

WHY should women **BEGIN ANNUAL SCREENING MAMMOGRAPHY @ 40?**

For more information visit End the Confusion, www.endtheconfusion.org

Breast cancer parameters don't change at a specific age

Screenings lead to largest reduction in deaths

Screenings detect cancer while still curable

The harms of screenings are negligible compared to death

Breast Cancer Occurrences Increase With Age

40% of the years of life lost to breast cancer is among women diagnosed in their 40s

WHY should women **BEGIN ANNUAL SCREENING MAMMOGRAPHY @ 40?**
