GREETINGS

On behalf of the City of Savannah, it is my pleasure to extend a warm welcome to the attendees of the 2022 SBIACR (Society of Breast Imaging) Breast Imaging Symposium.

We are delighted that your conference will be held in the City of Savannah to bring together medical professionals for the purpose of saving lives and minimize the impact of breast cancer.

While in Savannah, I encourage you to explore the many attractions our city has to offer, sample cuisine at the many fine restaurants, enjoy the rich and diverse heritage, and share in our Southern hospitality.

Again, I offer best wishes for a remarkable event and memorable visit.

Sincerely,

A handwritten signature in blue ink that reads "Van R. Johnson, II". The signature is written in a cursive style with a large, sweeping flourish at the end.

Moving Forward: New Approaches in Breast Imaging

John Lewin, MD, FACR, FSBI
2022 Symposium Program
Chair

Welcome to the 2022 SBI/ACR Breast Imaging Symposium! This year will be the first-ever hybrid in-person/virtual SBI meeting. For those of you attending on-site, I am sure you will agree that it will be great to see our colleagues in-person after 2 years of seeing only each other's faces on our computer screens. For those of you attending virtually, I am happy that technology has allowed the virtual option so that many more people, both in the U.S. and abroad, can participate. As always, the conference is designed to include

a mixture of clinical and non-clinical topics with both practical and future-looking sessions, designed to provide learning opportunities to all of our attendees, whether they are sub-specialized breast imagers, general radiologists doing breast imaging, trainees, technologists, or others interested in advancing the field. Newer topics, such as AI and DEI, join new treatments of older topics, such as MRI interpretation, practice efficiency and personalized screening. This conference is the result of hours of hard work (and hours of Zoom meetings) by our dedicated SBI staff, our Program Committee and, of course, our faculty. I cannot begin to express my gratitude for all the effort that they have put in to make this event a success. Special thanks is also due to our corporate sponsors and exhibitors for their critical support. Finally, I would like to thank all the in-person and virtual attendees, SBI members, fellows, trainees and guests, for participating and for doing your part to improve breast cancer detection and diagnosis through education, outreach and commitment to our patients. Here's to a great meeting!

John Lewin, MD, FACR, FSBI

LEARNING OBJECTIVES

- 1 Summarize the current scientific debate and variations in recommendation for breast cancer screening with mammography.
- 2 Recognize the role of risk assessment and tailored screening paradigms to improve breast cancer screening outcomes.
- 3 Describe newer modalities for breast imaging, including various supplemental modalities to mammography, accuracy of interpretation, and up-to-date concepts regarding breast density assessment.
- 4 Identify different practice patterns, metrics, and challenges pertaining to varying breast imaging practices across the country.
- 5 Explain how other practices organize and administer breast imaging practices at the local level, while establishing overall practice guidelines at the national level that meet local needs.
- 6 Review barriers in access for breast imaging care to develop strategies for improved service lines.

CME-CE-SAM

Physicians earn up to 23.25 CME and 8 SAM

Technologists earn up to 22.25 CE

Accreditation Statement

This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of The American College of Radiology and The Society of Breast Imaging. The American College of Radiology is accredited by the ACCME to provide continuing medical education for physicians.

Physician Credit Designation

The American College of Radiology designates this live activity for a maximum of 23.25 *AMA PRA Category 1 Credits*[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Technologist Accreditation Statement

The American College of Radiology (ACR) is approved by the American Registry of Radiologic Technologists (ARRT) as a Recognized Continuing Education Evaluation Mechanism (RCEEM) to sponsor and/or review Continuing Education programs for Radiologic Technologists and Radiation Therapists.

Technologist Credit Designation

The American College of Radiology designates this educational activity as meeting the criteria for up to 22.25 Category A Credit hours of the ARRT.

Instructions to Receive Credit - Physician

In order to successfully complete the activity, participants must attend the live virtual meeting, complete an activity evaluation and claim credit commensurate with their participation in the activity. Claim credit via the Symposium website.

Instructions to Receive Credit - Radiologic Technologists and Radiation Therapists

In order to successfully complete the activity, participants must attend the live virtual meeting, complete an activity evaluation and claim credit commensurate with their participation in the activity. Radiologic Technologists and Radiation Therapists must validate attendance for the

entire duration of a session; no partial credit will be given. In accordance with ARRT attendance requirements, SBI will provide live attendance validation for technologists. Claim credit via the Symposium website.

SAM Sessions

The Self-Assessment Module (SAM) activities for the morning plenary sessions will be completed online, on your own time. SAM quizzes can be accessed via the Symposium website.

SAM Statement

Qualified on April 1, 2022, this activity meets the American Board of Radiology's criteria for self-assessment (SAM) activity and is designated for up to 8 SAM credits toward the ABR Maintenance of Certification program.

For information about the accreditation of this program, please contact SBI at info@sbi-online.org.

Disclosure of Relevant Financial Relationships

The ACR Disclosure Policy: The American College of Radiology (ACR) adheres to the policies and guidelines, including the Standards for Integrity and Independence in Accredited CE, set forth to providers by the Accreditation Council for Continuing Medical Education (ACCME), stating those activities where continuing education credits are awarded must be balanced, independent, objective, and scientifically rigorous. All persons in a position to control the content of an accredited continuing education program provided by ACR are required to disclose all financial relationships with any ineligible company within the past 24 months. All financial relationships reported are identified as relevant and mitigated by ACR in accordance with the Standards for Integrity and Independence in Accredited CE in advance of delivery of the activity to learners. The content of this activity was vetted by ACR to assure objectivity and that the activity is free of commercial bias. All relevant financial relationships have been mitigated by ACR.

*Individual presenter disclosures are available on the meeting website.

PRESIDENT'S GALA

Join us for a celebratory evening to support the SBI Research and Education Fund at the historic Kehoe Iron Works as we honor 2022 Gold Medalists R. Edward Hendrick, PhD, FSBI and Mark A. Helvie, MD, FSBI along with 2022 Honorary Fellow, Savannah C. Partridge, PhD.

SBI RESEARCH & EDUCATION FUND

The mission of the SBI Research & Education (R&E) Fund is to support the research and education of breast imaging professionals. SBI wishes to offer travel grants to residents and fellows who have been selected to present their original scientific work at the SBI/ACR Breast Imaging Symposium. Your generous donations will ensure these deserving young professionals—the future of the society—have the access, support, and resources they need to excel.

WHAT YOUR DONATIONS SUPPORT: RESEARCH AWARD WINNERS

Two research prizes are awarded for abstracts presented at the annual Symposium: one to a medical student/resident and one to a fellow, based on scientific merit. Each oral abstract winner is awarded a \$1,000 honorarium. Additionally, presenters of the two highest-scoring electronic abstracts are granted \$500 in honoraria.

SBI AWARDS AND RECOGNITIONS

SBI Gold Medalists

R. Edward Hendrick, PhD, FSBI

Ed Hendrick, PhD, Clinical Professor of Radiology at the University of Colorado School of Medicine, has dedicated his career to improving the quality of breast imaging. He served as the physics chair in establishing the American College of Radiology's Mammography Accreditation, MRI Accreditation, Stereotactic Breast Biopsy Accreditation, and Breast MRI Accreditation Programs. Dr. Hendrick helped define ACR and FDA federal standards for mammography equipment and quality control and was lead author of all four editions of the ACR's Mammography Quality Control and Stereotactic Breast Biopsy QC Manuals, in addition to serving as co-author of the recent Digital Mammography and MRI QC Manuals. He was a charter member of the FDA's National Mammography Quality Assurance Advisory Committee and co-chair of the Agency for Health Care Policy's Panel on Quality Determinants of Mammography. He served as principal investigator of the first trial of digital mammography and as co-PI of

the ACRIN DMIST trial. He served as both Treasurer and President of the Society of Magnetic Resonance Imaging and is a fellow of ACR, SBI, AAPM, SMRI, and the International Society of Magnetic Resonance in Medicine. Dr. Hendrick's scientific publications have supported adoption of new technologies in breast imaging and have contributed greatly to preserving the right of U.S. women to have access to screening mammography.

Mark A. Helvie, MD, FSBI

Mark Helvie, MD, is the Trygve O. Gabrielsen Professor of Radiology at the University of Michigan Health System, Ann Arbor Michigan. Born in Chicago, he is a graduate of Duke University and the University of North Carolina. He completed residency training at the University of Michigan, becoming board certified in both Internal Medicine and Radiology. He was fortunate to work with visiting professor, Dr. Ingvar Andersson from Malmo, Sweden early in his career. He has authored and co-authored over 300 publications and been awarded numerous grants. A long-standing fellow and previous board member in the Society of Breast Imaging, he is Vice Chair of the National Comprehensive Cancer Network (NCCN) Breast Cancer Screening & Diagnosis Panel. His major research is in the field of breast care including patient care, screening, imaging, artificial intelligence, clinical outcomes, and management strategies.

Dr. Helvie has been married 44 years to Leigh and they have 4 children and 4 grandchildren. His outside interests include gardening, construction, bicycling, woodworking, and hanging out with his grandchildren.

SBI Honorary Fellow

Savannah Partridge, PhD

Savannah Partridge, PhD, is a Professor of Radiology and Research Director of the Breast Imaging section at the University of Washington, Seattle, WA. She earned a PhD in Bioengineering with a focus in medical imaging physics from the joint graduate program at University of California, Berkeley and UC San Francisco. At UW, Dr. Partridge leads the Quantitative Breast Imaging research laboratory developing advanced MRI acquisition and analysis techniques for clinical breast applications. A primary focus of her research is development and clinical validation of non-contrast diffusion-weighted MRI for breast imaging. Her research group works to improve breast cancer screening technologies and to improve outcomes through better differentiation of high and low risk disease and more accurate assessment of treatment efficacy. She collaborates closely with multidisciplinary clinicians and scientists and mentors numerous students and

trainees. She is an active member in multiple national cancer and imaging cooperative groups and has served as chair and co-chair of two national breast MRI clinical trials through the ECOG-ACRIN Cancer Research Group (ECOG-ACRIN trials A6702 and A6698).
