

Octet Scientific

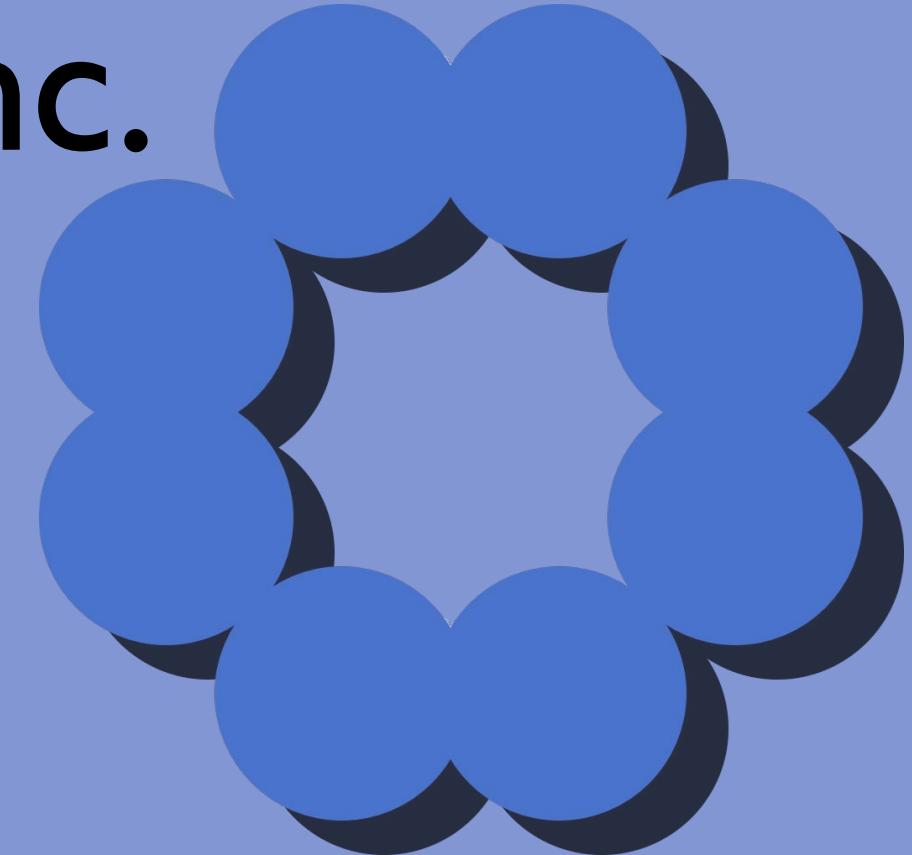

Chemistry for Tomorrow's Best Batteries

Onas Bolton PhD, CEO/Founder – onas.bolton@octetsci.com

Octet Scientific, Inc.

We make better
electrolyte additives for
metal-based batteries.

We Tame Plating in Batteries

Elegantly stop dendrites to **extend cycle life**,
increase energy density, and
improve efficiency.

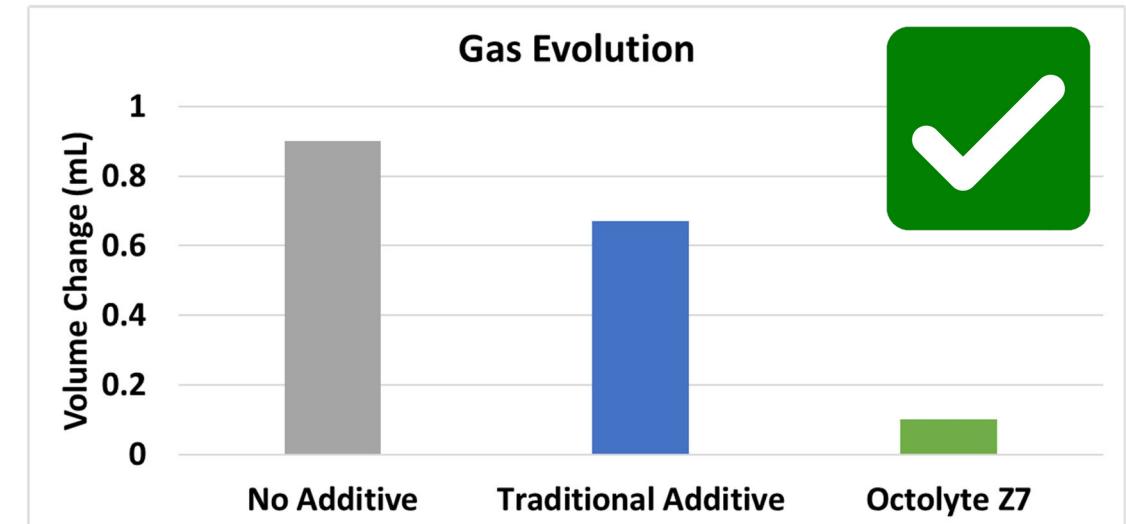

We Stop Gas and Corrosion

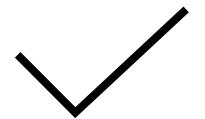

Prevent corrosion/self-discharge to **extend shelf life**,
increase operating life, and
(again) improve efficiency.

7x less gas than traditional additive

We do it all with drop-in Additives

Simple: A few drops are all you need

Scalable: Simple and economical

Sustainable: Long-lasting and life-extending

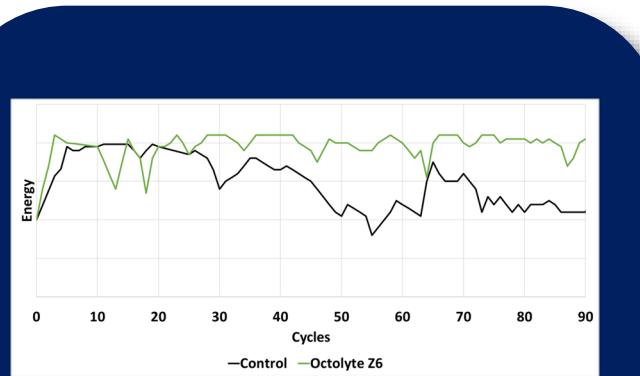

Safe: Low hazard and safe to use

Our Current OctoLyte™ Products

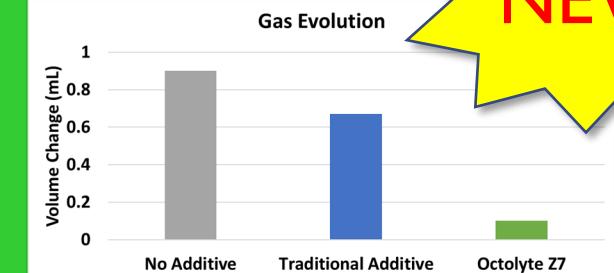

OctoLyte Z1 – Z5

Superior dendrite and gas-on-charge control for alkaline and neutral cells

OctoLyte Z6

Exceptional plating control and stability in acidic and halide chemistries

OctoLyte Z7

Select corrosion and gas suppression for primary and secondary cells

Our Future OctoLyte™ Products

An Additive Database of Hundreds (and growing)

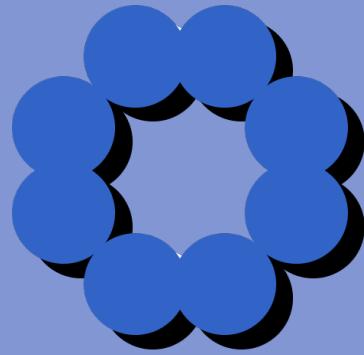

We've got thousands of data sets on hundreds of additives.
We've got the molecules you need.

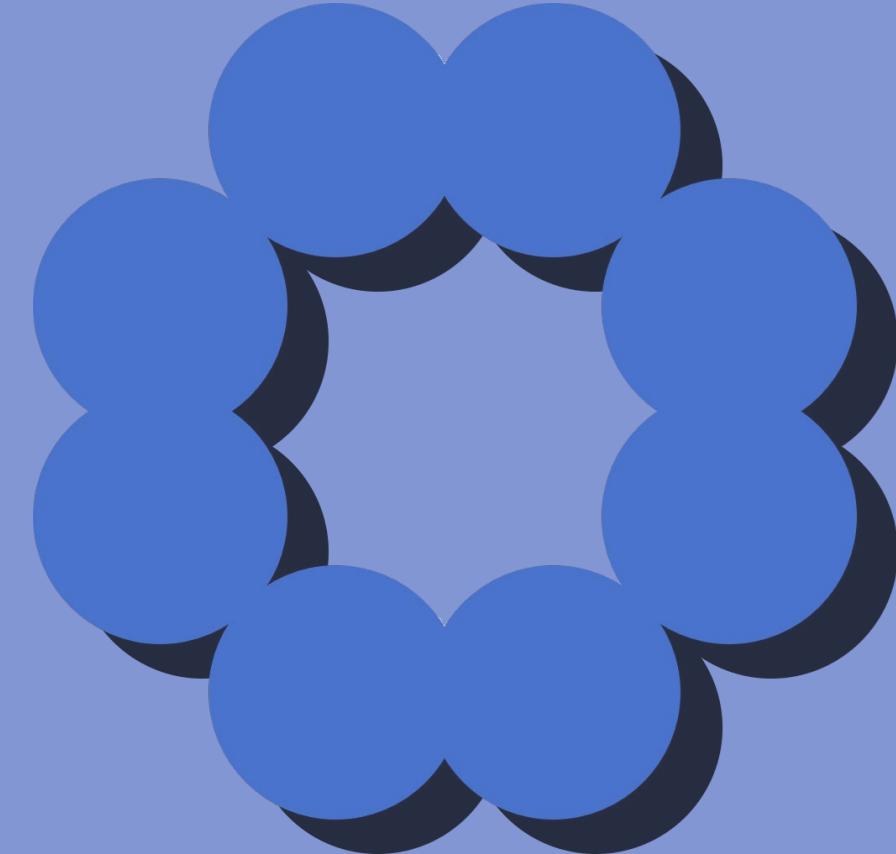

Custom Additive Development

...and if we don't, we can design, synthesize and scale the perfect additive for your best battery.

Octet Scientific

Let's Optimize Your Battery
