

Accelerate transformation
in the battery industry
and become a **Digital
Enterprise now**

SIEMENS

SIEMENS

Siemens offers end to end solutions for the entire supply chain

What is critical for your operation and how Siemens can help

Safety

- Personnel
- Environment
- Fire risks
- Community
- Cyber security

Scaling

- From lab to pilot
- From pilot to commercial
- Utilities
- Expansion

Process optimization

- Yield improvement
- Quality
- Efficiency
- Throughput
- Increase uptime

Data Monitoring and Traceability

- Predictive maintenance
- Cyber security
- AI/machine learning
- Track & trace

Sustainability

- Energy performance
- Waste management
- Reduced carbon footprint

Industry Solutions

Digital Threads

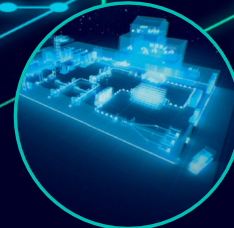

Accelerated Battery Development

How can you develop the next generation of battery cell & pack innovations that meet safety, sustainability and performance goals fast enough?

Battery Smart Manufacturing

How can you produce high-quality batteries at scale while meeting delivery, throughput, cost, and sustainability targets?

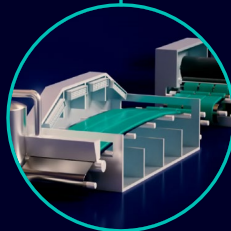

Factory Engineering & Construction

How can you turn the factory itself into a product to define an optimum factory blueprint that replicates seamlessly?

Intelligent Battery Circularity

How can you intelligently connect data for end-to-end traceability and closed-loop circularity?

Advanced Machine Engineering

for Battery Equipment Manufacturer

Meet the Siemens Battery Team at Booths 6 & 7
