Have you experienced any symptoms of COVID in the last 48 hours (cough, chills, shortness of breath, loss of smell/taste, fever over 100 degrees, etc.?)

Have you been in close contact with someone who tested positive or has symptoms of COVID in the past 14 days?

Have you traveled outside of the state or country in the past 14 days?

If client answers "yes" to any of these questions, you may want to consider asking the person to stay outside.
