Target audience

This meeting is designed for anesthesiologists and practitioners who specialize in ambulatory anesthesia and for scientists working in the areas of basic and clinical sciences.

Needs Assessment

Topics for this meeting were selected by several methods. Suggestions for future topics were derived from evaluations of the 2008 and other previous mid year and annual meetings. Additionally, these suggestions were discussed by our authorities in the field of ambulatory anesthesia with educators who attended previous Annual, Mid Year and Board of Directors meetings.

Educational Goals

After attending this meeting, the attendee will:

- Understand both medical and ethical risks in pediatric patients undergoing outpatient or office-based procedures.
- Be able to compare and contrast the operational differences in establishing an office-based anesthesia practice versus a hospital-based sedation service.
- Understand both the current state and future of patient controlled sedation and its applications.

CME Accreditation

This activity has been planned and implemented in accordance with the Essentials and Standards of the Accreditation Council for Continuing Medical Education through the Joint Sponsorship of the American Society of Anesthesiologists and the Society for Ambulatory Anesthesia. The American Society of Anesthesiologists is accredited by the Accreditation Council for Continuing Medical Education to sponsor continuing medical education for physicians.

The American Society of Anesthesiologists designates this educational activity for a maximum of 6.5 *AMA PRA Category 1 Credit(s)*[™]. Physicians should only claim credit commensurate with the extent of their participation in the activity.
