

Vijaynagar Site

## EPSILON CARBON GROUP

- Established in 2010, we are India's largest integrated producer of coal tar derivatives and carbon black.
- Our anchor facility is a 165-acre site in Vijaynagar, India
- We have been investing to produce and sell graphite for LiB anodes for the past 4+ years.

Graphite Pilot Plant

## Epsilon Advanced Materials (Graphite for LiB Anodes)

- Commercialized patented process to make mesocoke from pitch. Mesocoke is the raw material for making synthetic graphite.
- Selling mesocoke to anode producers. Expanding mesocoke capacity.
- Built Pilot Plant to produce both synthetic and natural graphite.
- Products being qualified by many global customers.
- Building a larger Pilot Plant for completing customer qualification.
- Started engineering for a 10 KMT plant for India. Additional capacity is planned.
- Developing Projects outside India. Finland Project announced. Environmental Impact Assessment in progress.
