

# **Rotary Die Cutting, Laminating, Laser Cutting Solutions**

Roll-to-Roll and Roll-to-Sheet  
multi-layer solutions

SMART **ROLL-TO-ROLL** machine for  
**MULTI-LAYER** PRODUCTION of  
**Li-Ion CELLS**

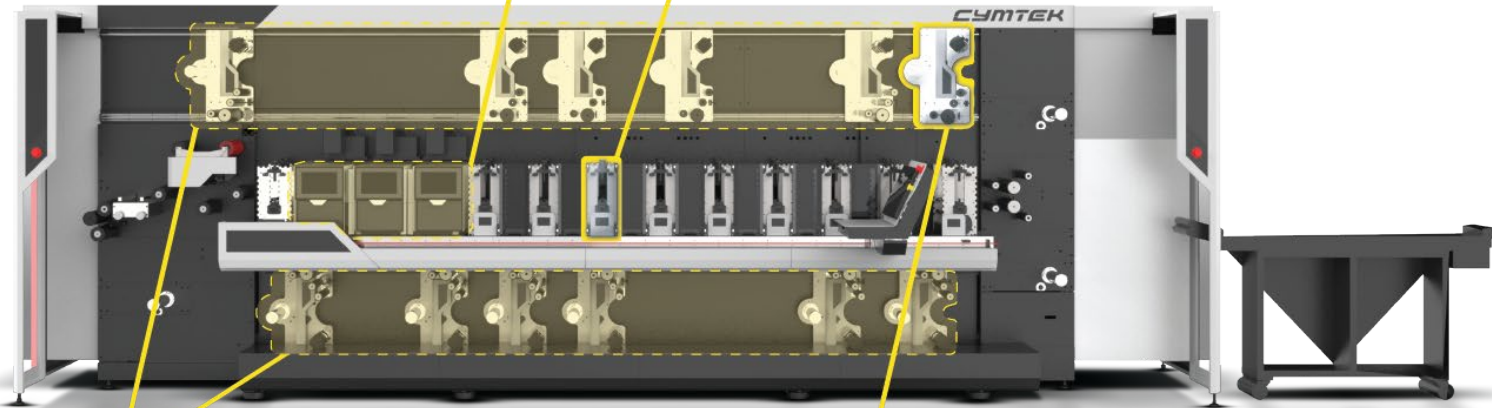

# Roll-to-Roll continuous process

# Widths available : 10" (250mm) to 27" (685mm)

Fully integrated laser stations with ablation and through cut capabilities  
Integration of any major laser manufacturer

Each station is driven by servomotor, can communicate between each other and adjust automatically.  
Configurable up to more than 20 stations.

Upper/Lower materials stands  
programmable as unwind/rewind units  
to allow more product flexibility

Close loop tension with load cells for all  
unwind/rewind stands and controlled by  
independent servomotor
