

BUS RAPID TRANSIT COMES TO SPOKANE!

The six-mile route between Spokane's historic Browne's Addition and Spokane Community College will connect through downtown and the University District, including Gonzaga University.

City Line intersects with most of Spokane Transit's routes, increasing connectivity to the downtown core from throughout the service area.

SERVICE BEGINS JULY 15

Introductory fare free period July 15 - Sept 4

CITY LINE

SPOKANE TRANSIT

EXPERIENCE A NEW LEVEL OF TRANSIT

CONNECT WITH SPOKANE TRANSIT!

Made to Move the Community

Whether commuting to work, connecting students, or taking advantage of downtown Spokane's entertainment and restaurants, City Line delivers next-level service.

Frequent service

15-minute service for 16 hours a day, six days a week, with 30-minute service on Sunday. Higher frequency coming in 2024.

Faster boarding

When a City Line bus pulls up to a platform, riders board through any door using contactless fare validators at each door. Each bike rider brings their bike onto the bus through the rear door to the onboard bike racks. Near-level platforms mean the bus doesn't need to lower itself to let riders board.

All-door boarding, near-level platforms, and onboard bike racks work together to decrease the amount of time a bus spends stopped at a station.

Easy to Navigate

City Line leverages technology to help riders navigate through the system.

When is the next bus?

Monitors at each stop provide real-time estimates of when the next bus leaves. Between the frequent service and the real-time monitors, riders hardly need a schedule!

Where is my stop?

Onboard screens show where the bus is along the line and upcoming stops, so riders know when to get off the bus. Screens also indicate to exit to the left or right of the vehicle.

Quiet and Clean

State-of-the-art buses move Spokane in style.

Battery-Electric, Zero-Emission

The City Line fleet is made up of zero-emission, battery-electric buses that are quieter than conventional buses and better for the environment. They are charged both during service and overnight.
