

**NHMS Policy Position**

**Subject: Reproductive Health Services**

Resolved, that the New Hampshire Medical Society:

1. Recognizes that healthcare, including reproductive health services like contraception and abortion, is a human right;
2. Opposes limitations on access to evidence-based reproductive health services, including fertility treatments, contraception, and abortion;
3. Will work with interested state medical societies and medical specialty societies to vigorously advocate for broad, equitable access to reproductive health services, including fertility treatments, contraception, and abortion;
4. Supports shared decision-making between patients and their physicians regarding reproductive healthcare;
5. Opposes any effort to undermine the basic medical principle that clinical assessments, such as viability of the pregnancy and safety of the pregnant person, are determinations to be made only by healthcare professionals with their patients;
6. Opposes the imposition of criminal and civil penalties or other retaliatory efforts against patients, patient advocates, physicians, other healthcare workers, and health systems for receiving, assisting in, referring patients to, or providing reproductive health services;
7. Will advocate for legal protections for patients who cross state lines to receive reproductive health services, including contraception and abortion, or who receive medications for contraception and abortion from across state lines, and legal protections for those that provide, support, or refer patients to these services.
