A NEW TECHNOLOGY TO MANUFACTURE SOLID STATE BATTERIES SSE / SSB using injection molding

WE BUILD THE CELL IN THE PRESS, multiples or large format multilayer

SMALLEST MANUFACTURING CELL FOOT PRINT

EXISTING, Ubiquitous FACILITIES – no GIGA, MEGA, JUMBO investments = fastest ROI

LOWEST COST

WE SUPPLY the MATERIALS and the SAVOIR FAIRE to OUR molding CONTRACTORS.

SAFER, FASTER CHARGE / DISCHARGE rates, TOUGHER, LONGER LIFE, Higher capacities = SSB

GREATER OPERATIONAL TEMPERATURE RANGES, won't freeze or boil = little or no thermal management

UNSURPASSED INTERFACES – using high HEAT and high PRESSURE

no SOLVENTS, no SEPERATORS, no WELDING, no secondary operations, less or no STEEL

LIGHTER WEIGHT, CONFORMAL GEOMETRIES

BETTER, FASTER, CHEAPER - than the STATUS QUO

PATENTED process, Worldwide

CHEMISTRIES – Lithium and beyond

We're open to collaborative conversations and applying your chemistry ?
