POTENTIAL OUTLINE FOR THE 9-MONTH LEADERSHIP ACADEMY SESSIONS

Kouzes and Posner Leadership Challenge

The Leadership Challenge by James Kouzes and Barry Posner is a research-based guide that defines leadership as a measurable, learnable set of behaviors rather than an inherent personality trait. Based on decades of global data, the authors present "The Five Practices of Exemplary Leadership," which instruct leaders to model the way, inspire a shared vision, challenge the process, enable others to act, and encourage the heart. Ultimately, the book demonstrates that extraordinary leadership turns abstract values into concrete actions by fostering trust, collaboration, and meaningful engagement across an organization.

The book could form the foundation for a 9-month program, and the cohort project could be woven throughout.
