

AMERICAN BATTERY FACTORY

NATTBATT AZ CONFERENCE
REV: ABF_NB_220205

American GWh Battery Factories

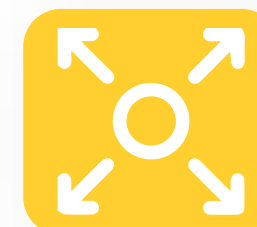

#1

1st network of Lithium Iron Phosphate cell giga factories in the USA

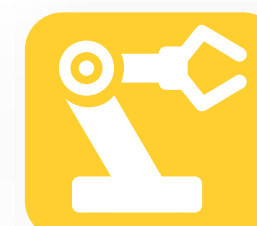

Geographically decentralized - sized to support local economies & customers

3 GWh modules, growing to 15 GWh+ Fully automated/robotic plants

US sourced materials

R&D Center located within 1st factory

Goals - Market Focus - Pack Integrators & Solution Providers targeting:

- ✓ **U.S. Military & Government (National Security Priority)**
- ✓ **Battery Energy Storage Systems (BESS)**
 - ✓ Grid/Utilities, Commercial, Industrial, Residential, Emergency, Telecom, Data Centers, Energy Shaving, Micro Grid, etc.
- ✓ **Selected Electric Vehicles**
 - ✓ Trucks, e-Buses, Trams, Agriculture vehicles (tractors, mowers, etc.), RV's, Off-Road, Marine/Water Sports, Mining, AGV, Traction machinery, golf carts, e-bikes, wheelchairs, sweepers, forklifts, scooters, heavy construction machinery, etc.

All require or desire USA made safe battery cells

ESG: environmental, social and governance Guides, motivates & steers

Supporting US Supply Chain Eco-System for cell manufacturing

“ American Battery Factory is guided by ESG founding principles, which then makes daily decisions much easier.

”

– American Battery Factory

**Transitioning supply chain from
China to localized USA sourcing**

US material suppliers wanted

Co-location opportunities at ABF
factories for suppliers

JV & strategic partnerships available
