.

For a product demo, visit us at r.ejco.com/lunch or call 800 626 4653

Made in the USA

YPS ARE STAYING BUSY

Even though it's early in the year, the Young Professionals (YPs) have been extremely active. The year started out with an extremely successful day at Joint Expo, and we are looking to have an eventful spring and summer. Joint Expo came and went as it does every February, and the YPs were there to help make sure it was a success. During the first day of Joint Expo, the YPs hosted the Round Table Luncheon, the scavenger hunt, and a mixer. The round table luncheon consisted of a panel of experienced water professionals and a group of students and new professionals. It gave students, and those new to the industry, a chance to network and ask questions about the field in a relaxed atmosphere. A large group from Bay College attended, and it was great to see the passion they shared for the industry.

The scavenger hunt was also well attended this year. Participants visited our sponsor's booths on the Expo floor in order to earn raffle tickets towards prizes. Four grand prizes were sponsored that each included a \$100 gift card, prep books for certification courses, study materials and vendor swag. Prizes were awarded at the mixer

The mixer hosted by YPs was held at Lansing Brewing Company.

following the close of the Expo floor at the Lansing Brewery. Victaulic and Badger Meter sponsored the mixer, and all water professionals were invited to come and network after the close of the exhibits. Everyone had a great time and enjoyed the newly chosen venue.

Aside from being busy with Joint Expo, there have also been some new and exciting events in the works. Together with MWEA, MI-AWWA has three No Water No Beer events coming up in May, and these events are dedicated to celebrating the value of water. Tickets to the event are \$20 per person and are open to the public. The ticket price includes your admission to the event, light appetizers and a welcome package including two drink tickets, a souvenir pint glass, and vendor/water awareness swag. Events are throughout the month of May, and they are located in Ypsilanti, Kalamazoo and Grand Rapids. Registration and sponsorship information can be found on MWEA's website under the calendar of events. Thank you to KAR Laboratories and Victaulic for sponsoring all three locations!

In addition to all of this excitement, the YPs have one other event in the works: A Chicago Cubs game hosted in Chicago, IL. This event is a joint event with the Illinois and Indiana sections, and we are looking at dates in June or July. Further details related to this event

Those who walked the exhibit hall had a chance to have some fun and win prizes thanks to the Young Professional – Emerging Professional Scavenger Hunt.

should be available in the beginning of April, so check the website!

For additional information regarding the No Water No Beer Festivals or to be put on the list for the Chicago Cubs game, please contact Jenna Karazim (jenna@karazim.us). Thank you again to Victaulic, Badger Meter and KAR Laboratories, our top-level sponsors for Joint Expo and the No Water No Beer Festivals! 💧

For your day-to-day challenges as a water professional, AWWA membership is the solution.

Keep current on water issues.

- ▶ Get information from AWWA Standards, manuals, books, award-winning DVDs and respected periodicals.

Earn continuing education credits.

- ▶ Attend in-person or online. AWWA and local Sections host dozens of educational events every year covering all aspects of water and wastewater.

Support smart water policy.

- ▶ From regulations to innovative financing options, AWWA works on issues that benefit the water community.

Time-saving resources.

- ▶ Current technical resources provide what you need, when you need it—all at member discounted pricing.

MUSKEGON WATER FILTRATION PLANT

In 1874, the City of Muskegon constructed a water system in response to a devastating fire that burned 75 businesses, 66 dwellings, and 34 other buildings. The system consisted of a number of springs that fed a constructed reservoir with a pumping station and the first water mains and hydrants. By 1907, Muskegon had constructed 48 miles of water main, 600 hydrants, 21,000 taps, several intakes and a 4 mgd steam operated pump station at a cost of \$450,000. In 1919, the City was ordered by the State Board of Health to add chlorination in response to a typhoid fever epidemic.

In 1936, the City decided to construct a new water filtration plant along the shores of Lake Michigan to provide a safe and reliable water supply to the growing region. Their pride in the plant was evident as they had the postcard pictured above published sometime after 1936. At the time of construction, the plant had a capacity of 16 mgd and included the following; four new low lift service pumps, two rapid mix basins with Alum coagulation and Activated Carbon addition, four flocculators, two settling basins, six filters with two wash water pumps, and 3.2 million gallons of finished water storage. After several more expansions,

the 40 mgd treatment plant is still in service today and continues to be a source of pride and public health for the greater Muskegon region.

Information taken from; *Flowing Wells and Municipal Water Supplies in the Middle and Northern Portions of the Southern Peninsula of Michigan*, Leverett et al, USGS 1907 and *Water System Construction Features and Date*, (which is a summary of sanitary surveys), MDEQ 2016. 💧

2017 Buyers' Guide

Our MI-AWWA Buyers' Guide consists of two sections:

1. A categorical listing of products and services, including a list of the companies that provide them.
2. An alphabetical listing of the companies appearing in the first section.
This listing includes name, contact info, website and more.

2017 Borchardt Conference *a Success!*

By David Schendel

Jim Borchardt, Dr. Lut Raskin (Borchardt Awardee), Tom Newhof

Congratulations to Borchardt Award winner Dr. Lutgarde Raskin!

The 24th Triennial Borchardt Conference was held on February 21-22, 2017 in the Rackham Building Auditorium on the campus of the University of Michigan. This year's conference brought together over 225 engineers, scientists, researchers, practitioners and students to discuss the latest advances in water and wastewater treatment and technology. The Borchardt Conference is named in memory of Dr. Jack Borchardt, who originally introduced the sanitary engineering curriculum at UM, and who relentlessly pioneered water

industry training and technology transfer programs in Michigan from the late 1940s until his retirement in 1982. A total of 21 oral presentations and 59 research posters were offered by speakers from around the U.S. and Michigan, including representatives from 11 different universities. Many long-time Borchardt attendees remarked that *"2017 attendance and program offerings were the best ever!"*

Highlights of the 2017 conference included keynote lectures by Dr. Janet Stout, Associate Professor of Civil and Environmental Engineering and Director of the Special Pathogens Laboratory at the University of

Pittsburgh Swanson School of Engineering; and by Dr. Sudhir Murthy, Innovations Chief, District of Columbia Water and Sewer Authority. All 2017 Borchardt Conference slides and papers will be posted at: www.mi-water.org/?page=PresLibrary

Professor Jack Borchardt was dedicated to research and teaching within the Civil Engineering Department at the University of Michigan, and to the concept of lifelong education and in-service training. A special highlight of each triannual conference since 1983 has been presentation of the Jack A. Borchardt Award *"in recognition and appreciation of individual contributions*

toward the continuing education of drinking water and clean water operators, engineers and public officials.” The 2017 Borchardt Award was presented to Dr. Lutgarde Raskin of the University of Michigan. Among many other honors, Lut is the Altarum/ERIM Russell O’Neal Professor of Engineering and Graduate Chair in the Department of Civil and Environmental Engineering. She has served on the Borchardt Conference Planning Team for the last 10 years, and has dedicated much of her professional life to continuing Dr. Borchardt’s legacy of excellence in engineering education and lifelong learning.

Two other significant events occurred during the 2017 conference. The new *Borchardt-Glysson Water Treatment Innovation Prize* was awarded to Dr. Marc Edwards of Virginia Tech. The Prize was given in honor of Dr. Edwards’ internationally recognized water technology and public health contributions, and included a \$10,000 cash award. Dr. Edwards graciously chose to donate his cash prize to help promote youth science and engineering education in Flint. No less momentous was the appointment of

Dr. Nancy G. Love to be the first-ever *Borchardt and Glysson Collegiate Professor of Civil and Environmental Engineering* at the University Michigan. Dr. Love is a former chair of the CEE Department, and also serves as Associate Dean for Academic Programs and Initiatives in the UM Rackham School of Graduate Studies. Congratulations to Dr. Edwards and Dr. Love on these additional honors to their respected careers!

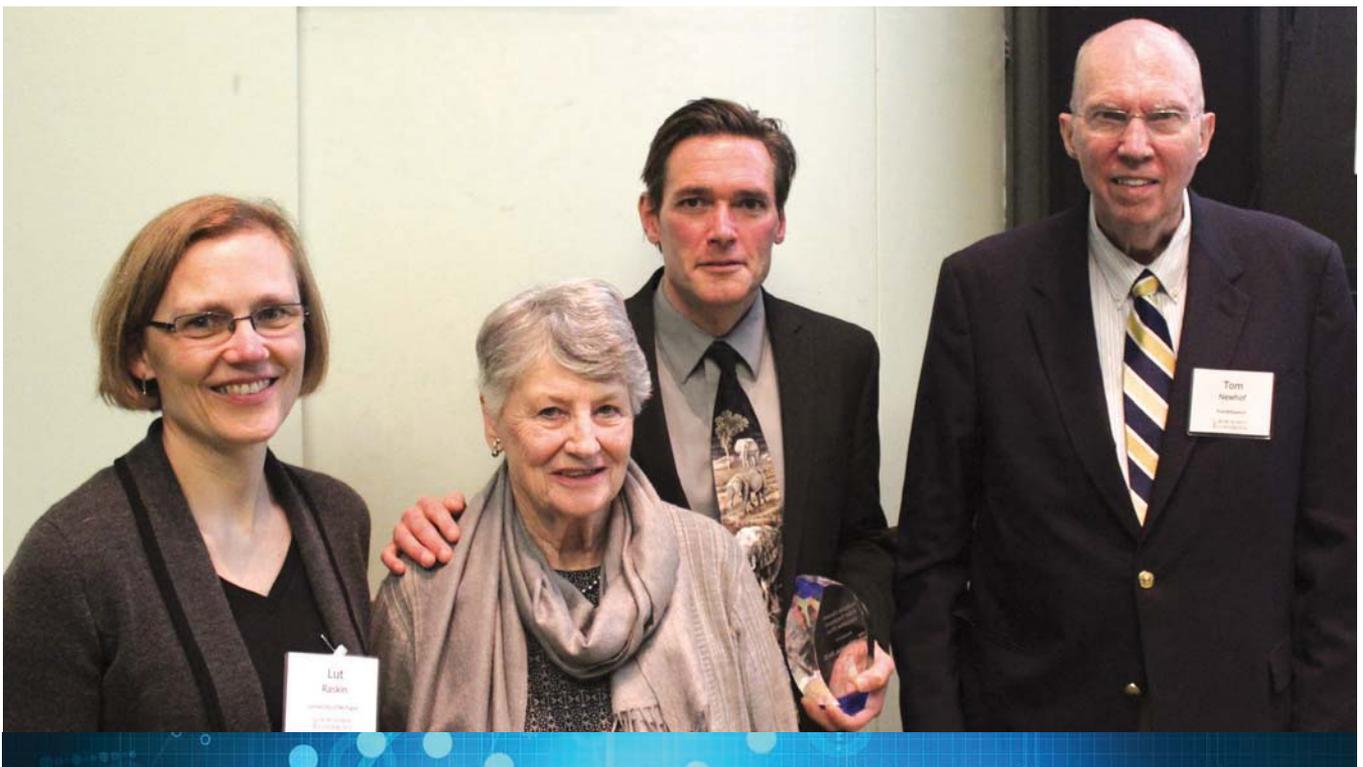

Inaugural Award of Borchardt-Glysson Water Treatment Innovation Prize to Dr. Mark Edwards

Marc Edwards, the Charles P. Lunsford Professor of Civil and Environmental Engineering at Virginia Tech, was awarded the first-ever Borchardt-Glysson Water Treatment Innovation Prize on February 21, 2017. The presentation took place at the 2017 Borchardt Conference in the Rackham Building Auditorium on the campus of the University of Michigan. Dr. Edwards delivered a special lecture entitled *“Sustainable Water Distribution Systems of the Future: Fixing Old Mistakes and Avoiding New Ones.”*

The Prize was given in honor of Dr. Edwards’ internationally recognized water technology and public health contributions, and included a \$10,000 cash award. After his acceptance and lecture, Dr. Edwards graciously chose to donate his cash prize to help promote youth science and engineering education in Flint MI.

The Borchardt-Glysson Water Treatment Innovation Prize was recently established through a generous gift by Tom and Greta Newhof to the College of Engineering of the University of Michigan. The donors chose to recognize Professors Borchardt and Glysson by selecting the name of the prize.

Every three years the Michigan-based Borchardt Conference brings together a diverse group of engineers, scientists, public health specialists, and students to present and discuss the latest issues and advances in water and wastewater technology. Professor Jack Borchardt was dedicated to research and teaching within the Civil Engineering Department at the University of Michigan, and to the concept of lifelong education and in-service training. 💧

Dr. Lut Raskin, Greta Newhof, Dr. Marc Edwards (Prize Winner), Tom Newhof

SWIE UPDATE

SAFE WATER IN ECUADOR

By Eric Fogg, Reach Beyond

Safe Water in Ecuador is a program of the MI-AWWA and is funded through the generous support of donations as well as fundraising events.

In October 2015, a group of SWIE committee members travelled to Ecuador to visit an array of communities that we have contributed to financially to assist with the installation of community water systems. In addition, we visited a small community along the edge of the amazon rain forest, Santa Rosa, in

hopes to partner with Reach Beyond and contribute funds to a small community named Kawá, also along the edge of the amazon rain forest.

Our support has allowed Kawá to begin the process of installing a community water system. This system is a joint project with Reach Beyond, SWIE, and the local government. Reach

Beyond is a Christian mission that has been working with water projects in Ecuador for more than 30-years.

More than three years ago, the community of Kawá approached Reach Beyond to help design and construct a water system. They had been asking the local government for years, however, the local authorities did not

have enough money to completely fund the project. SWIE has played the key role that has allowed the project to succeed. SWIE funding was the element that put this all in motion. Reach Beyond performed the topographical survey, the technical drawings, and organized the community work projects called "mingas."

As of February 9, 2017, the community has worked very hard to capture the spring and this phase of the project is complete. In combination with Reach Beyond, SWIE has provided all of the tubes for the distribution system, and 1.5-kilometers (approx. 1-mile) of pipes has been installed. The water tower is the next phase, and the local government has committed to its construction. The process is well under way to obtain a contractor, but the winner of the bid has not yet been announced. We are hoping that the water tower will be completed in June of 2017.

Final phases of the project are installing the house water points in front of each house, and the solar array with the pump. Although the project is currently waiting for the government to install the water tower, the community is very excited to have completed their portion of the work in near record time.

We would like to thank SWIE, and all of their amazing supporters, for allowing clean water to change the lives of the people of Kawá. 💧

Nominating Committee Seeking Candidates

The Nominating Committee is seeking candidates for terms beginning in September 2017 (in conjunction with the Annual Conference) for the following positions:

- Trustees – three year term
- Chair-Elect – one year term followed by one year as Chair and one year as Past Chair

Self and peer nominations are both encouraged. Please also note the bylaws of the Section indicate that one of the board members should be from the Upper Peninsula of

Michigan and one should be either from the area of the Lower Peninsula north of Town Line Fifteen or from any district, area, or community in the Lower Peninsula maintaining water service to a population under 10,000 persons at the most recent Federal Census. The representation of the Board members is intended to reflect the diverse membership of the Section, including, but not limited to, geographical locations, membership categories, utility size, gender, and ethnic origins.

A nomination should include a short statement of interest and a brief summary of industry and AWWA activities. Interested members are encouraged to contact any of the Nominating Committee members with any questions. Nominations are due by May 1, 2017 and should be submitted to: Mark Coleman at mcoleman@wadetrim.com. Those who have submitted nominations in previous years are reminded to please reconfirm their interest for the coming year. 💧

ACCEPTING NOMINATIONS FOR THE EDWARD DUNBAR RICH SERVICE AWARD

Every year the Michigan Department of Environmental Quality (MDEQ) presents the Edward Dunbar Rich Service Award to water utility personnel who have served meritoriously and faithfully for 25 years in the Michigan water-works industry. You may have heard of the award, but who was Edward Dunbar Rich?

Edward Dunbar Rich was born in 1868 in Marcellus, New York. After attending Syracuse University, and Rensselaer Polytechnic Institute, he worked as an engineer in various capacities, including as city engineer for several New York municipalities. Rich was then appointed Assistant

Professor of the Civil Engineering Department at the University of Michigan, where he taught from 1908 to 1913. Edward Dunbar Rich was also an author, with several published articles and one book addressing water system engineering. He also served as a Major in the Sanitary Corps.

In 1913 he was appointed as State Sanitary Engineer of Michigan. While serving as Michigan's first sanitary engineer, he was responsible for performing sanitary surveys and approving construction permitting. He was known and respected for his quick response to waterborne disease outbreaks, and his sound engineering advice.

We honor his memory by honoring our water utility personnel for their dedication. Rich Award applications are now being accepted, with an application deadline of July 15, 2017. Please visit www.michigan.gov/drinkingwater and click on "Community Water Supply Home Page" to find information on the Rich Award and the nomination form. 💧

FINAL UCMR4 RELEASED BY EPA

The final Unregulated Contaminant Monitoring Rule 4 (UCMR4) identifies 30 contaminants that will be monitored by public water systems between 2018 and 2020, and specifies the analytical methods that must be used to measure these contaminants. The UCMR program provides EPA with nationally representative data on the occurrence of contaminants in drinking water, the number of people potentially being exposed, and an estimate of the levels of that exposure. The 30 contaminants included in the final UCMR4 consist of:

- Nine cyanotoxins and one cyanotoxin group (toxins produced by harmful algal blooms);
- Two metals;
- Eight pesticides plus one pesticide manufacturing byproduct;
- Three brominated haloacetic acid groups (disinfection byproducts);

- Three alcohols; and
- Three semivolatile organic chemicals.

All large community water systems and non-transient non-community water systems (that serve more than 10,000 people) will participate in UCMR4. A representative sample of 800 small systems will monitor for the 10 cyanotoxins, and a different sample of 800 small systems will monitor for the 20 other contaminants. The water systems that participate in UCMR4 account for approximately 80 percent of the population served by public water systems in the U.S.

In the last UCMR cycle (UCMR3), EPA required consecutive systems to also monitor for selected contaminants, particularly the ones for which compliance monitoring is normally conducted in the distribution system.

With more disinfection byproducts included in UCMR4, consecutive customer supplies can expect to be included again.

In accordance with Safe Drinking Water Act, EPA will consider the occurrence data from UCMR4 and other sources, along with peer-reviewed health effects assessments, to support a regulatory determination on whether to initiate the process to develop a national primary drinking water regulation.

As data become available, EPA will post results in the National Drinking Water Contaminant Occurrence Database, which is available on EPA's website. Additional information on UCMR4 and the UCMR program, including a copy of the signed final rule, is available at: <https://www.epa.gov/dwucmr>. 💧

INTRODUCING THE MICHIGAN WATER ACADEMY®

The Michigan Section is expanding its training program by developing the new Michigan Water Academy®. The Academy is designed to complement existing Section training and to supplement state licensure, taking the learner beyond regulatory requirements, helping him/her to demonstrate both skill and judgement. It is the hope that the Academy® can serve as a career progression pathway that helps water professionals advance within their organization and reach their long-term career goals.

The Academy begins with an introductory level for those new to water or those who don't work in a technical role, such as customer service reps or administrative staff. The learner can then progress through the next three levels as needed or desired working up to the Master level. (See inset below for levels and their corresponding courses.)

The Introductory level courses are available now. Check the training calendar online for classes and dates nearest you. The remainder of the courses are still in development with a role out of classes over the coming 18 months.

WE NEED SUBJECT MATTER EXPERTS

The Section is using three approaches to course development: licensing

existing courses, partnering with training companies, and developing original content. No matter how the course is developed, Michigan Section members will review the program agendas to ensure the highest degree of applicability for Michigan water professionals. This takes a host of volunteer experts willing to commit their time and talent to helping the Section develop these new training options.

WE ALSO NEED TRAINERS

The Section is also looking for experienced professionals to conduct these trainings. Qualifications vary by course but all instructors must have a minimum of five years in the water sector. Each trainer will be required to complete a Trainer Onboarding program that helps ensure an understanding of

adult learning best practices as well as a high degree of training proficiency.

WHAT'S NEXT

The Education & Training Council is spearheading the review of courses. If you are interested in either content development, content review, or becoming a trainer, please contact Executive Director Bonnifer Ballard at bballard@mi-water.org. 

A special thank you to the Michigan Water Academy® Advisory Committee members Wayne Jernberg of Grand Rapids, Brian Steglitz of Ann Arbor, Dave DeGrand of Lansing, Terri Conerway of Great Lakes Water Authority, and Bill Fritz formerly of Waterford and now of Great Lakes Water Authority for the ongoing guidance in the creation of the Michigan Water Academy®.

MICHIGAN WATER ACADEMY®

Safety is an integral part of every technical class. The Academy® strives to create a safety culture and instill that culture in its learners.

INTRODUCTORY LEVEL

Basic Water Works
Basic Customer Service
Basic People Skills

WATER APPRENTICE LEVEL

Water Treatment Basics
Safe Drinking Water Act
Water Distribution Basics
Intermediate Customer Service
Water Sector Technology
Career Planning

Upon completion of this level, learner receives a certificate of completion and would be prepared to sit for state licensing exams.

WATER PROFESSIONAL LEVEL

Source Water Management
Water Treatment Advanced
Water Distribution Advanced
Supervision and Management
Conflict Management and Resolution
Communications for the Water Professional Basic
Advanced Customer Service
Security and Emergency Planning

Upon completion of this level, learner would be eligible to apply for the Water Professional credential.*

MASTER WATER PROFESSIONAL LEVEL

Environmental Awareness
Board and Community Relations
Communications for the Water Professional Advanced
Rate Setting and Financial Management
Asset Management
Workforce Planning
Strategic Decision Making
Leadership for the Water Professional
Technology in Water Management
Upon completion of this level, learner would be eligible to apply for the Master Water Professional credential.*

*Not all classes are available. Many are still in development. *Credential not yet available.*

JOINT EXPO & OPERATORS DAY HIGHLIGHTS

Joint Expo & Operators Day offered trainings, a host of exhibits to visit, and some fun and prizes throughout the two days.

More than 30,000 sq. ft. of space offered wares from more than 200 exhibiting companies and their partners.

The Infrastructure Funding Seminar had a record number of attendees. Operators Day (pictured) had a full house as well.

THANKS TO SPONSORS OF THE SCAVENGER HUNT!

- Unconventional Solutions, Inc.
- Victaulic
- Wolverine Power

SPECIAL THANKS TO THE MIXER SPONSORS!

WHO WILL REPRESENT?

By Kelly Gleason, LBWL and Mike Schlegelmann, City of Troy

Another set of riveting competitions have come and gone, the 2017 Michigan Section State competitions took place on Tuesday and Wednesday, February 7 and 8 during the Joint Expo in Lansing.

WATER TAPPING

Two men's teams and two women's teams came ready to fight for the state title. The men's division defending state champions from 2016, the City of Troy, was the first at the main. After some issues with the water main and even some equipment failure their tapping times came in at 2:00.09 and 1:42:35, setting the time to beat for the men. The Troy women's team, Smooth Operators, followed on the pipe in an attempt to defend their 2016 state title; their first run came in at 3:19.44 and their second at 3:26.23. The LBWL women's team and defending national champions, Lethal Ladies, tapped next and finished with a time of 2:27.28, reclaiming the state title for the women's division. The LBWL Men's Team finished up the tapping competition; their first run came in at 1:47.09. They came back with an energetic second run finishing with 1:35.09 claiming the state title for the men's division.

The LBWL dominated this year's water main tapping competition. There will be three teams representing the Michigan Section AWWA at the National competition held in Philadelphia this June; the LBWL men's team, Troy's Smooth Operators and the defending national champions LBWL's Lethal Ladies. Congratulations to all teams for outstanding performances.

HYDRANT HYSTERIA

The Hydrant Hysteria contest was fast and exciting with three teams in contention. Each team attempted to assemble a McWayne M & H fire hydrant in the fastest time with all bolts tightened properly, assembled and aligned correctly, and with the main valve in the off position. Each team was given the opportunity to try twice, with their best as a final time. After the dust settled, the results were very close only seven seconds from first to third place. Taking first place and representing the Michigan-Section at ACE17 in Philadelphia, the City of Battle Creek, with a final time of 1:44:06. The City of Troy took second place with a time of 1:49:46 and Lansing Board of Water and Light came in third with a time of 1:51:37.

Congratulations to the Battle Creek team. Good Luck in Philadelphia.

TAPPING TEAMS PRESENT:

LBWL Michigan Tappers:

Coach: Derek Miller

Set-Up: Jon VanDommelen

Cranker: Brad Lundquist

Copper: Richard (Moe) Garza

Lansing Lethal Ladies:

Coach: Remecho Sanders

Set-Up: Beth Zimpfer

Cranker: Kelly Gleason

Copper: Maggie Emerson-Rich

Alternate: Marissa Klimkiewicz

Smooth Operators:

Coach: Mike Schlegelmann

Set-Up: Jeanette Menig

Cranker: Nikki MacMillan

Copper: Kelly LaPointe

Troy Tappers:

Coach: Scott Corruthers

Set-Up: Jake Diepholz

Cranker: Andy Willetts

Copper: Rich Wiles

HYDRANT TEAMS PRESENT:

The City of Battle Creek

Coach: Jeff Faulk

Team: Mark Olmstead and Rueben West

The City of Troy

Coach: Mike Schlegelmann

Team: Mark McCallum and Nick Schwab

Lansing Board of Water and Light

Coach: Brad Lundquist

Team: Richard Garza and Jon Van Dommelen

METER MADNESS

PARTICIPANTS:

- Burnis Moore, City of Battle Creek
- Camden Shrum, Oakland County
- Jon VanDommelen, LBWL
- Josh Barker, City of Battle Creek
- Rick Greenwell, City of Troy
- Tim Davis, City of Troy

First Place Men - LBWL Michigan Tappers

Meter Madness
First Place Winner
- Rick Greenwell

Hydrant Hysteria First Place Winners -
City of Battle Creek

First Place Ladies - Lansing Lethal Ladies

Second Place Men - Troy Tappers

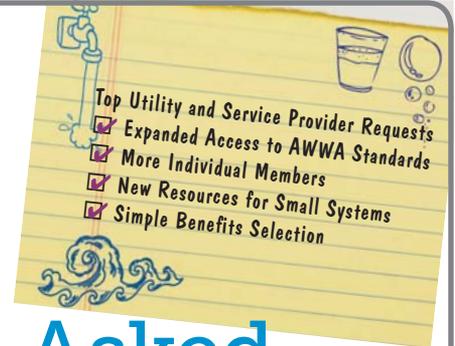

Second Place Ladies - Smooth Operators

METER MADNESS

This year's Meter Madness contest took place right after the Hydrant Hysteria contest wrapped up. The contestants performed two runs each, striving for the best time. The competition was fast and furious with Rick Greenwell coming in First place with a winning time of 39.42 seconds! Second and third place went to Tim Davis and Jon VanDommelen respectively.

Great job to all the contenders! Good luck to Mr. Greenwell the Michigan-Section 2017 Meter Madness Champion! 💧

IN MEMORIAM: JOSEPH TRESICK III

Joseph "Backflow Joe" Tresick III passed away on November 15, 2016. Joe was the Assistant Superintendent of the Clinton Township Water & Sewer Department before his retirement in 2013. Joe served many years as Clinton

Townships' Cross Connection Program Inspector and was known as the regions authority on plumbing cross connections. Joe got his start in the municipal water industry working in the meter shop at the Detroit Water & Sewerage Department in 1982. ♠

IN MEMORIAM: CRAIG BURANDT

Craig Burandt, of St. Joseph Michigan, passed away Friday, Jan. 20, 2017, at his home. Craig was born Jan. 27, 1949, in St. Joseph, and graduated from Lakeshore High School in 1967 and from Michigan State University with a bachelor's degree in 1971. Craig was employed as the water and sewer superintendent for Chikaming Township from 1977 until 1995 when he gained employment with St. Joseph Public Works, also as superintendent of sewer and water, retiring in 2011. He was an S1, D1 certified operator, first certified in 1978. Craig continued to work part-time for

Chikaming Township until his passing. Craig was a member of the MSU Alumni Association and a co-chair for the MSU Steak & Suds Committee. He was a longtime member of FOP Lodge 96 in St. Joseph and the Water Department Breakfast Group. In his free time, Craig enjoyed deer hunting, fishing, camping, the UP, gardening, and working on his vintage Mustang. ♠

AN EDITOR'S INTRODUCTION

by Kelly Gleason

Regular readers of the magazine know that the editorship of the magazine transitioned to new hands. This will be the second issue published since the change, and the first in which I step out and say hello. It is with great excitement that I introduce myself as the new editor of *Michigan Water Works News (WWN)*!

I am only a part of the editing team charged with getting the magazine out on time and in order. I'd like to say my previous experience earned me this position, but is more the case that I just happened to ask

the right person about getting involved at the right time. I hope my name is not unfamiliar as I have been a member of the nationally known Lansing Lethal Ladies Water Tapping Team for last five years, winning three back-to-back national titles – and we are working hard for a 4th this June in Philly!

I began my career in the water industry at the Lansing Board of Water & Light in 2007, when I started as a part-time administrative assistant at the Dye Water Conditioning Plant. I always had a love of science and was pursuing my bachelor's degree in Molecular Biotechnology at the time. When a position opened in the laboratory in 2010, my science career began as a Chemist. Initially, I was responsible for all wet method analysis and today I analyze for trace metals using Inductively Coupled Plasma Spectrometry. To further my water career, I pursued drinking water licensing and achieved F-1 and S-4 Operator licenses. Just last year, I joined the teaching team for the MSU Water Chemistry Short Course to communicate, demonstrate and allow practice of proper laboratory procedures to other water professionals.

It's been a while since I've filled a role as editor, but I've had experience writing copy and editing articles for newspapers and yearbook publications. I know the previous editor left some big shoes to fill, but I am confident the newsletter will continue to grow and adapt to changes presented by new technologies and the impacts of social media.

So, as I slip back behind the scenes as editor, I invite you to let me know what you like or don't like about *WWN*, and what works or what doesn't. I'm new at this, so I'm all ears! ♠

PROFESSIONAL RECOGNITION THROUGH SECTION AWARDS

Each year, the Michigan Section recognizes exceptional performance in various aspects of the water sector. Read on for a brief description of awards given at the Section's Annual Conference and Exhibits in September. Then visit the Section website at www.mi-water.org/?page=Awards to learn how to nominate yourself or a colleague.

Section Awards

- Exemplary Well Head/Source Water Protection Award – awarded to a community for an exemplary program protecting that communities well heads and/or source water.
- Michigan Water Industry Hall of Fame – inductees embody unwavering dedication to safeguarding public health and a deep commitment to advancing water knowledge.
- Raymond J. Faust Award – awarded to a water professional who exemplifies Raymond Faust's legacy of safeguarding public health.
- Richard Husby Public Awareness Award – awarded to a water professional who implemented a public awareness campaign that helps convey the value of water to Michigan communities.

- Young Professional of the Year Award – awarded to a young professional who has helped to increase member engagement and advance the Section's mission to advance water knowledge.

Association Awards

- Operator Meritorious Award – awarded to a water operator for special performance in safeguarding public health, maintaining water systems, training colleagues, and other special acts that contribute to outstanding operations and public service.
- George Warren Fuller Award – awarded to a water professional for distinguished service to the water sector in commemoration of the sound engineering skill, the brilliant diplomatic talent, and the constructive leadership that characterized the life of George Warren Fuller.

You can see more possible awards on the Association's website at www.awwa.org/membership/get-involved/awards.aspx.

OPERATOR'S MERITORIOUS SERVICE AWARD

The Michigan Section, AWWA is soliciting nominations of individuals to be considered for the 2017 Operator's Meritorious Service Award. This award will be presented at the Michigan Section, AWWA Annual Conference this coming September. The purpose of this award is to provide recognition to a section member for special performance in one or more of the following areas:

1. Continuous compliance with public health standards in finished water.
2. Consistent and outstanding contribution to plant maintenance thereby prolonging the useful life of equipment.
3. The development of new and/or modified equipment or significant process modifications to provide for a more efficient or effective treatment.
4. Special efforts in the training of treatment operator.

5. Special acts not directly related to water treatment but demonstrate dedication to the public beyond the normal operating responsibilities.
6. Constant and outstanding contribution to operation and/or maintenance of distribution lines, pump stations and reservoirs.

Deadline for submission of nominations is June 30, 2017.

To obtain a copy of the award nomination form, go to www.mi-water.org/page/OperatorMeritorious

Send submissions to:

STUDENT FELLOWSHIP AWARDED FOR 2017

Since 2001, the Research & Technical Practices (RTP) Committee has been providing research fellowships for students attending Michigan's accredited colleges and universities. The major objective of this fellowship program is to stimulate the involvement of students and academic institutions in Michigan in conducting research in drinking water related fields relevant to Michigan water community. In 2017, RTP received five applications for the fellowships

(\$3,000 each). RTP awarded one fellowship to Minal Jaisinghani (MSU) for the project titled "A Facile Approach to Synthesize Magnetic Iron Nanoparticles for the Removal of Arsenic from Michigan Well Water."

Proposals were very applicable to the challenges many Michigan water utilities are facing: arsenic and lead. The results from the 2017 fellowship will help provide utilities with information and tools to address arsenic treatment.

AWWA PARTNERS WITH MDEQ ON WATER INFRASTRUCTURE CONFERENCE

MDEQ held its Water Infrastructure Conference in early March. The conference drew more than 400 people from across the country, including AWWA CEO David LaFrance (shown to the right), who gave a talk on effective utility management. The Association and Section sponsored the conference and volunteers helped by moderating and fielding questions during the Public Education Workshop. 💧

JOIN YOUR FELLOW MICHIGANDERS FOR MICHIGAN NIGHT AT ACE17!

The Michigan Section traditionally hosts a reception the Sunday before ACE to help Michiganders meet up before the conference. This year, Michigan Night will be held

at Smokin' Betty's on Sunday, June 11. RSVP online to let us know you're planning to attend. 💧

Special thanks to sponsors of Michigan Night As of March 11, 2017

UPCOMING TRAININGS

April

- 4/5** Achieving and Maintaining Compliance with SDWA with RCAP
at Comfort Inn in Mt. Pleasant
- 4/11** Spring Regional Meeting
at Laurel Manor Conference Center in Livonia
- 4/12** Spring Regional Meeting
at Western Michigan University Fetzer Center in Kalamazoo
- 4/18 – 4/19** UP Water Works Institute
at Terrace Inn, Gladstone
- 4/18** Spring Regional Meeting
at Comfort Inn & Suites in Mt. Pleasant
- 4/19** Spring Regional Meeting
at Otsego Club & Resort in Gaylord

May

- 5/9 – 5/11** Short Course in Water Bacteriology
at Michigan State University in East Lansing
- 5/18** Lab Practices Seminar with MWEA

- 9/6** Cross Connection Seminar – Advanced
at Lansing Community College–West in Lansing with MDEQ
- 9/12 – 9/15** MI-AWWA Annual Conference & Exhibits
at Shanty Creek, Bellaire, MI
- 9/20** Cross Connection Seminar – Advanced
in Gaylord with MDEQ

October

- 10/3** Fall Regional Meeting
at Laurel Manor Conference Center in Livonia
- 10/4** Fall Regional Meeting
at Western Michigan University Fetzer Center in Kalamazoo
- 10/10 – 10/12** Distribution System Short Course
at Gull Lake Conference Center in Hickory Corners with MDEQ
- 10/10 – 10/12** Limited Treatment Short Course
at Gull Lake Conference Center in Hickory Corners with MDEQ
- 10/18 – 10/20** Basic Math & Hydraulics Short Course
at Kettunen Center in Tustin with MDEQ
- 10/18 – 10/20** Water Treatment Short Course II
at Kettunen Center in Tustin with MDEQ
- 10/24** Fall Regional Meeting
at Comfort Inn & Suites in Mt. Pleasant
- 10/25** Fall Regional Meeting
at Otsego Club & Resort in Gaylord
- 10/24 – 10/25** U.P. Distribution Seminar
at Ramada, Marquette

NEWS & NOTES

HELPING STUDENTS ACHIEVE

High School Seniors who have at least one parent as a member of AWWA are eligible to apply for the Michigan Section College Freshman Scholarship. As the parent, your membership must be active as of July 2017. Take advantage of this added member benefit and make sure your senior applies.

One AWWA Operator Scholarship is a new scholarship available to an operator working in the water sector. This award can be used for trainings or college classes.

The **Faust Scholarship** is available for college students pursuing a degree in the water sector. This can be a two or four year degree but must be at a Michigan school.

Visit <http://www.mi-water.org/?page=Scholarships> for more information and to download the application for the scholarship of your choice. Application packets are due by July 1. 💧

AMERICAN Zinc: A SMaRT Product for Smart Cities

The list is growing – from San Jose to Miami, from Boston to Birmingham, and cities in between. From north to south, east to west, across the country cities are recognizing the benefits of specifying and installing zinc-coated ductile iron pipe. Why zinc? The zinc-coating system is a proven, life extending product for iron pipe, adding years of life and service to an already reliable and resilient product. And, ductile iron pipe is the only pressure pipe to be SMaRT certified, a designation given to products that use recycled materials, provide energy savings and are environmentally safe. With zinc-coated ductile iron pipe, water utilities can be confident that their customers will have sustainable and dependable water service for generations to come. And, it's made in America by AMERICAN.
